INTRODUCTION

The Government of Ethiopia has given high priority to the Education Sector. Since 1994, the Government has pursued a policy of regional decentralization and Regions are pursuing regional development goals based on the identified priorities. The Government has also developed Education and Training Policy (1994) and Education Sector Strategy as well as Education Sector Development Programme (1997).

The New Education and Training Policy (ETP) has devised a strategy to develop an education system with curriculum adaptable to the needs of the country. The Education and Training Policy, its Strategy and the Education Sector Development Programme (ESDP) are all geared towards re-addressing the problems of access, equity, quality and relevance with which education in Ethiopia was hooked.

The essential element of the Education and Training Policy is to fundamentally re-structure and overhaul the system. The aim is to expand education in a form, which is directly relevant to the present and future requirements of the economy.

Accordingly, new curriculum have been developed that can address the needs of the community and empower the students to create their own means of employment. It has considered the socio-economic situation of the country and envisages to comply with international standards. As a result, encouraging progress is being observed since then in education at all levels.

Currently the second Sector Development Plan is being prepared. The level of development in the sector is being monitored using measurable education indicators, which are set in the first ESDP. Accordingly, to support this effort, the Ministry of Education produces “Education Statistics Annual Abstract” on education every year. The main purpose of the publication is to provide relevant, reliable and up to date data on education. The 1993 E.C. (2000/01) Education Statistics Abstract is designed to serve as resource of information for the various stakeholders in the education sector for the purposes of research, planning, and the formulation of education policies and plans at both regional and national levels. It tries to serve as the main “*Means of Verification*” for the educational indicators set for the Education Sector Development Programme (ESDP). In general it tries to reflect the educational development in the country as much as possible besides the limitations and problems prevailing in terms of quality and coverage of data.

As usual, the publication has two main parts: General education and Higher Education. Time series data on enrolment, teachers, sections and schools for the last five years are included to compare among regions, see patterns and trends. This abstract, for the first time, has included the figure of evening programme students in primary and secondary schools to estimate the GER.

The Abstract mainly encompasses information, on basic variables at all levels of education in Ethiopia, from Kindergarten to the level of Higher Education. The publication contains both descriptive and analytical summary on enrolment, teachers, sections, schools, etc. The data is further presented by level of education, sex, type, region, urban and rural areas, to identify the disparities by region, urban/rural and gender.

As most of the Regions produce their own annual educational statistics, the statistics indicated in this abstract is at national and regional levels. However, comparisons between the regions are depicted, as it is useful in showing how conditions vary regionally. Those interested in detailed information and data of a region can look into the educational statistics of that particular region.

In the near future, it is hoped that educational statistics at national level will be available through Internet.

Education Indicators

Education indicators play an important role in providing a clear picture of the education system and the tangible changes that have occurred as a result of the system and other interventions. Policy makers, planners, and other stakeholders can use it for decision making, further planning, or to take corrective measures on time.

In this publication indicators which are internationally acceptable and applicable to our situation are included. Education indicators could be single statistics (e.g. number of qualified female teachers, number of teachers with university degree, etc.) or composite statistics (gross enrolment ratio, pupil-teacher ratio, pupil-section ratio, etc.). Each indicator can be used individually or in relationship to one another. A single indicator will not give a full picture, but the use of combinations will maximize the power of the indicators.

The main sources of data to prepare the abstract are reports from Regional Education Bureaus, different Institutions, Kindergartens, Technical schools and Central Statistical Authority's (CSA) population projection.

Due to unavailability of complete information, the education data for Afar and Somali Regions are partially taken from last year.

School age population data for each region was taken from the 2000/01 projected Central Statistical Authority (CSA) population using the Sprague Multiplier Method, a technique used for interpolating intermediate values in a given series of data, 0-4, 5-9, 10-14, etc. The total projected population of Ethiopia for the year 1993 E.C. (2000/01) is 63,494,704 out of which 49.83% are females and 50.17% are males.

Access

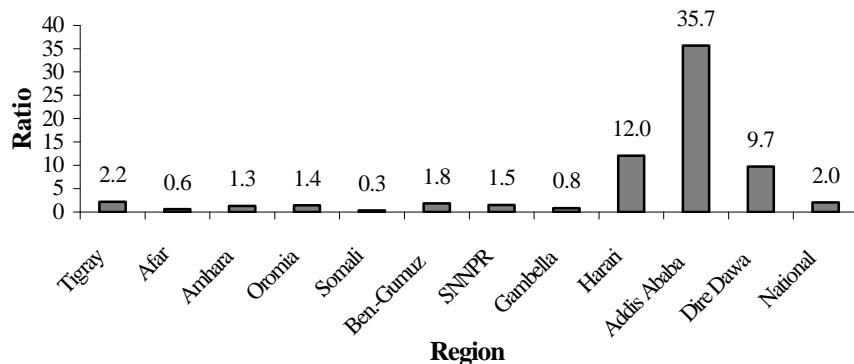

Enrollment in Kindergartens

This level normally includes pupils of age 4-6, enrolled in the pre-primary education. In Ethiopia non-government organizations, community, missions, private individuals, religious institutions, etc run kindergartens. This is both to enhance the involvement of the private sector in education, and also maximize the governments' effort in the other levels of education. The number of these schools is increasing every year, particularly in urban areas.

However, it is not yet reached at a stage where by full coverage of this level maintained in terms of educational information.

Gross enrollment ratio in kindergarten schools: is defined as the proportion of total number of children in kindergarten, irrespective of age to total population of age 4-6.

Gross Enrollment Ratio for Kindergartens - 1993 E.C.

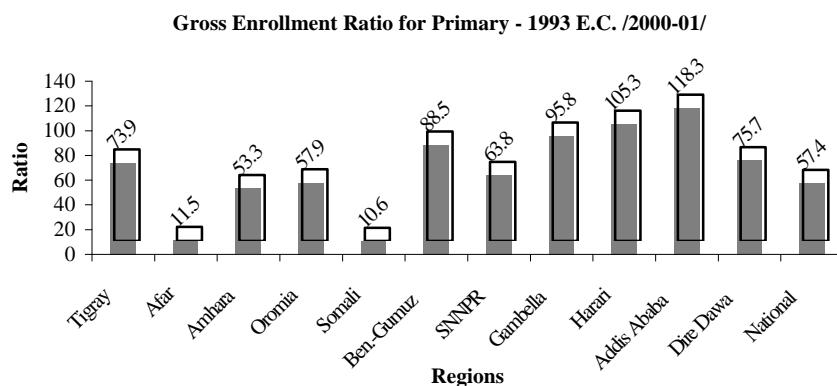

In 1993 E.C. only about 109,358 children in 964 kindergarten schools have been reported to have access out of the estimated total 5,490,418 children of the relevant age group. This figure is around 9.7 % higher than the previous year. However, the data at this level does not still cover 100% of the schools.

The above figure shows that the 1993 E.C. GER for this level, 2.0% is higher than the previous year (1.7%), but still around 98.0 % of the 4-6 aged children do not have access to pre primary education.

Addis Ababa has the highest GER, 35.7%, followed by Harari 12.0%, but we can also observe from the figure that Afar, Amhara, Oromya, Somali, Ben.-Gumuz, SNNPR and Gambella Regions have ratios less than the national average 2.0%.

Gross Enrollment ratio in primary (1-8): This is probably the most widely used indicator of access or participation in developing countries, though it is very difficult to secure exact data classified by age. It is the proportion of total enrollment in primary, irrespective of age, out of the corresponding school age population for primary.

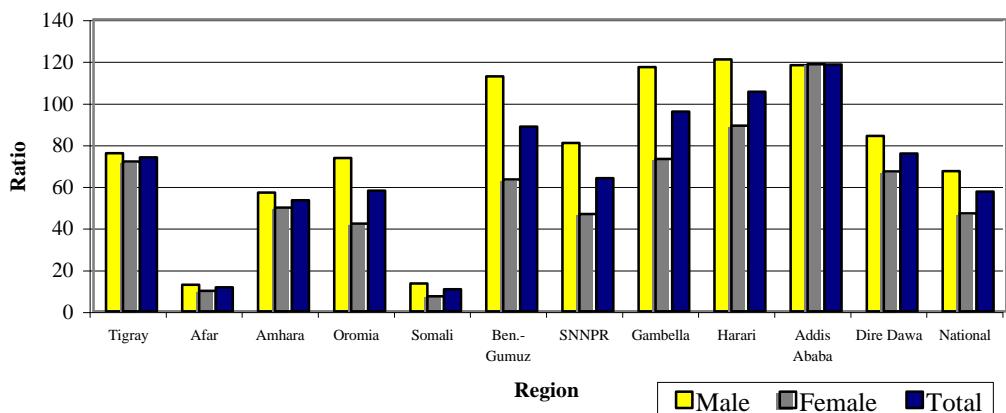

GER a crude measure of coverage, in most cases includes under or overage students, as a result it can be higher than 100%. Normally, the age of students in grades 1-8 has to be in the range of 7-14, that the starting age at grade 1 is seven.

In 1993 E.C. the primary school (grade 1-8) age population is estimated at 12,904,379, i.e., for the age group of seven to fourteen, of which 7,401,473 (57.4%) were enrolled in regular and evening programs of the primary education.

This year the primary GER at national level is 57.4%, and when we see by gender, it is 47% for girls and 67.3% for boys. It is higher by 6.3% and 6.4% for girls and boys respectively compared to the previous year.

Gross Primary Enrollment Ratio by sex 1993 E.C. /2000-01/

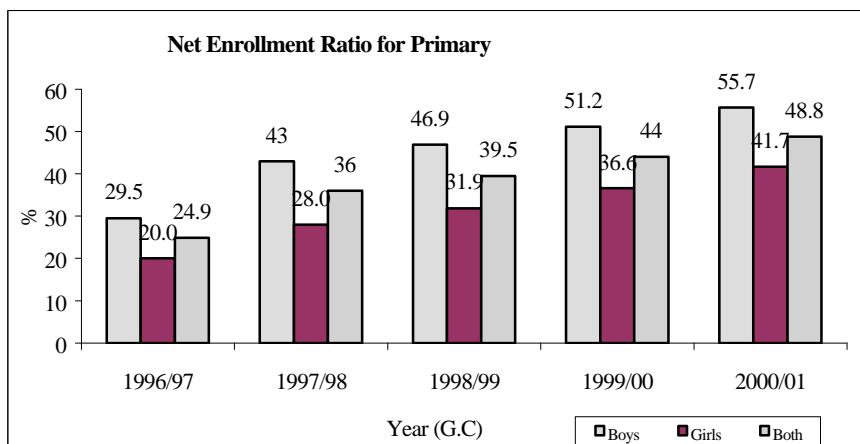

Compared to 1992 E.C., the national GER for primary (1-8) is also higher by 6.4% which out of this 1.0%(127,352) is contributed by the evening program. On the other hand the school age population at this level grows this year by 1.74% only. The trend shows success in access, which is an encouraging improvement with in a short period of time.

Regionally, Addis Ababa (118.3%) has the highest participation rate where as Afar region has the lowest (11.5%). When we see girls' participation, Addis Ababa scored the highest 118.5%, and the lowest Somali Region 7.2%.

Net enrollment ratio (NER) in primary

NER is the best way of measuring participation and is a more refined indicator of coverage in terms of explaining the proportion of pupils enrolled from a specific age group. However, unfortunately, due to various reasons it is very difficult to use this indicator seriously as the age specific data we get from schools is sometimes questionable. For example, the net enrollment ratio for primary is calculated as: number of pupils in the age range of 7-14 divided by the total population of children aged 7-14, and multiplied by 100. It is usually lower than the GER as it excludes over-aged and under-aged students, but use the same denominator as GER.

The NER for the year 2000/01 is estimated at 48.8%, for regular students, excluding the number of evening program students due to lack of data classified by age for this program. Otherwise, it is clear that the real figure is higher than the indicated. The five years data on primary net enrolment ratio shows an increasing trend as the GER does. By gender the NER is 41.7% for girls and 55.7% for boys.

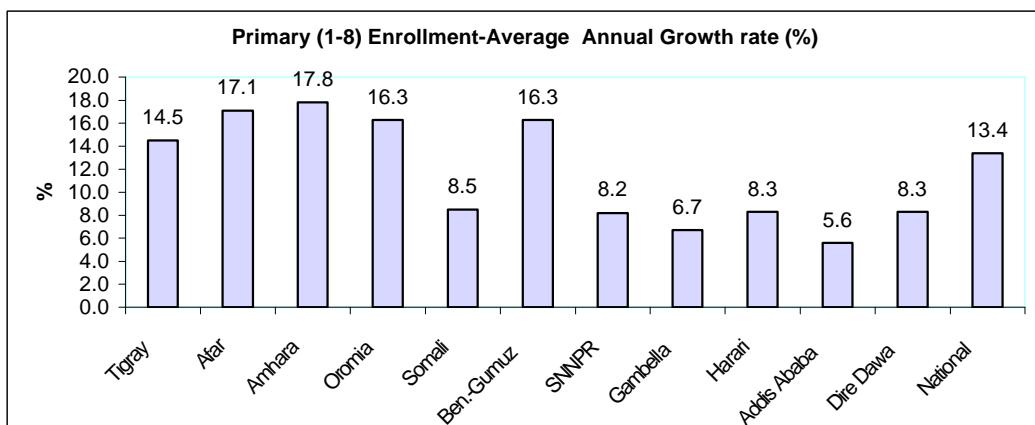

This year it is higher by 4.8% at national level compared to the last year. Both the GER and NER of Primary witnessed that access has improved through time.

Primary Enrollment -Average Annual Growth Rate

The average annual growth rate helps us to understand how coverage is progressing every year in each region and at national level. It estimates the annual rate of increase in enrollment. The rate in enrollment in the last five years is estimated by a similar formula used to calculate compound interest.

The graph below shows the average annual growth rate of enrollment in each region and at a national level. In the years 1989-1993 E.C., the highest annual growth rate is recorded in Amhara Region (17.8%), and lowest in Addis Ababa (5.6%). At a national level the average growth rate for the last five years is 13.4%.

Enrollment in Senior Secondary Schools

In 1993 E.C., 736,174 students were enrolled in senior secondary schools, which is higher by 28.76% compared to the previous year. Out of the total enrollment, 305,492 were girls, who account for 41.49% of the enrollment at the level. The evening program contributed 1.6% (86,953) of the students. It has increased annually at an average growth rate of 14.6% since 1989 E.C. Compared to the previous year alone, the 1993 E.C. figure for secondary has increased both in terms of enrollment and GER.

The GER for girls is 10.9% and 14.8% for boys. These raised the national GER for secondary to 12.9 %, which is higher by 2.6% compared to the year before.

Higher Education

Enrollment: Total enrollment in the higher education institutions in 1993 E.C. is recorded to be 87,431 in all programmes, Regular, Evening and Kiremt. This shows an increase of 29.17% in access compared to the year 1992 E.C. Out of this non-Government institutions have 15,201 students, which accounts for 17.39% of the total, which is higher by 4.98% compared to the year before. All the students reported under the non-government institutions are enrolled for diploma courses. That is, the non-government institution share of the diploma programs accounts for 29.48%. However, the data does not capture data on all of the non-government institutions accredited.

Program	Enrollment		% Program
	BS	F	
Diploma	51556	13394	58.97
Undergraduate Degree	34589	5216	39.56
Postgraduate Degree	1286	97	1.47
Total	87431	18707	

Please note that this figure does not also include teacher trainees who are attending diploma programs through distance education, who are about 27,000.

The table above has made clear that the biggest portion (58.97%) of the enrollment is in diploma programs followed by the undergraduate degree (39.56%) and postgraduate (1.47%).

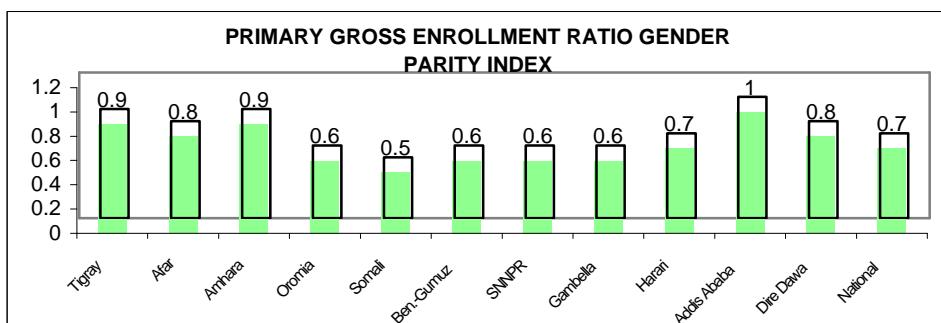

In all programs, there were 18,707 female students, which is 21.4% of the total enrollment in the higher education institutions. The number of female students has increased in absolute terms, but the share of enrollment at this level has decreased slightly compared to 1992 E.C. (that there were 14,647 female students, which accounted for 21.64%).

In general the statistics show that access to higher education is improving through time. This is due to the introduction of new Government and Non-Government higher education institutions and new departments within the existing ones. The data also confirms that the role of non-Government institutions is significant. However, the share of female students at this level is the lowest compared to the other levels.

Graduates: The total number of graduates in this year was 17,969 of which 3,854 (21.4%) were females, in all programs. From the Non-Government institutions 3,360 students have graduated, of which 1,223 (36.4%) were females. That is, within few years, the share and contributions of these Non-Government institutions in terms of graduates has reached 18.7%.

Equity

Gender Disparity in Primary: The direction of gender disparity in primary enrollment can be indicated using the Gender Parity Index (GPI), which is the ratio of female to male enrollment ratios. In a situation of perfect equality between boys and girls, the value of GPI is 1, and 0 with highest disparity.

The above graph illustrates the GPI at regional and national level. It can clearly be observed that in 1993 E.C. (2000/01), at national level the GPI is 0.7, which indicates that girls' participation is lower than boys. This is true for all regions except AddisAbaba, which has a GPI equals to 1, perfect equality. Somali has the largest disparity between male and female enrolment with GPI equals to 0.5 followed by Oromia, Gambella, Benishangul-Gumuz, and SNNPR, which has 0.6 each.

Urban-Rural Disparity:

A comparison of rural and urban enrollment indicates that 68.06% of primary enrollment (both regular and evening) accounted from rural areas, but when we see enrollment in senior secondary schools, rural enrollment accounts only for 2.19%. This can be an indicator that

how pupils in rural and urban areas stay in the system.

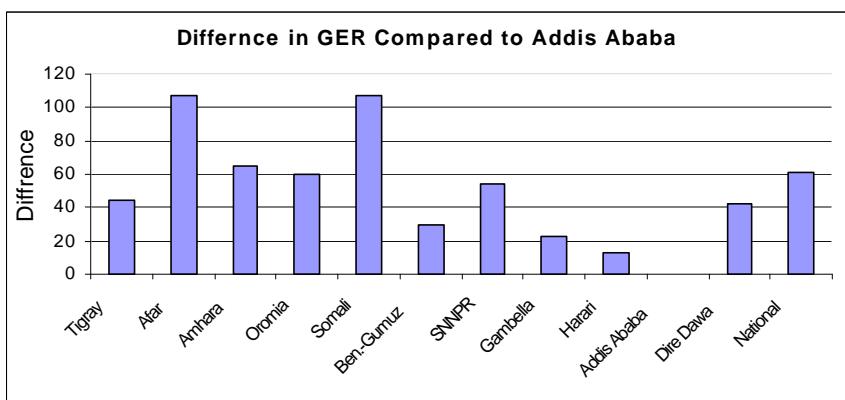

The proportion of girls enrolled in urban and rural areas can be observed from the following table.

Level	Urban Enrollment		Rural Enrollment	
	%Female	%Male	%Female	%Male
Primary	45.4	54.6	37.9	62.1
Secondary	41.6	58.4	36.9	64.1

Among those enrolled, the proportion of girls is lower than the proportion of boys by all comparisons, rural-urban and primary-secondary levels. This tells us that it requires much effort to make females beneficiary of the education system, who account for half of the population.

Regional Disparity

The figure below shows a comparison of primary GER taking Addis Ababa as a point of reference, assuming it has better educational facilities. Only Harari and Gambella Regions showed a difference of less than 25% in GER compared to Addis Ababa, while the rest have much difference in primary GER, which also tells us that the regional disparity in access is still high.

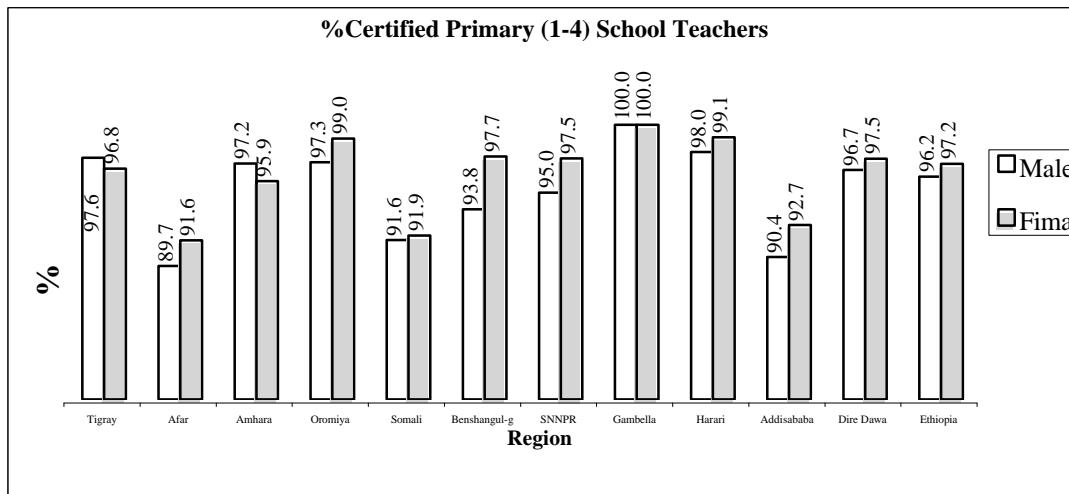

Quality

Percentage of certified primary school teachers

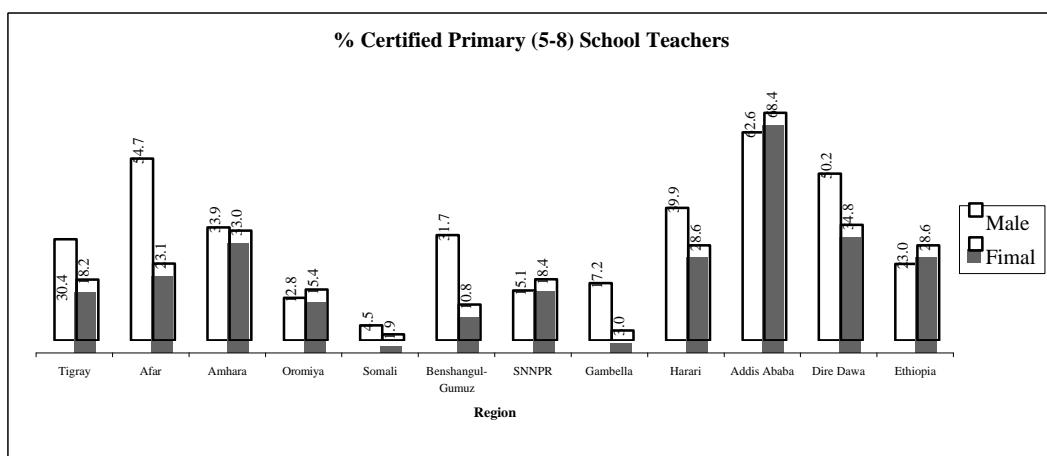

According to the national standards, the first cycle (1-4) primary education requires teachers with minimum qualification of Teacher Training Institutes (TTI) certificate and Teacher Training Collages' diploma for the second cycle (5-8).

The graph below shows the proportions of certified primary school teachers at regional and

national level for the two levels of primary education separately. At national level, in 1993 E.C 96.6 % of first cycle primary school (grades 1-4) teachers are certified, and in the second cycle (grade 5-8) 23.9% are certified.

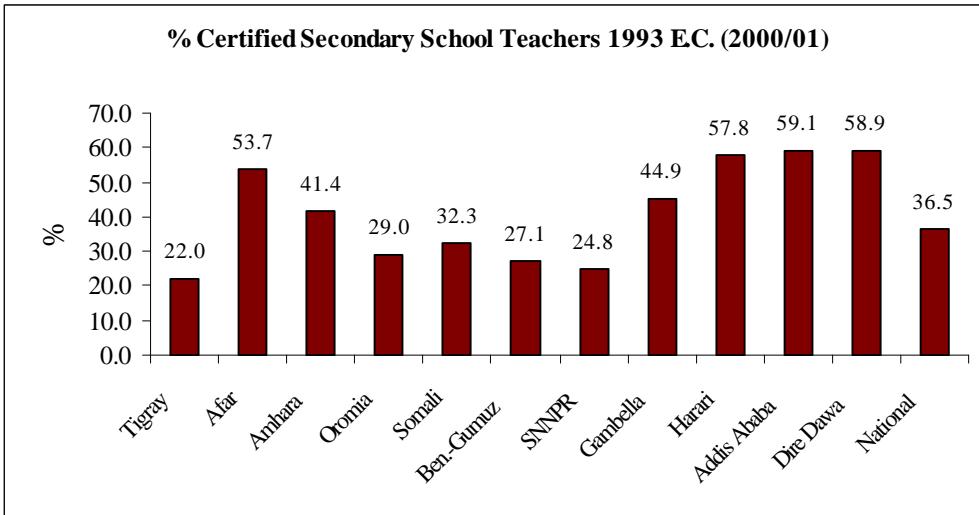

Currently about 27,000 primary school teachers are attending diploma program to upgrade their level of qualification through distance education.

Comparatively, the first cycle primary education has higher percentage of certified teachers for the level than the second cycle. The teachers currently studying through distance education are expected to improve the situation in the second cycle primary after completion of their study. At national level, in both primary cycles, the percentage of certified female teachers out of those females who are serving in the system is higher than males'.

Percentage of secondary school teachers who are certified: According to the Ethiopian education standard the minimum required qualification to teach at secondary level requires at least a first degree.

The proportion of certified secondary school teachers in 1993 E.C. varies from region to region, as Addis Ababa has the highest 59.1 % and Tigray has the lowest 22.0%.

At national level only 36.5% of the teachers who have been serving in the secondary schools in 1993 E.C. were certified for the level.

To improve the situation, currently 5,716 teachers with diploma are enrolled for kiremt undergraduate degree programs.

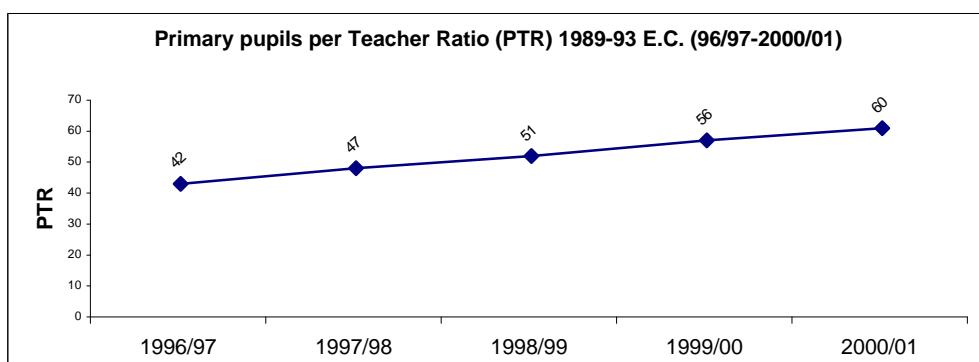

Efficiency

Pupil-Teacher Ratio (PTR): Pupil teacher ratio is one of the common education indicators on efficiency and quality. The lower the PTR the higher the opportunity of contact between teacher and pupils, check homework and class work. On the other hand, very low PTR may indicate inefficient or under utilization of teachers. Having low or high PTR alone may not help us much as the quality of education depends on the mode of delivery, commitment and capacity of the teacher in the class and other factors.

However, this indicator is very useful when there is a standard set in the context of the country.

Primary PTR in the last five years shows an increasing trend at national level, from 42 in 1989 E.C. (1996/97) to 60 in 1993 E.C. (2000/01). This is higher by 4 compared to the year before (the trend for the last five years is presented in the figure below).

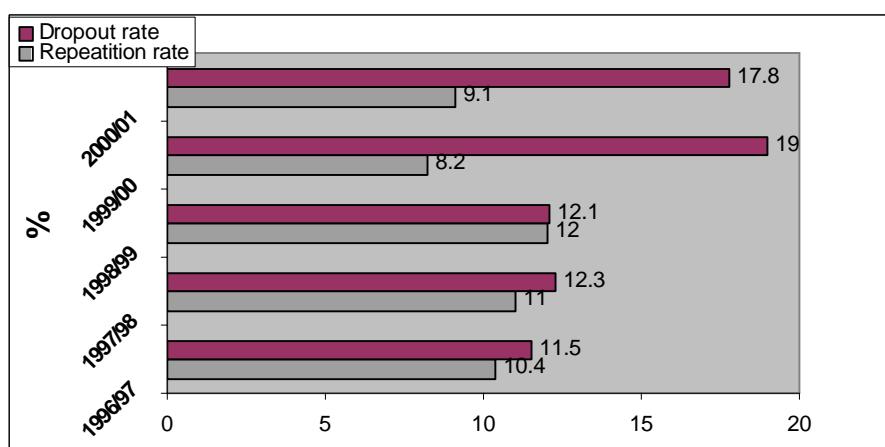

The PTR for regular secondary has reached 46 in 1993 E.C. (2000/01). Usually the national level indicators show the general direction, and may not show clear pictures, as it masks the

Variations at lower levels. PTR at school level shows a better image of the teaching learning process.

Pupil-Section Ratio (PSR): This ratio is one of the efficiency indicators, as lower ratio in comparison to the national standard means under utilization of resources. In 1993 E.C. this ratio is 70 for primary and 78 for secondary schools.

Efficiency Rates: These rates help us to understand how the education system works in terms of the use of available resource and time. A student has three paths in a particular academic year, i.e. Promotion, repetition or dropout. These rates are commonly used to measure the efficiency of the education system in producing graduates of a particular education cycle. Repeating a grade means utilizing more resource than allocated to a student, and leaving a school (dropout) before completing a particular cycle of education is also wastage of resources. In both cases, the meager resource allocated for education and time will be wasted or under utilized. Therefore, Repetition and Dropout rates are indicators of the

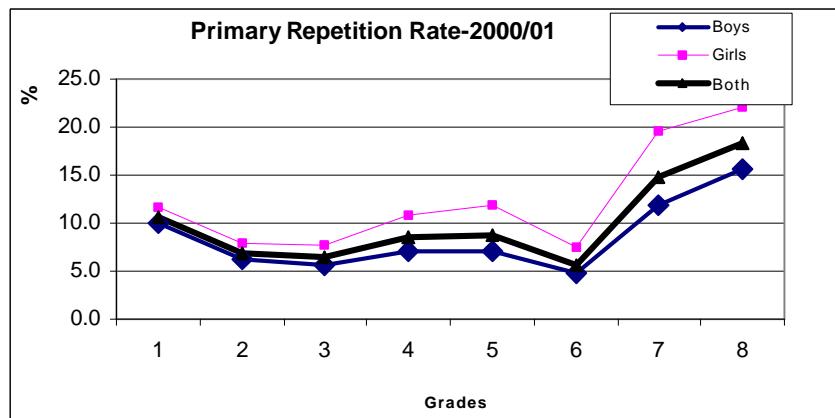

level of inefficiency of the education system.

We can observe from the above graph that compared to the previous years, the dropout rate has decreased, while the repetition rate has slightly increased. The figure also shows that 73.1% of the previous year students have promoted to the next grade and the remaining 17.8% have dropped out and 9.1% have repeated.

It is important to note that the data on dropout and repetition lags by one year, i.e. in the year 2000/01 publication those who have not promoted to the next grade at the end of the academic year 1999/2000 are reported.

Repetition Rates by Grade: This indicator measures the proportion of students who have remained in the same grade over one year, and have used more resource for that grade. Pupils use more resources allocated to school than those who pass to the next grade did.

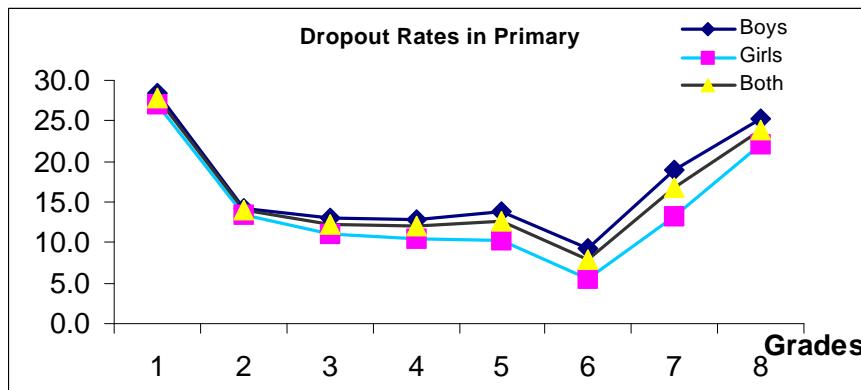

The resources are in the form of teacher salary, school materials, facilities etc. This reduces the internal efficiency of the system. The policy states automatic promotion at the first three grades of primary. But in practice repeaters in these grades are still reported.

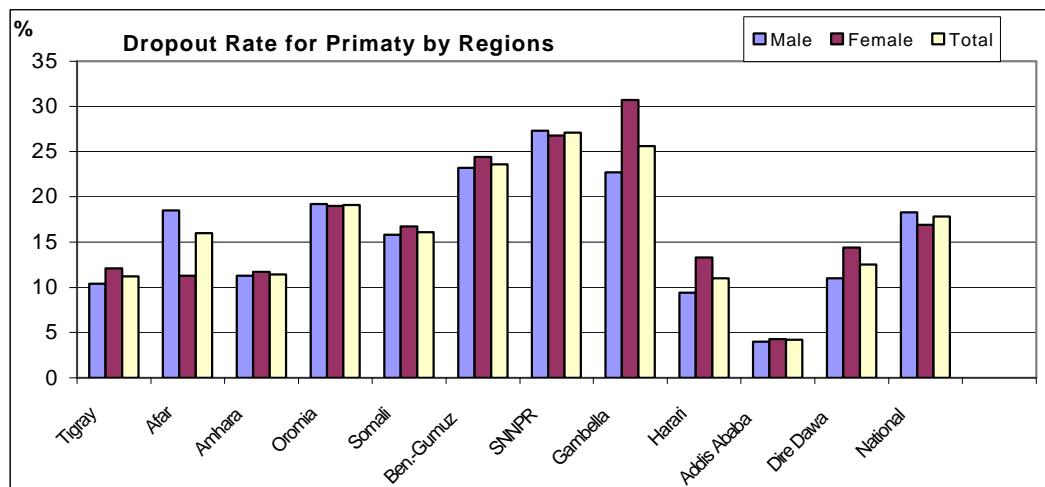

The above graph shows repetition rates by grades in primary, and the following facts can be observed from the graph.

- Girl's repetition rate in all grades is higher than boys. The repetition rate for girls, boys and both-combined show similar pattern. For all the lowest is at grade six and the highest at grade 8.
- The repetition rate for girls at grade 1 is 11.6%, which is higher compared to the previous year, which was 10.9%.
- The repetition rate for both sexes at grade one was 10.6%.

Dropout Rates by Grade: The proportion of pupils who leave the school varies from grade to grade. In most cases this figure is higher for grade one. At national level, 27.9% of pupils enrolled in grade 1, in 1992 E.C have left school before reaching grade two. The figure below shows that dropout is highest at grade 1 and lowest at grade 6. The average duration of study for dropouts (who do not complete their primary schooling), i.e. the average number of years they stayed in the education system before they dropout is 3.6 for boys, 3.8 for girls and 3.7 for both. Even though it is not significant, the figure tells us that girls stay more in the primary education than boys do.

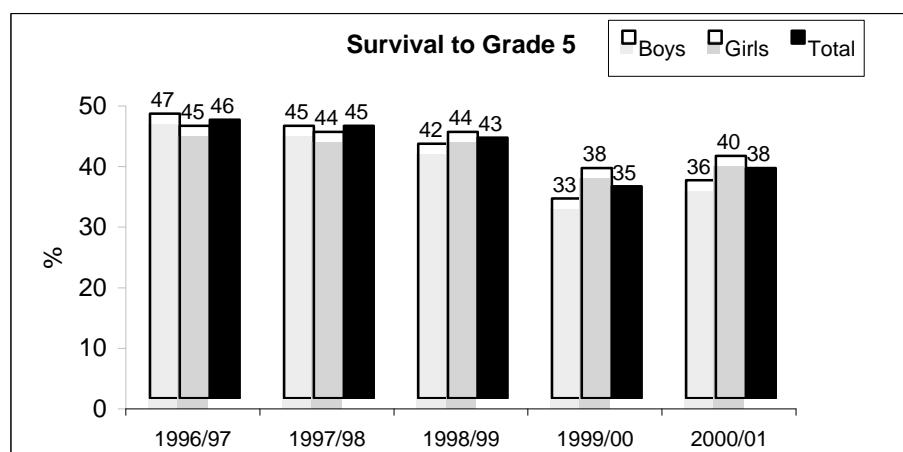

The figure above illustrates that in all grades the rate of dropout is lower for girls than for boys. This also tells us that the primary retention rate for girls is improving after grade six.

The above graph shows the dropout rate for primary in each region during the last academic year (1992 E.C.). Addis Ababa had the lowest dropout rates, where as SNNPR had the highest dropouts rate, 27.1%, in total, and Gambella the highest 30.7% in girls' dropout. The reasons for dropouts vary from region to region. To decrease these rates, it requires the effort of all concerned to encourage students to continue their education and complete at least primary education.

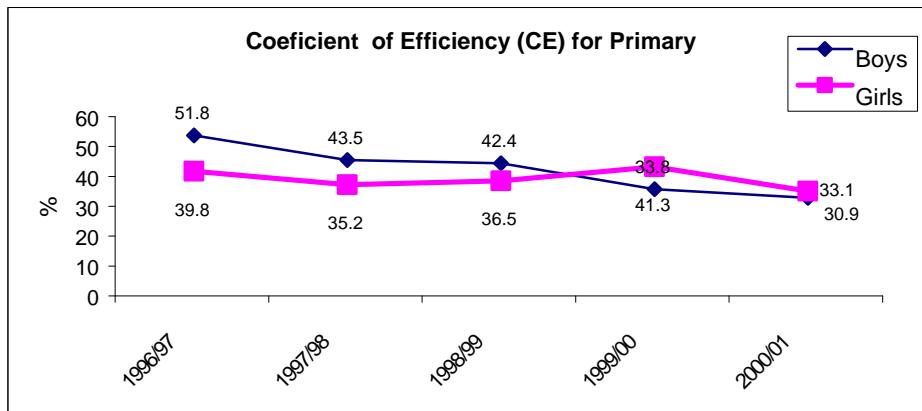

Survival Rate to Grade 5: Survival rate at this grade is used to estimate the percentage of students who will complete the first cycle of primary education, since the completion of at least 4 years of schooling is commonly considered a pre-requisite for a sustainable level of literacy. Survival rate approaching 100% indicates a high level of retention and low incidence of dropout. The reliability of this indicator depends on the consistency of data on enrolment and repeaters both in terms of coverage over time and across grades as it is calculated based on these figures. We use Cohort Analysis to calculate this rate, by assuming a group of pupils who are enrolled in grade 1 at the same time and no other students joining the group or transfer within 10 years, as completing primary education requires minimum 8 years and maximum 10 years.

The cohort flow model constructed for the last five years, as indicated in the above graph, showed that survival rate to grade 5 is decreasing from year to year until 1998/99. In other words, the chance of pupils to continue in the second cycle of primary is decreasing through time until 1998/99, but in 1999/00 it showed improvement. Since 1997/98 the survival rate to grade 5 for girls is better compared to boys.

Coefficient of Efficiency (CE): This efficiency indicator is calculated based on the result of the cohort analysis. It mainly depends on graduates (outputs) and the time required to produce. It is based on the definition that one school year spent in a grade by a pupil is counted as one pupil-year. The coefficient of efficiency is the ratio of the ideal (optimal) number of pupil-years required (with no repetition nor dropout) to produce a number of graduates from a given school cohort in primary education expressed as a percentage of the

actual number of pupil-years spent to produce the same number of graduates. It is the reciprocal of the input-output ratio. It is used as an alternative indicator of internal efficiency. It measures the impact of dropout and repetition combined in relation to graduates from the primary education. The maximum value of CE is 100, which indicates highly efficient system and low CE tells that the system is inefficient.

The estimated Coefficient of Efficiency for 1992 E.C. shows that it was only 31.8%. This figure was 33.1% for girls and 30.9% for boys. It is better for girls compared to boys. As it could be seen from the graph above, the efficiency of the system of primary education for girls was improving through time until 1998/99 and lowers in 1999/00, while for boys it shows a tendency of decreasing. The pattern seems to warn us that educators, planners, decision makers and all concerned have to pay attention to investigate the causes so that timely corrective measures can be done.

School Facilities

School facilities have impact on accesses, quality, efficiency and equity. The school facilities are tools to attract students in general and girls in particular.

The availability of shift system, water, latrines, clinic, libraries, laboratories and pedagogical centers in schools in 1993 E.C. is presented in the following table. Significant numbers of schools haven't reported on the availability of the mentioned facilities. This table shows only for those schools that have reported on the issue.

Level	Shift System		Water		Latrines		Clinic		Library		Pedagogical Center		No. of Laboratories
	No	yes	Yes	No	Yes	No	Yes	No	Yes	No	Yes	No	
1-4	3535	1064	1859	2517	2845	1320	46	3967	846	3378	2557	1719	-
1-8	3336	3599	3339	3426	5383	1143	173	6181	2775	3823	5841	995	-
9-12	68	231	240	55	279	7	39	231	280	13	249	44	525
1-12	61	60	86	31	115	4	23	93	108	10	98	19	138
Total	7000	4954	5524	6029	8622	2474	281	10472	4009	7224	8745	2777	663

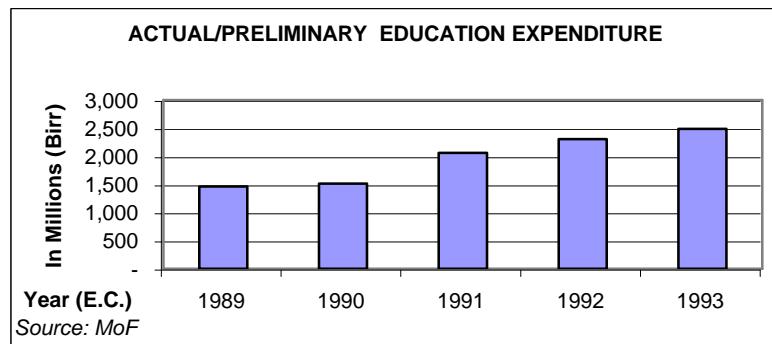

- **Shift system:** In 1993 E.C. 40.09% of primary and 68.6% secondary schools have reported to use shift systems (primary schools in 1-12 are also considered).
- **Water:** About 45.3% (5524) of all schools have reported to have water facilities.
- **Latrines:** Only 70.64% (8622) of all schools reported to have latrines.
- **Clinics:** Of all schools, only 2.3% (281) of them reported to have clinics serving students.
- **Pedagogical Center:** all levels combined, 71.7% of the schools reported to have pedagogical centers.
- **Libraries:** of all schools, 32.8% (4009) have library facilities.
- **Laboratories:** The availability of 663 laboratory facilities in the senior secondary schools is reported. This figure is higher compared to the number of secondary schools (424); this is because some schools have two or more laboratories.

Significant proportions of the schools have not reported at all about facilities. Regardless of their quality, it can be concluded from the figures that the facilities available in the schools are not sufficient to conduct the teaching learning process.

Education Budget and Expenditure:

The Government of the Federal Democratic Republic of Ethiopia has devoted to the provision of better education that can address the needs of the society. This is witnessed by the budget allocation to the sector with a sharp increase from year to year. The 1993 E.C. budget for education was Birr 2.485 billion, which accounts for 13.75% of the national budget.

The amount of budget allocated to the sector is one of the most useful indicators of development. The education statistics has showed that the education budget has increased though time. It was 1.497 billion Birr in 1989 E.C. (1996/97), which by 1993 E.C. (2000/01) the budget was raised to 2.485 billion Birr, a remarkable increase with in five years. In the same year the share of primary education out of the total education budget amounts to 50.12%.

The above graph clearly shows the trend of the education budget in the last five years. The data for 1989-91 E.C is preliminary actual expenditure where as 1992-93 E.C. it reflects the budget.

The Education Sector Development Program (ESDP)

The Education Sector Development Program is the first five-year program of the twenty years long-term plan to achieve Universal Primary Education by the year 2015.

Over the five years period (1997/98-2001/2002), the ESDP is designed to focus on Access, Quality, Efficiency and Equity in education. It also gives priority for the expansion of primary education with special attention to girls, rural and undeserved areas.

More specifically, ESDP is based on the following objectives.

- Expand access by raising primary enrolment from 3.1 to 7 million and achieve an average gross enrolment ratio of 50% for primary education;
- Improve the quality of education by extending the new curriculum to all levels of the system, increasing the number of certified primary teachers from 85% to 95% and lower the textbook ratio at the primary level from 5:1 to 1:1 in core subjects;
- Increase efficiency by more effective utilization of teachers with an average 50:1 (pupil/teacher ratio) and raising from 49.6% to 80%, the system coefficient reflecting a reduction of the number of dropouts and repeaters’;
- Improving equity by achieving a gross enrolment ratio for primary education at least 25% in undeserved regions; raise the female participation share in primary school from 36.8% to 45%;
- Increase financing for education by raising public expenditure on education to 4.6% of

GDP; achieve a target of 5% new school construction owned by non-government institutions, and introduce cost sharing at the tertiary level.

Comparison with Key Performance indicators of the ESDP

<i>S. No.</i>	<i>Suggested Indicators</i>	<i>Base-Year 1995/96</i>	<i>Status of 2000/01</i>	<i>2001/02 Target</i>
1	Budgetary and Expenditure Indicators <ul style="list-style-type: none"> • Education's Share of the total budget (current FY) • Primary education share of the total education budget 	13.7% 46.2%	13.75% 50.12	19.0% 65%
2	Access Indicators <ul style="list-style-type: none"> • Total number of primary schools • Total primary (grade 1-8) enrollments ('000) 	9,670 3,788	11,780 7,401	12,595 7,000
3	Quality Indicators <ul style="list-style-type: none"> • Share of lower primary (grades 1-4) teachers who are qualified • Total number of upper primary (grades 5-8) teachers • Number of qualified upper primary teachers • Total number of Secondary teachers • Number of qualified Secondary teachers • Number of core primary textbooks in school • Grade 8 examination pass rate • Grade 4 sample assessment of learning achievements 	85% 27,381 5,729 12,143 4,910 2,273,000 61.7% n.y.a.	96.6% 43,526 10,400 14,029 5,127 20,160,150 ^a n.y.a. n.y.a.	95% 36,777 20,000 17,463 10,760 51,000,000 80.0% n.y.a.
4	Efficiency indicators <ul style="list-style-type: none"> • Primary school student: section ratio • Secondary school student: section ratio • Grade 1 dropout rate • Total primary school dropout • Average grade 4 to 8 repetition rate* • Average grade 4 to 8 repetition rate for girls* • Coefficient of primary school efficiency 	52 63 28.5% 8.4% 12.8% 16.2% 60%	70 78 27.9% 17.8% 10.3% 13.4% 31.8%	50 50 14.2% 4.2% 6.4% 8.1% 80.0%
5	Equity Indicators <ul style="list-style-type: none"> • Gross primary enrollment ratio in the two most under-served areas • Share of girls in primary school enrollment (grades 1-6) 	16.2% 38.0%	10.8% 40.6%	25.0% 45.0%

Note: under *Status of 2000/01* column data related to repetition and dropout indicate for the end of 1992 E.C.

* Calculated using geometric mean.

n.y.a.: not yet available

^a: does not include data from Somali region

As over 85% of these indicators are planned to be verified by the educational statistics to be produced by EMIS, for comparison, the available information for 1993 E.C. (2000/01) is indicated under “*Status of 2000/01*” column of the table. It can easily be observed how far the ESDP has gone to reach at its targets.

Pupil-Years Per Grade

Input/Output Ratio

Coefficient of Efficiency

Pupil-Year wasted = 3230

(PYW = TPY - (8 x output))

**Internal Efficiency in primary grades 1-8
Government and Non Government Primary schools 1992 E.C. (1999/2000)**

A. PUPIL-YEARS PER GRADE

	1	2	3	4	5	6	7	8
Boys	1109	728	612	535	458	380	366	292
Girls	1129	751	638	577	508	424	441	358
Total	1118	737	622	551	476	396	393	317

B. INDICATORS OF RETENTION BY GRADE

1. Survival by grade

	1	2	3	4	5	6	7	8
Boys	683	579	498	428	363	326	253	173
Girls	692	590	518	454	396	369	296	200
Total	687	583	506	438	375	342	269	183

2. Dropouts by grade

	1	2	3	4	5	6	7	8
Boys	317	105	80	71	65	37	73	80
Girls	308	102	72	65	58	27	72	97
Total	313	104	77	69	63	33	73	86

3. Number of graduates from the final year

Boys	Girls	Total
173	200	183

C. INDICATORS OF RETENTION BY YEARS SPENT IN THE CYCLE

1. Enrolment by years of study

Year	Boys	Girls	Total
1992	1000	1000	1000
1993	715	729	721
1994	599	616	606
1995	518	541	527
1996	450	482	462
1997	388	430	404
1998	345	393	362
1999	289	348	310
2000	137	211	164
2001	40	79	54

**Internal Efficiency in primary grades 1-8
Government and Non Government Primary schools 1992 E.C. (1999/2000)**

2. Dropouts by years of study

Year	Boys	Girls	Total
1993	285	271	279
1994	116	113	115
1995	81	74	79
1996	68	60	65
1997	62	52	58
1998	44	37	41
1999	56	45	52
2000	63	58	61
2001	36	54	43
2002	16	35	23
Total	827	800	817

3. Graduates by years of study

Year	Boys	Girls	Total
2000	89	78	84
2001	61	78	68
2002	24	44	31

D. INDICATORS OF DURATION OF STUDY

1. Average duration of study for graduates

Boys	Girls	Total
8.6	8.8	8.7

2. Average duration of study for dropouts

Boys	Girls	Total
3.6	3.8	3.7

3. Average duration of study for the cohort

Boys	Girls	Total
4.5	4.8	4.6

Internal Efficiency in primary grades 1-8
Government and Non Government Primary schools 1992 E.C. (1999/2000)

E. INDICATORS OF WASTAGE IN EDUCATION

1. Input/output ratio

Boys	Girls	Total
3.2	3.0	3.1

Coefficient of Efficiency

Boys	Girls	Total
30.9	33.1	31.8

2. Proportion of total wastage spent on repetition and dropout(%)

	Boys	Girls	Total
Wastage due to dropouts	88.7	84.1	87.0
Wastage due to repetition	11.3	15.9	13.0

3. Proportion of total wastage spent on graduates(%)

	Boys	Girls	Total
Wastage due to graduates repeating grades	5.6	6.2	5.8
Wastage due to dropouts	94.4	93.8	94.2

F. BRIEF SUMMARY

	Boys	Girls	Total
Total Pupil-Years	4480	4828	4610
Output	173	200	183
Pupil-years per graduates	25.9	24.2	25.2
Pupil-years wasted	3096	3230	3145
Input-output ratio	3.2	3.0	3.1
Coefficient of Efficiency	30.9	33.1	31.8

STATISTICS ON HIGHER EDUCATION

Introduction

This part presents data on higher education in Ethiopia for the 2000/01 (1993E.C.) academic year.

Definition of General Concepts

Department

The smallest academic administrative unit of an institution or a faculty or a college offering major training programs or well-defined services to other departments. The FRESHMAN PROGRAM is an example of a service unit, as it exists today like in the faculty of science of Addis Ababa University.

Program

A selection of one or more courses (planned series of learning experiences) or a combination of courses, usually chosen from a syllabus with an expressed or implied aim.

Regular Program

Describes programs offered during the daytime to full-time students of institutions of higher education.

Continuing Education Programs

Describes programs offered in evening (extension) classes and programs offered during the Ethiopian Summer.

Level of Program

This is a classification of programs representing a step in educational progression.

Diploma Program

An educational program offered by institutions of higher education for duration of two to three years after completing grade 12 successfully. Completion of this program is certified by awarding a diploma.

Undergraduate Degree Program

This is a third-level educational program which is offered for duration of four to five years after completing high school. Completion of this program is certified by awarding a Bachelor's Degree. The degree of Doctor of Medicine (MD) and the Degree of Veterinary Medicine (DVM) are also Undergraduate Degrees, which are given after a training period of 6 years, the last one being a period of internship or externship.

Postgraduate Program

This is a training, or specialization program offered under the schools of graduate studies of Addis Ababa University and Alemaya University of Agriculture to students who already have their first degree. Completion of this Program is certified by awarding either a Masters Degree, Certificate in Medicine, and Ph.D. degree in very few institutions.

Time Reference

All data represent figures on higher education for first semester of the 2000/01 (1993E.C.) Academic Year. All data for the first semester of 2000/01 academic year were collected from the beginning of the first semester up to the end of the same semester.

Academic Year

The Academic Year for all Ethiopian Institutions of Higher Education commences about the end of September and ends about July of the next Year.

STUDENT ENROLLMENT

Definition of Concepts

The information on students enrollment consistsutes new admissions, readmissions and students continuing from the previous semester.

Student Enrollment

Total number of students registered in a given semester.

Year of Study

This refers to the freshman year, the sophomore year, the junior year and the senior year in a four-year college programme. In Medical and Engineering departments, a year also exists. A sixth-year in medicine, is a period of internship.

Freshman Programme

A preparatory programme designed for freshman students to prepare them for admission into specific programmes of study.

**Students Enrolled in Regular Diploma Programmes by Institution, Department,
Year of Study and Sex**

GRADUATER

Definition of Concepts

Graduated Students

These are students whose graduation has been approved by a University Senate or an equivalent organ of a given institution (e.g. Academic Commission) during the period starting from the beginning of the first semester of a specified academic year to the first day of the first semester of the next academic year.

**Graduates from Regular Diploma, Undergraduate Degree and Postgraduate Degree
by Institution, Department and Sex
2000/01 (1993 E.C.) Academic Year**

FULL-TIME ACADEMIC TEACHING STAFF

Definition of Concepts

Academic Teaching Staff

Employees of institutions of higher education engaged in lecturing at third-level institutions. Graduate assistants are also regarded as academic teaching staff.

Full-time Academic Teaching Staff

These include regular employees of institutions of higher education engaged full-time in teaching, including Deans, Directors, Assistant Deans, Department Heads and Graduate Assistants who have an academic unit and therefore, have some academic rank as home-base. In addition, lectures following graduate programmes are included as full-time teaching staff under the academic institution they served on part-time basis.

Level of Education

This indicates either the highest grade completed or the highest certificate or diploma held by an employee.

Academic Rank

A distinct academic position bestowed on lecturers in institution of higher education based on their years of service and achievements while in service, and level of education.

Expatriate Teaching Staff

These are lecturers who are foreign nationals.

Full time Ethiopian Teaching Staff by Institution,
Department, Academic Level and Sex
2000/01 (1993 E.C.) Academic Year First Semester

ADMINISTRATIVE AND GENERAL SERVICE STAFF

Definition of concepts

Administrative and General Service Staff

These are employees engaged in services that involve water supply, telephone, electricity, finance, administration, transport, publication, custody, health, students' cafeteria, maintenance, bookstore, archives, and so on. They are either full-time or part-time employees who do not participate directly in teaching or research and therefore, do not have academic rank.

ETHIOPIAN SCHOLARSHIP STUDENTS

Definition of concepts

Ethiopian Students Sent Abroad Through government Scholarship

These are Ethiopian students sent abroad for higher studies after fulfilling the criteria set up by the Ministry of Education. This section does not include students sent for higher education to foreign countries through special agreements between the scholarship granting countries of agencies and other government organizations of individuals.

Graduate Returnees from Studies Abroad

These are Ethiopian students who have satisfactorily completed their designated programmes abroad and presented their awarded diploma to be registered by scholarship office of the Ministry of Education. These students might have obtained their scholarship through government or private means.

Country of study

This is the country where the students have been sent to study through the Ministry of Education.

Academic Qualification

This is the level of education the student has achieved or is expected to achieve upon completion of his studies. It is usually designated by the type of diploma or degree earned at the end of the study period.
