INTRODUCTION

Educational statistics data plays an important role in providing relevant and reliable statistical information for making rational decision; further planning and programming, evaluating and monitoring, reviewing of policies and strategies of the education system. To this end, the Ministry of education collects data on basic variables from all levels of education based on standard questionnaires designed for Pre-primary (KG), Non Formal Adult Basic Education, Alternative Basic Education, Primary and Secondary Education, TVET and Higher education. The statistical data collected through these instruments are compiled and published in Education statistics Annual Abstract.

The publication contains both descriptive and analytical summary on enrolment, teachers profile, schools, etc. The data are further disaggregated by level of education, sex, region and location in order to see regional, urban/rural and gender disparities.

Education Statistics Annual Abstract can also be used as source of information for the various stakeholders in the education sector, especially for the purposes of research, decision making, planning, and policy formulation both at regional and national levels.

The education data that are presented in this publication are by no means considered exhaustive. It is believed that further inclusion and refinement have to be made continuously. To this effect, the Federal Ministry of Education is working on the improvement of the quality and coverage of the education statistics and there will be a continuous effort to provide better and timely information.

We used the 1997 E.C. (2004/05) data in cases where the recent data were not available, or when taught there will be no significant changes within a year.

Educational Indicators

Educational indicators play an important role in providing a clear picture of the performance of the education system. Since indicators are used by policy makers, planners, and other stakeholders for different decision-making purposes, it is very important to have them timely. However, it should be noted that a single indicator may not be sufficient to give a full picture of a certain phenomenon. As a result, the use of two or more indicators in combination may maximize the power of the indicators to explain a given situation.

As in the past, indicators and detailed analysis of indicators that are assumed to be most important for the majority of the stakeholders in education are presented in this publication. The main sources of data for the preparation of these indicators are the statistics in this Abstract and population projection of the Central Statistical Authority (CSA).

The CSA's national and regional population projections by five years age group at five years interval are disaggregated using the Beers Coefficient in order to arrive at a single age population for each year and thereby to estimate the school age population at national and regional levels. The total projected population of Ethiopia for the year 1998 E.C. (2005/06) was 73,043,468 (49.89% females and 50.11% males). The participation of pupils in the Ethiopian Education System was analyzed based on the projected population as follows.

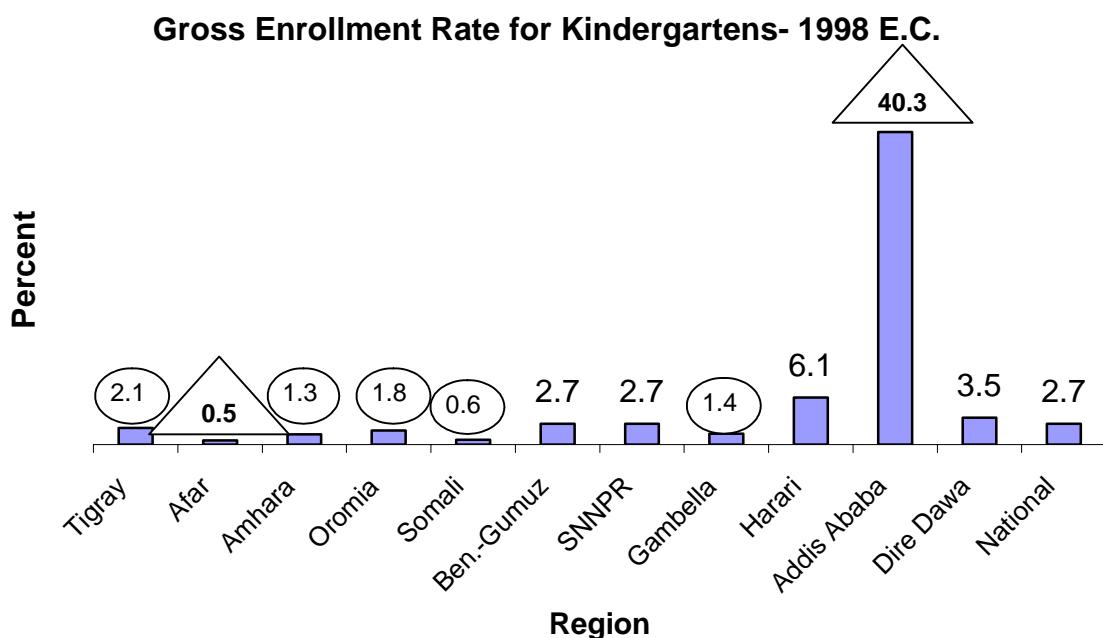

A) Access

Enrollment in Kindergartens

This level normally includes children of ages 4-6 enrolled in the pre-primary education. Non-governmental organizations, communities, private institutions, faith-based organizations, etc run kindergartens. Though the government is involved only in developing curriculum, training teachers and providing supervisory support, the number of these institutions is increasing every year, particularly in urban areas.

Gross Enrollment Rate at Kindergarten

This is defined as the percentage of total number of children in kindergarten, irrespective of age, out of total population of the 4-6 age groups in the country or in a given region.

In 1998 E.C. (2005/06) out of the estimated 6,959,935 children of the appropriate age group (Age 4-6) only about 186,728 children have been reported to have access to pre-primary education in 1,794 kindergartens all over the country. Though the enrollment is very insignificant when compared to the appropriate age group, this figure is higher than the previous years by about 21.8%. Moreover, since the data at this level does not cover all schools (data from some NGO schools are not captured) total enrollment could be a little higher than the figure indicated above. The GER for kindergarten in 1998 E.C. (2005/06) is 2.7% which a little higher than the previous year's 2.3%.

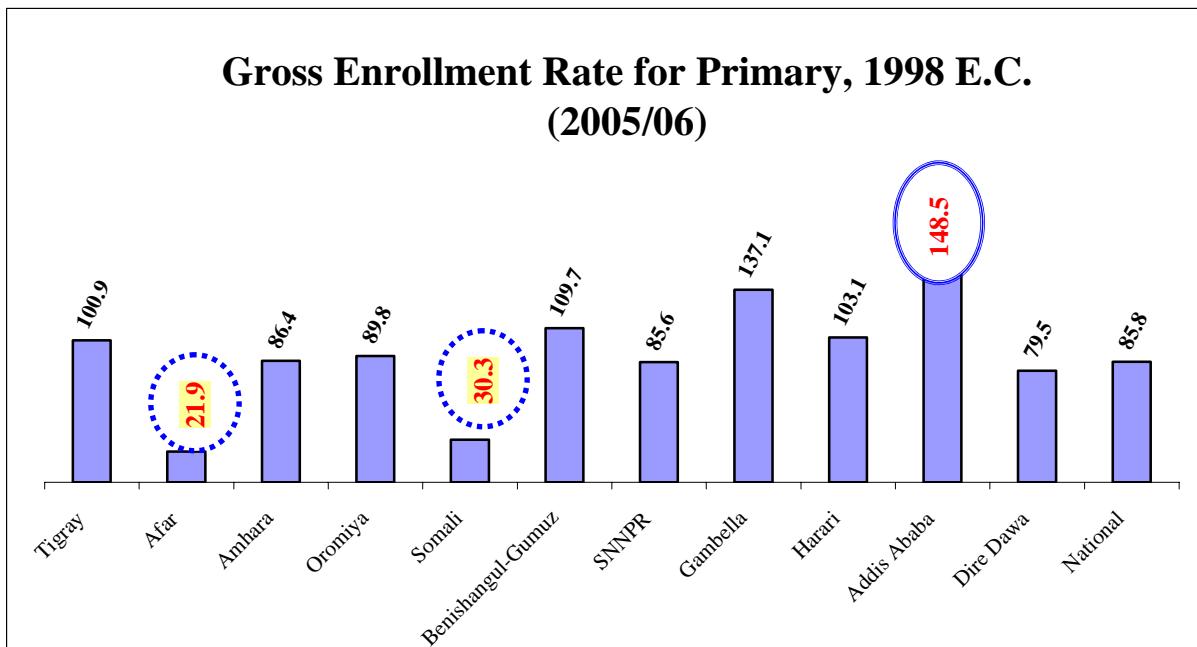

Addis Ababa 40.3% and Afar 0.5% have the highest and the lowest GER for this level of education respectively. All the other regions except Harari, Dire Dawa, Benishangul-Gumuz and SNNPR have GER less than the National average (2.7%). This shows not only that there is regional disparity in access to this level of education, but we have a long way to go to reach this age group as a nation.

Enrollment in Primary Schools

Gross Enrollment Rate (GER) at Primary (1-8) Level

It is the percentage of total enrollment in primary schools, irrespective of age, out of the corresponding primary school age population, ages 7-14.

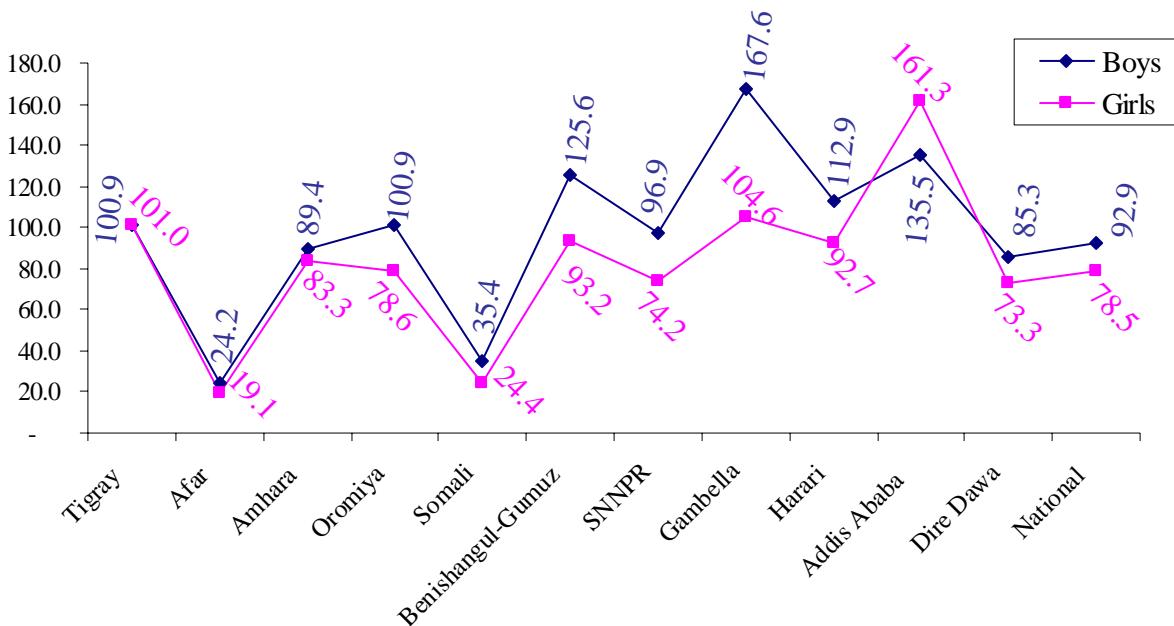

GER is a crude measure of coverage. Usually, since it includes under-aged and over-aged pupils it can be higher than 100%. Normally, the age of students in grades 1-8 have to be in the range of 7-14 and the starting age at Grade 1 is seven.

In 1998 E.C. /2005-06/, although the primary school (grades 1-8) age population was estimated 14,753,159 the total enrollment both in the regular and evening programs was 12,657,342 excluding the Alternative Basic Education (ABE) enrollment. As a result, the primary GER at national level has become 85.8%, where disaggregated by gender, it is 78.5% for girls and 92.9% for boys. The 1998 (2005/06) figures show an increase of 6.0 percentage points for both sexes, and 7.0 and 4.9 percentage points for girls and boys respectively compared to that of the 1997 (2004/05).

The enrollment for ABE was 817,332 for both sexes and 426,036 and 391,296 for boys and girls respectively. As a result, the ABE GER at national level becomes 5.5% for both sexes and 5.7% for boys and 5.4% for girls. If we include ABE to 1998 E.C. the Gross enrollment rate for primary increases to 91.3%, (98.6% for boys and 83.9% for girls).

Gross Enrollment Rate by Region and Sex 1998 E.C. (2005/06)

Regional comparison shows that Addis Ababa (148.5%) has the highest participation rate while Afar and Somali Regions have the lowest (21.9%) and (30.3%) respectively. In terms of girls' participation (GER), Addis Ababa achieved the highest (161.3%), Somale (24.4%) and Afar (19.1%) have the lowest. This shows that we have still much more to do to bring the enrollment rate in these two emerging regions to the same level with other regions.

Table 1.1 - Trends of GER at Primary Level

| Year | Primary 1 st Cycle (1-4) | | | Primary 2 nd Cycle (5-8) | | | Primary (1-8) | | |

As shown in Table 1.1 the GER of primary 1st Cycle (Grades 1-4) has increased by 32.7 percentage points while the 2nd Cycle (Grades 5-8) has increased by 22.3 percentage points in the last five years (2001/02-2005/06). The GER for boys has increased by 27.7 percentage points in the 1st Cycle (Grades 1-4) and 22.0 percentage points in the 2nd Cycle (Grades 5-8) during the same period. It has increased for girls by 37.9 percentage points in the 1st Cycle (Grades 1-4) and 22.4 percentage points in the 2nd Cycle (Grades 5-8). This shows that the increase shown is in favor of girls in both Cycles. Overall, the GER for primary (1-8) has increased by 26.9 percentage points for boys, 32.7 percentage points for girls and 29.7 percentage points for both sexes.

¹ Note: BS = Both Sexes (Male and Female)

² Includes ABE GER

The 14.3 percentage points gender gap in favor of boys at 1st Cycle (Grades 1-4) in 2004/05 was lowered to 12.7 percentage points in 2005/06. Similarly, the 19.4 percentage points in 2004/05 for the 2nd Cycle (Grades 5-8) was lowered to 17.6 percentage points in 2005/06 in favor of boys. The Gender gap which was 16.5 in 2004/05 for primary (1-8) was also reduced to 14.7 in 2005/06 in favor of boys

Apparent intake rate (AIR)

It is the percentage of new entrants (irrespective of age) in Grade 1 out of the total number of children at an official admission age (age 7 in the Ethiopian case) in a given year. The total apparent intake rate for the year 1998 E.C. (2005/06) is 125.9%, which is 132.5% for male and 119.2% for females. The AIR for the last five years has increased by a total of 28.5 percentage points for boys and by 35.6 percentage points for girls. Overall it has increased by 31.9 percentage points in the period under consideration.³

The gender gap has narrowed in favor of girls from 20.4 percentage points in 2001/02 to 13.3 in 2005/06.

Table 1.2 - The Trend of Apparent Intake Rate

| Year | Boys | Girls | BS |
|-------------|-------------|--------------|-----------|
| 2001/02 | 104.0 | 83.6 | 94.0 |
| 2002/03 | 100.0 | 81.4 | 90.8 |
| 2003/04 | 116.0 | 102.6 | 109.4 |
| 2004/05 | 154.7 | 142.8 | 148.7 |
| 2005/06 | 132.5 | 119.2 | 125.9 |

Net Enrollment Rate (NER) at Primary (1-8) Level

NER is the best way of measuring participation and is a more refined indicator of coverage in terms of explaining the proportion of pupils enrolled from a specific age group. NER is usually lower than the GER since it excludes over-aged and under-aged pupils while using the same denominator as the GER.

The NER for the year 1998 E.C. /2005-06/ is 81.7% for boys, 73.2% for girls and 77.5% for both. The five years data on primary net enrolment rate shows an increasing trend for both boys and girls. The 13.8 percentage points gender gap in 2001/02 become 8.5 percentage points in 1998 E.C. (2005/06).⁴

³ Only for Regular Enrollment

⁴ 1998 E.C. Net Enrollment Ratio includes ABE

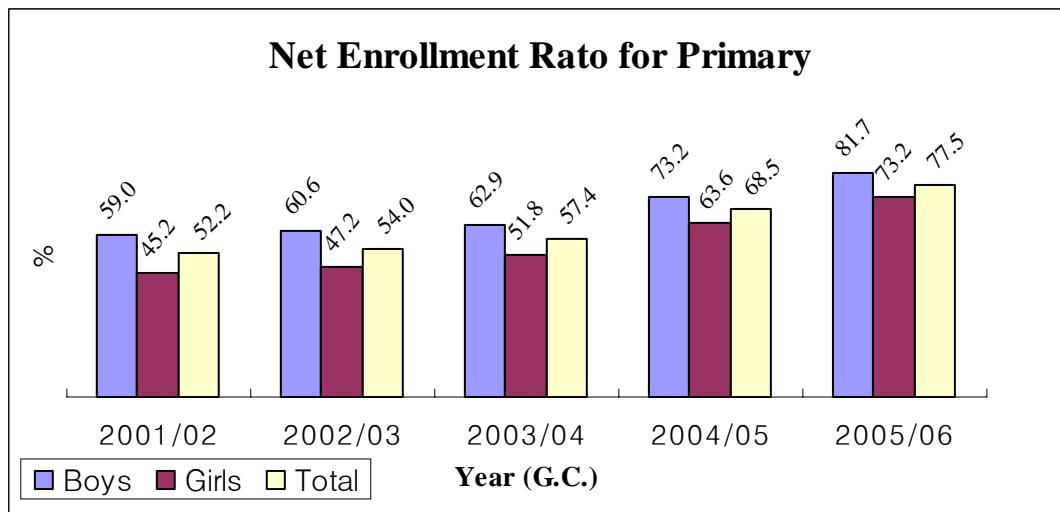

Table 1.3 - Net Enrollment Rate (NER) at Primary (1-8) Level by Region:

| Region | Male | Female | BS | Region | Male | Female | BS |
|-------------------|------|--------|------|-------------|---------------|---------------|---------------|
| Tigray | 85.0 | 88.8 | 86.8 | SNNP | 83.5 | 66.9 | 75.2 |
| Afar | 16.6 | 14.5 | 15.6 | Gambella | 110.0* | 77.9 | 94.5 |

| Benishangul-Gumuz | 91.7 | 77.3 | 84.7 | Total | 78.0 | 69.8 | 73.9 |

* The net enrollment for Addis Ababa and Gambella is more than hundred due to the time difference between the census and the data collection.

The regional comparison in Table 1.3 shows that Addis Ababa has the highest NER (101.2%) while Afar (15.6) and Somale (27.2) have the lowest respectively. The NER for Afar (15.6%), Somali (27.2%) and Dire Dawa (60.3%) were below the national average 73.9%. The 9.6 percentage points gender disparity of NER in 2004/05 at national level was lowered to 8.2 percentage points in favor of boys in 2005/06. The gender gap was in favor of girls only in two regions, Addis Ababa and Tigray.⁵

Net Intake Rate (NIR)

NIR is the percentage of new entrants in grade 1 who are 7 years old, out of the total number of children at an official admission age (age 7 in Ethiopian case) in a given year. The total net intake rate for the year 1998 E.C (2005/06) was 54.9% which was 56.6% for males and 53.3% for females respectively. The trend for the last five years is shown in the table below.

⁵ Net Enrollment Ratio didn't include ABE for Regions and National

Table 1.4 - The Trend of NIR

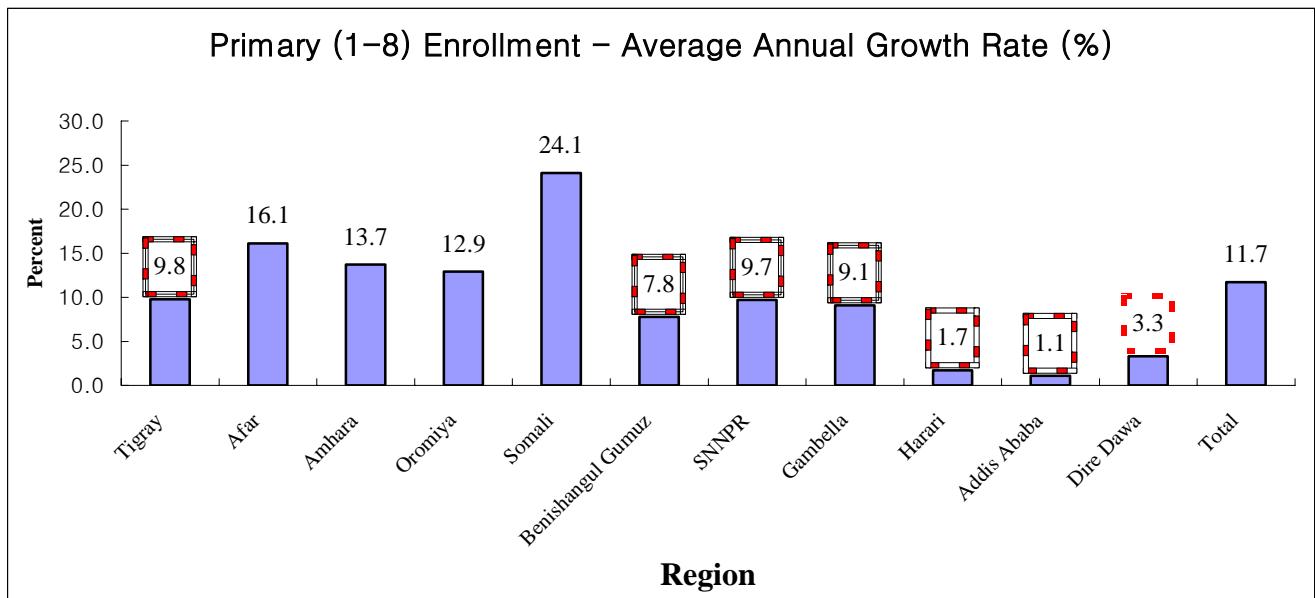

| Year | Boys (%) | Girls (%) | BS (%) |
|---------|----------|-----------|--------|
| 2001/02 | 33.3 | 30.1 | 31.7 |
| 2002/03 | 31.5 | 28.3 | 29.9 |
| 2003/04 | 35.9 | 33.6 | 34.8 |
| 2004/05 | 62.2 | 59.6 | 60.9 |
| 2005/06 | 56.6 | 53.3 | 54.9 |

The trend of **NIR** shows an increase of 23.2 percentage points for the past five years, although, it shows a decrease in the years 2002/03 and 2005/06. It shows an increase of 23.3 percentage points for boys and 23.2 percentage points for girls in these five years (2001/02-2005/06). Some children of this age attended alternative basic education program.

Primary Enrollment – Average Annual Growth Rate

The average annual growth rate of enrollment helps to understand how coverage is progressing every year in each region and at national level. It estimates the annual rate of increase in enrollment. Compounded rate of growth is used to estimate the growth rate in enrollment in the last five years.

The graph below shows the average annual growth rate of enrollment in each region and at national level. In the four years under consideration (1994-1998 E.C.), at national level the average annual growth rate is 11.7%. Every region except Afar (16.1), Somale (24.1), Amhara (13.7) and Oromiya (12.9) has an annual growth rate which is below the national average (11.7%).

Alternative Basic Education

To realize the goal of universalization of primary education by 2015, ESDP II envisaged provision of basic education through alternative modes of delivery.

Accordingly, several alternative basic education centers have been established in the regions.

* 1997 E.C. Data

The gross enrolment rate in the alternative basic education program for 1st cycle primary is 10.0% for both sexes, 9.7% for females and 10.3% for males and for primary (1-8) is 5.5% for both, 5.4% and 5.7% for girls and boys respectively. If we include this in the 1998 E.C. enrolment, the gross enrolment rate for primary 1st cycle (107.6%) will increase to 117.6% and for primary (1-8) will increase to 91.3%. 4 regions and 1 city administration did not respond to the AB Education questionnaire. It is because of this the GER for ABE is 10.0% for primary 1st cycle, other wise we believe it is much more higher than that.

Adult and Non-Formal Education

Table 1.6 - Adult and Non-Formal Basic Education

| Regions | Adults enrolled | | | Number of Facilitators | | | No. of Centers |
|-------------------|-----------------|--------------|---------------|------------------------|-------------|--------------|----------------|
| | M | F | BS | M | F | BS | |
| Oromia | 137363 | 85523 | 222886 | 7420 | 3623 | 11043 | 2967 |
| Benishangul-Gumuz | 4072 | 2103 | 6175 | 40 | 26 | 66 | 66 |
| Total | 141435 | 87626 | 229061 | 7460 | 3649 | 11109 | 3033 |

According to the above data 229,061 adults were enrolled in an Adult and Non-formal education program run by government and non governmental organizations in Oromia and Benishangul-Gumuz Regions. Other regions did not respond to the Adult and Non-formal Education Questionnaire.

Enrollment in Secondary Schools

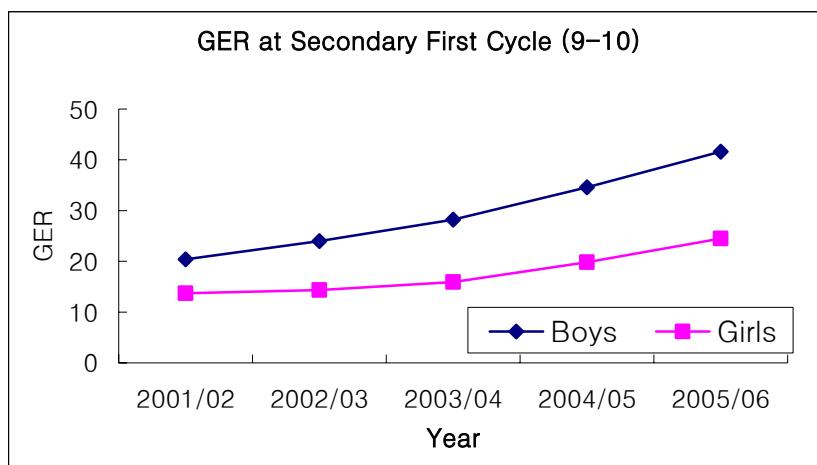

Enrollment in the First Cycle of Secondary (9-10) Schools

In 1998 E.C. /2005-06/, 1,066,423 students were enrolled in secondary 1st cycle (grades 9-10). This was higher by 23.9% compared to the previous year's 860,734. Out of the total enrollment, 387,707 (36.4%) were girls.

In 1998 E.C. /2005-06/ the GER for girls and boys were 24.5% and 41.6% respectively. As a result the total GER for the first cycle of secondary (9-10) raised to 33.2%, which is higher by 5.9 percentage points compared to the 1997 E.C.

Table 1.7 - The Trend of GER at Secondary First Cycle (9-10)

| Year | Boys | Girls | BS |
|-------------|-------------|--------------|-----------|
| 2001/02 | 20.4 | 13.7 | 17.1 |
| 2002/03 | 24.0 | 14.3 | 19.3 |
| 2003/04 | 28.2 | 15.9 | 22.1 |
| 2004/05 | 34.6 | 19.8 | 27.3 |
| 2005/06 | 41.6 | 24.5 | 33.2 |

In the past five years, the GER at the first cycle of secondary (9-10) showed an increase of 16.1 percentage points (21.2 and 10.8 percentage points for boys and girls respectively). However, the gender gap increased from 14.8 percentage points in 2004/05 to 17.1 percentage points in 2005/06 in favour of boys.

Table 1.8 - Net Enrolment Rate at Secondary (9-10)

| Year | Boys | Girls | BS |
|-------------|-------------|--------------|-----------|
| 2001/02 | 8.6 | 6.2 | 7.4 |
| 2002/03 | 10.1 | 6.7 | 8.4 |
| 2003/04 | 12.0 | 7.5 | 9.8 |
| 2004/05 | 14.2 | 9.3 | 11.8 |
| 2005/06 | 15.5 | 10.7 | 13.2 |

As indicated in Table 1.8, the NER of the first cycle of secondary (9-10) increased from 11.8% in 2004/05 to 13.2% in 2005/06. It could clearly be seen from the table that there has been a 5.8 percentage points increase in NER in the last five years (2001/02 – 2005/06). Despite this improvement in NER, the gender gap has shown a continuous increase (2.4 percentage points in 2001/02 to 4.9 percentage points in 2004/05) except for 2005/06 which is 4.8 percentage points.

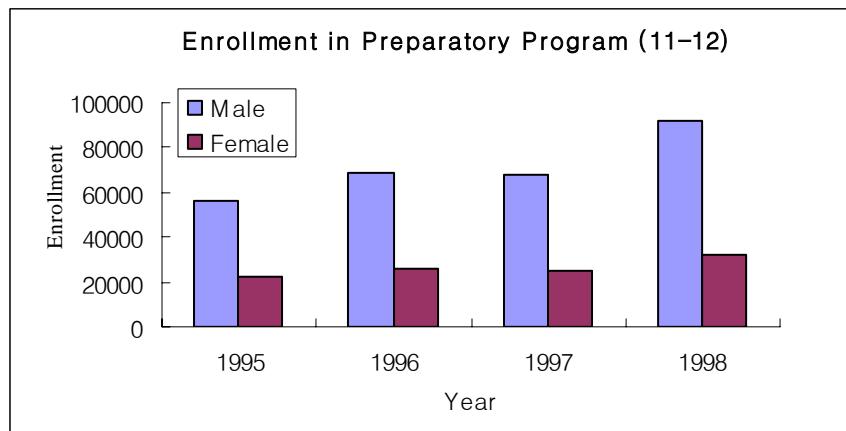

Enrollment in Preparatory Programme (11-12)

The total number of students enrolled in grades 11 and 12 (preparatory grades) in 1998 E.C. /2005-06/ was 123,683, out of which 31,794 (25.7%) were girls. When compared to 1997 E.C. /2004-05/ the enrollment at this grades level showed an increase of 31,200 (33.7%). In 1998 E.C. the GER at the preparatory programme was 3.9% and 5.7% and 2.0% for boys and girls respectively.

Table 1.9

Enrollment in Preparatory Program (11-12)

| Year | Male | Female | BS |
|-----------|-------|--------|--------|
| 1995 E.C. | 56680 | 22475 | 79155 |
| 1996 E.C. | 69189 | 25471 | 94660 |
| 1997 E.C. | 67413 | 25070 | 92483 |
| 1998 E.C. | 91889 | 31794 | 123683 |

Out of the 123,683 grades 11 and 12 (preparatory) students, it is only 31,794 (25.7%) female. This will obviously affect the gender gap in the tertiary education. Although there is an increase in the student population at this level in general, the growth for female (9319) is much more less than that of boys (35,209). This shows that we have to try all means to bring more girls to this grade levels as it is a gateway to higher education.

Technical and Vocational Education and Training (TVET)

A competitive global market economy requires technical and professional citizens trained in broad and specific occupation. Hence, Technical Vocational Education and Training (TVET) may be seen as a center for the development of marketable and entrepreneurial skills and as a means for development. It is with such consideration that, Ethiopia put in place a comprehensive human resource development program aimed at strengthening its capacity through TVET.

To meet this demand, Technical and Vocational Education and Training Institutions have increased in number and the training areas have been diversified, enrollment has gone up, and the trainees are prepared to perform functions valued by the market and society.

In 1998 E.C (2005/06) there were 113 government and 156 non-government TVET institutions in the country enrolling a total of 123,557 students in regular and evening programmes. The share of female enrollment has reached 62,142 (50.3%). Enrollment in TVET is estimated to be higher than what is indicated in this document since there are some Government and Non-Government TVETs that did not respond to the questionnaire.

The total enrollment in TVET by the year 2001/02 was only 38,176. In 2002/03, the number has increased to 72,162 i.e. an increase of 89.0% compared to 2001/02.

During the same year, there were also 25 government TVET centers run by the Ministry of Agriculture enrolling a total of 37,029 students, out of which 32,610 were males and 4,419 females. The training centers offer training in Animal Science, Plant Science, Natural Resource, Animal Health, Cooperative Accounting and Auditing and Cooperative Organization Management and Marketing.

Higher Education

Enrollment

Total enrollment in the higher education institutions in 1998 E.C. /2005-06/ is recorded to be 180,117 in all programs- Regular, Evening, Kiremt and Distance for both Government and Non-Government institutions. Out of this, non-Government institutions enroll 39,691 students, which accounts for 22.04% of the total. However, the data for non-government institutions capture only those institutions that are accredited by the Ministry of Education.

* The data reported in 2004/05 (191,165) included 49,402 diploma students.

Table 1.13 shows that the enrollment in higher education program has increased from 136,472 in 2004/05 to 180,117 in 2005/06. In all programs, there were 43,679 (24.3%) female students.

Tertiary level education is mainly provided in four ways, i.e., regular, evening, kiremt and distance. The total number of students enrolled in degree programs has increased from 34,556 in 2001/02 to 173,901 in 2005/06. During this period although male enrollment was growing faster than female enrollment. The female enrollment has shown a dramatic growth (5489-43066) during this period. The share of female enrollment out of total enrollment increased from 15.9% in 2001/02 to 24.8%.

The total number of students enrolled in Postgraduate degree (Masters and Ph.D) programs has been increased from 1,347 in 2001/02 to 6,385 in 2005/06. Although the majority of students in the postgraduate programme are males the number of females in the programme has shown a reasonable increase from 99 to 639 in this period.

Graduates

The total number of graduates from all programs was 26,723; of these 4,231 (15.8%) were females. From the Government institutions 25,889 students have graduated, of which 3,963 (15.3%) were females. From Non-Government institutions 834 students have graduated, of these 268 (32.1%) were females.

B) Equity

Gender Disparity at Primary level

The direction of gender disparity can be indicated using the Gender Parity Index (GPI), which is the ratio of female to male enrolment rates. In a situation of perfect equality between boys and girls enrollment rates, GPI is 1 while 0 indicates the highest disparity.

The gender disparity is at its lowest (seems to be abolished) in Addis Ababa (1.19) and Tigray (1.00), the highest in Gambella (0.62) and Somale (0.69) respectively and higher than the national average (0.84) in all other regions/City Administration.

Urban-Rural Disparity

A comparison of rural and urban enrollment indicates that 75.7% of primary enrollment (regular and evening) was accounted for by rural areas and 24.3% by urban. Where as, for secondary (9-10) the proportion is 90.9% and 9.1% for urban and rural respectively.

Table 1.18 - Urban / Rural Enrollment by Level

| Level | Urban Enrollment | | | | Rural Enrollment | | | |
|-------------------|------------------|---------|-------|---------|------------------|---------|-------|---------|
| | Male | Female | %Male | %Female | Male | Female | %Male | %Female |
| Primary (1-8) | 1604061 | 1481499 | 52.0 | 48.0 | 5335108 | 4236674 | 55.7 | 44.3 |
| Secondary (9-10) | 612630 | 356511 | 63.2 | 36.8 | 66086 | 31196 | 67.9 | 32.1 |
| Secondary (11-12) | 86159 | 30274 | 74.0 | 26.0 | 5730 | 1520 | 79.0 | 21.0 |

Among those enrolled, the proportion of girls is lower than that of boys both in urban and rural areas. However, it is much lower in rural than in urban areas.

C) Quality

Percentage of Certified Primary School Teachers

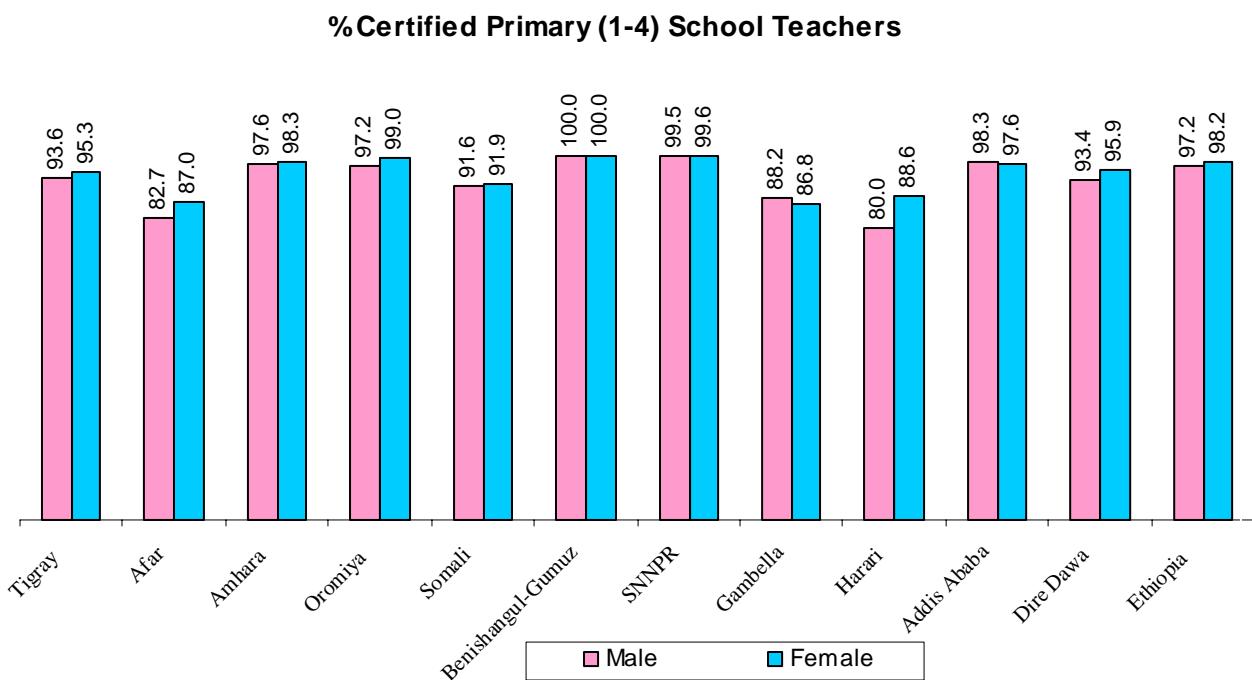

According to the national standards, the first cycle (1-4) primary education requires teachers with minimum qualification of Teacher Training Institutes (TTI) certificate. Similarly a Teacher Training Colleges' diploma is required for the second cycle primary (5-8).

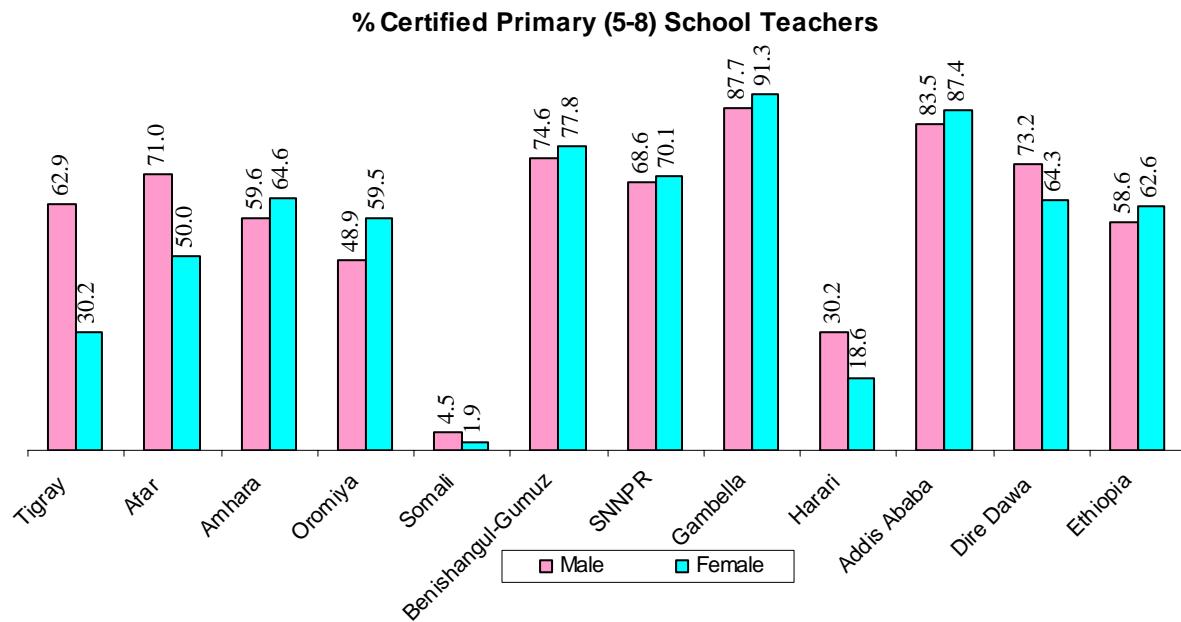

The table below shows the proportions of certified primary school teachers at a national level for the two cycles of primary education. At national level, the target set for 1998 E.C (2005/06) was 98.3% for the first cycle and 63% for the 2nd cycle. However, the data shows 97.6% for the first cycle primary and 59.4% for the 2nd cycle. This shows that much effort has to be made to attain the target set for the 2nd cycle primary.

Table 1.19

| | Number of Teachers | | | Number of Certified Teachers | | | % Qualified Teachers | | |
|-----------------------------|--------------------|--------|--------|------------------------------|--------|--------|----------------------|--------|------|
| | Male | Female | BS | Male | Female | BS | Male | Female | BS |
| Primary | | | | | | | | | |
| 1 st Cycle (1-4) | 76642 | 59482 | 136124 | 74483 | 58392 | 132880 | 97.2 | 98.2 | 97.6 |
| 2 nd Cycle (5-8) | 53951 | 12964 | 66915 | 31630 | 8116 | 39746 | 58.6 | 62.6 | 59.4 |

The graph below show the proportion of primary school teachers at regional level for male and female teachers. Percentage of qualified teachers is calculated for both male and female by dividing the number of certified male teachers by total number of male teachers, and the number of certified female teachers by total number of female teachers. It could clearly be seen from the two graphs that much of the teaching force in the primary first cycle and second cycle (except for Tigary, Harari and Somali) is trained.

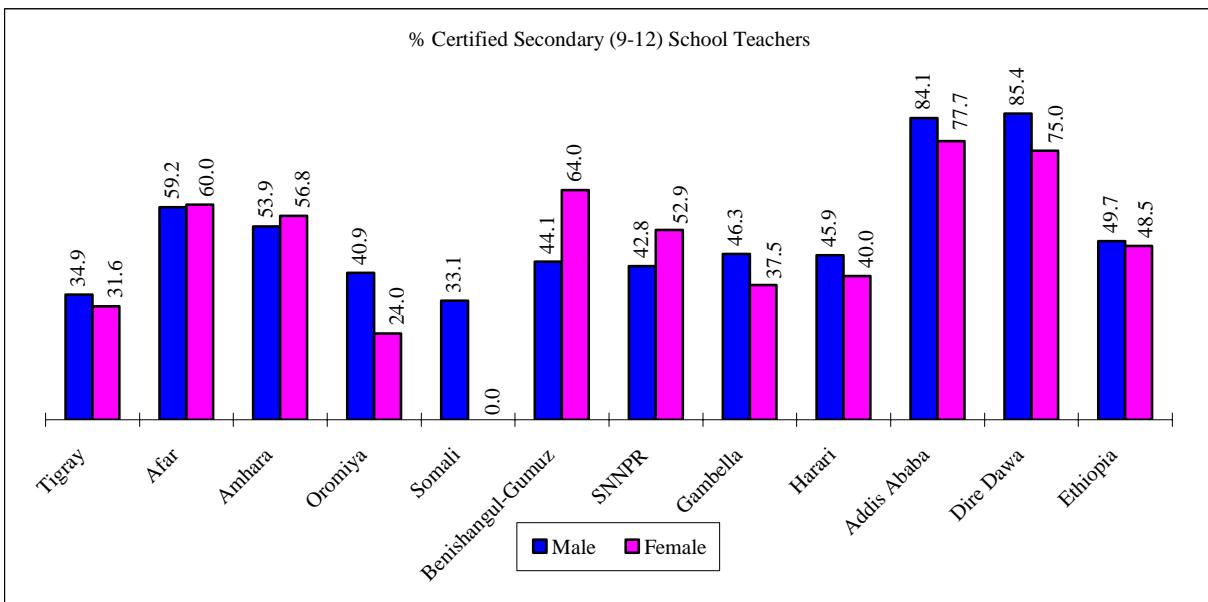

Percentage of Qualified Secondary School Teachers

The minimum standard for secondary school teachers is a first degree in a major subject.

Table 1.20

| | Number of Teachers | | | Number of Certified Teachers | | | % Qualified Teachers | | |
|------------------|--------------------|--------|-------|------------------------------|--------|-------|----------------------|--------|------|
| | Male | Female | BS | Male | Female | BS | Male | Female | BS |
| Secondary (9-12) | 18756 | 2039 | 20795 | 9329 | 988 | 10317 | 49.7 | 48.5 | 49.6 |

The proportion of qualified secondary school teachers in 1998 E.C. varies from region to region. It ranges from 85.1% in Dire Dawa (the highest) to 32.3% in Somale (the lowest).

Only 49.6% of the teachers who have been serving in secondary schools in 1998 E.C. were qualified for the level while the target set to be met in 2005/06 was 51%. This data shows an increase of 9.0 percentage points compared to 1997 E.C.

D) Efficiency

Pupil-Teacher Ratio (PTR)

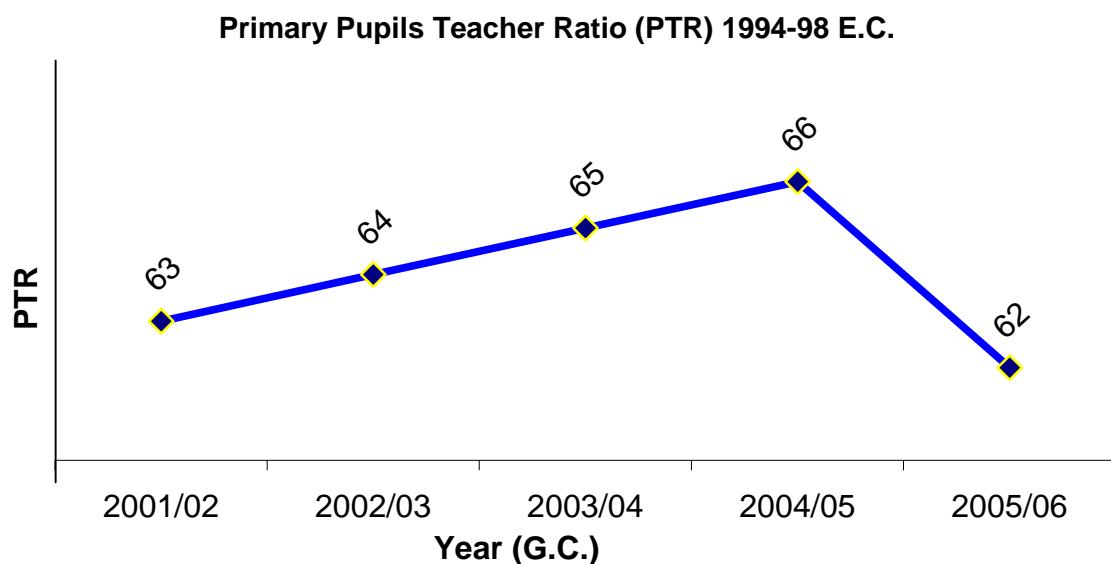

Pupil teacher ratio is one of the common education indicators on efficiency and quality. However, there may be two lines of argument as far as this issue is concerned. That is:-

- The lower the PTR the higher the opportunity of contact between the teacher and pupils to check home works and class works as well as provide support to students individually.
- On the other hand, very low PTR may indicate inefficient use or under utilization of teachers.

Therefore, low or high PTR alone may not be enough to explain the quality of education because quality of education depends on other factors such as mode of delivery, commitment and qualification of teachers, the supply of educational materials, etc.

However, this indicator may be very useful when checked against a set standard in the context of the country. In Ethiopia, the standard set for the pupil/teacher ratio is 50 and 40 for the primary and secondary respectively.

Although the PTR in the primary has shown a slight change in 1998 E.C. (66 in 1997 – 62 in 1998) it has been continuously increasing (63 in 2001/02 – 66 in 2004/05)

The PTR for secondary schools (9-12) increased from 51 in 1997 E.C. (2004/05) to 57 in 1998 E.C. (2005/06).

Usually the national level figures reflects the general direction, may not show clear pictures as they mask the variations at lower levels. PTR at school level shows a better picture of the situation of the actual teaching learning process.

Table 1.21 - Pupil Teacher Ratio at Lower (1-4) and Upper (5-8) Primary Level:

| Region | Grades (1-4) | Grades (5-8) | Region | Grades (1-4) | Grades (5-8) |
|------------|--------------|--------------|-------------|--------------|--------------|
| Tigray | 44.7 | 48.9 | SNNPR | 69.0 | 67.1 |
| Afar | 40.1 | 36.2 | Gambela | 41.3 | 46.4 |
| Amhara | 63.5 | 64.7 | Hrarai | 28.7 | 29.1 |
| Oromia | 72.5 | 56.6 | Addis Ababa | 37.3 | 43.5 |
| Somali | 136.5 | 49.8 | Dire Dawa | 31.0 | 64.5 |
| Bensh.Gumz | 48.4 | 53.2 | National | 64.5 | 57.9 |

As shown in Table 1.21, PTR at national level is 64.5 for the first cycle primary and 57.9 for the second cycle primary in 1998 E.C (2005/06). Region wise, Tigray, Afar, Gambella, Harari, Addis Ababa and Dire Dawa are below the standard set while Oromia, Amhara, and SNNPR are above the standard set in both cycles of primary education. Somale is much far from the standard set for the first cycle primary.

Pupil-Section Ratio (PSR)

This ratio is one of the efficiency indicators. A lower ratio in comparison to the national standard means under-utilization of resources while a higher ratio indicates overcrowding and less interaction between each pupil/student and teacher. The target set for pupil (student)/section ratio for primary (66.2) and secondary (73.9) for ESDP III. However, in 1998 E.C. the pupil (student)/section ratio were 69 and 82 for primary and secondary schools respectively.

Repetition and Dropout Rates

These rates help to understand how the education system works in terms of the use of available resource and time. A student has three paths in a particular academic year, i.e. promotion, repetition or dropout. These rates are commonly used to measure the efficiency of the education system in producing graduates of a particular education cycle or level. Repeating a grade means utilizing more resource than allocated to a student; and leaving a school (dropout) before completing a particular cycle or level of education is also wastage of resources. In both cases, the meager resource allocated for education and time will be wasted or under utilized. That is why, repetition and dropout rates are taken as indicators of the level of efficiency of the education system.⁶

Repetition Rate

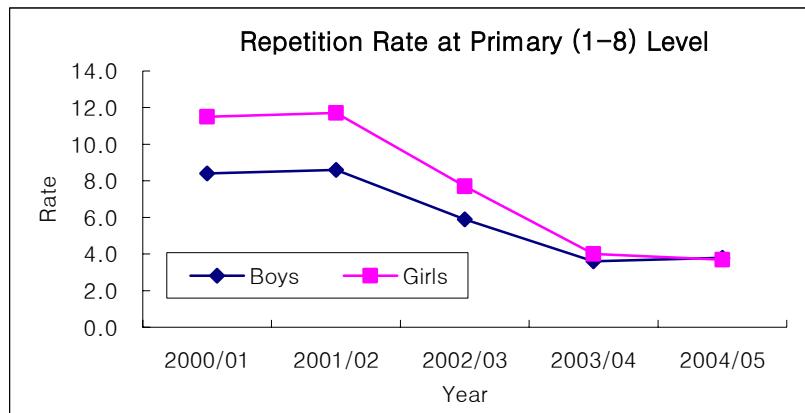

This indicator measures the proportion of students who have remained in the same grade over one year, and have used additional resource for the same grade. The resources are in the form of teacher salary, school materials, facilities etc. This reduces the internal efficiency of the system. Though the policy requires promotion to be based on students continuous assessment results for the first three grades of primary, repeaters in these grades are still being reported since it is not fully implemented in all schools.

The 6.7% repetition rate in 1995 E.C. (2002/03) was reduced to 3.8% in 1997 E.C. (2004/05).

The repetition rates for primary in each region during the 1997 E.C. academic year is shown in Table 1.23. Tigray, Amhara, Somali and Dire Dawa had repetition rates below the national average 3.8. Gambella had the highest repetition rates and Somali had the lowest. Females' repetition rate is high in, Gambella and low in Somale.

Dropout Rate

As can be observed from the graph below the dropout rate was reduced from 14.4% in 2003/04 to 11.8% in 2004/05.

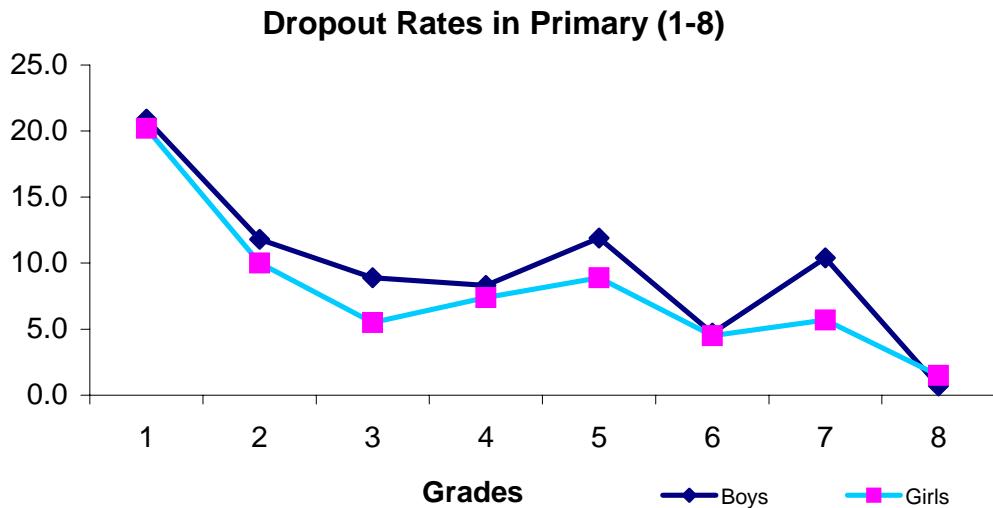

Table 1.24 - Drop Out Rate at Primary Level by Gender

| 2004/05 | 12.3 | 11.3 | 11.8 |

Dropout Rates by Grade

The proportion of pupils who leave school varies from grade to grade. In most cases this figure is higher for grade one. At national level, 20.6% of pupils enrolled in grade 1, in 1997 E.C. have left school before reaching grade two in 1998 E.C. The figure below shows that dropout rate is highest at Grade one and lowest at Grade 6. The average duration of study for dropouts i.e. the average number of years they stayed in the education system before they dropout is 3.1 for boys and 3.0 for girls.

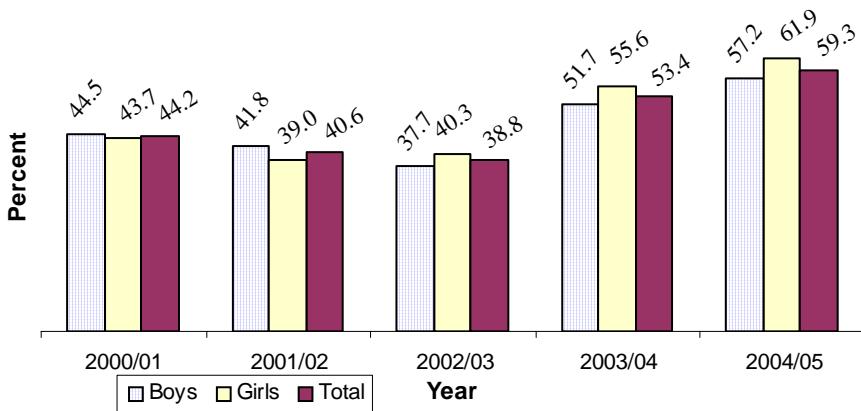

The figure above illustrates that in all grades except grade 8 the rate of dropout is higher for boys than for girls.

Survival Rate at Grade 5

Survival rate at this grade is used to estimate the percentage of students who will complete the first cycle of primary education, since the completion of at least 4 years of schooling in Ethiopia is commonly considered as a pre-requisite for a sustainable level of literacy. Survival rate approaching 100% indicates a high level of retention and low incidence of dropout. The reliability of this indicator depends on the consistency of data on enrolment and repeaters both in terms of coverage over time and across grades as it is calculated based on these figures. Synthetic cohort method is applied to calculate this rate, by assuming a group of pupils who are enrolled in grade 1 at the same time and no other students joining the group or transfer within 10 years. Since pupils are allowed to repeat two grades in their primary school life it may be appropriate to say that completing primary education requires a minimum of 8 years and a maximum of 10 years.⁷

Survival Rate to Grade 5

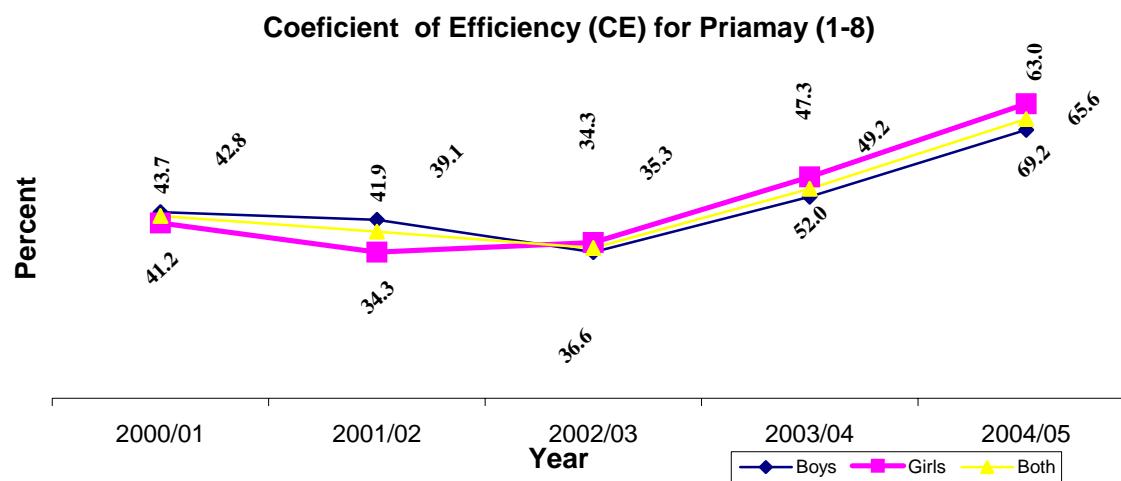

The cohort flow model constructed for the last five years, as indicated in the above graph, shows that survival rate to Grade 5 did not have a definite trend. It was at its highest in

⁷ Only for Regular Programme

2000/01 but decreased in 2001/02 and 2002/03 and showed increment in 2003/04 and followed the same suit 2004/05. The survival rate to grade 5 for the year 2004/05 was 57.2% for male, 61.9 % for female and 59.3% for both sexes. All these figures show that more than 40% of the pupils didn't continue in the second cycle of primary in the last five years under consideration.

Coefficient of Efficiency (CE)

This efficiency indicator is calculated based on the result of the cohort analysis. It mainly depends on graduates (out puts) and the time required to produce the graduates. It is based on the definition that one year spent in a grade by a pupil is counted as one pupil-year. The coefficient of efficiency is the ratio of the ideal (optimal) number of pupil-years required (with no repetition or dropout) to produce a number of graduates from a given school cohort in primary education expressed as a percentage of the actual number of pupil-years spent to produce the same number of graduates. It is the reciprocal of the input-output ratio. It is used as an alternative indicator of internal efficiency. It measures the impact of dropout and repetition combined in relation to graduates from the primary level. The maximum value of CE is 100, which indicates highly efficient system and smaller CE implies lower efficiency of the education system.

The 49.2 coefficient of efficiency in 2003/04 was increased to 65.6 in the year 2004/2005. For the last five years the CE ranges between 42.8 and 65.6.

Primary Completion Rate (proxy)

UIS terminology: Gross intake ratio at the last grade

NB: This indicator will give you the status at the moment of calculation of children who should be in the last grade of primary education.

$$\frac{\text{New pupils in last Grade}}{\text{Population official age in last grade}}$$

Where “new pupils in last Grade”= total pupils in last Grade – repeaters in last Grade

| 1998 E.C. (2005/06) | 69.2 | 56.0 | 62.7 | 50.1 | 32.9 | 41.7 |

As indicated in Table 1.25 above, the completion rates in 1998 E.C. (2005/06) were 62.7% and 41.7 % for grade 5 and 8 respectively. Though the completion rates for both grades show significant increase, there is a recognizable gender disparity in favour of boys. However, if we consider the over all grade five completion rate for the last five years (1994 /2001/02 – 1998 /2005/06) girls have outperformed (24.5%) boys (17.0%). But, if we consider the same for grade 8, boys have a better chance of going to grade 9 or joining the secondary education and above than girls (17.2%).⁸

School Facilities

School facilities have impact on access, quality, efficiency and equity. The school facilities are tools to attract students in general and girls in particular.

The type of school system (shift-operated or non-shift) and availability of water, latrines, clinic, libraries, laboratories and pedagogical centers in schools in 1997 E.C. are presented in the following table.

* Primary schools in 1-12 are considered in secondary.

Education Budget and Expenditure

The Government of the Federal Democratic Republic of Ethiopia is committed to the provision of better education that can address the needs of the society. This is witnessed by the budget allocation to the sector, which is growing at a faster rate from year to year.

The figure below shows that the education expenditure has increased through time. The total expenditure which was Birr 2.17 billion in 1993 E.C. (2000/01) and increased to Birr 4.64 billion in 1997 E.C. (2004/05), which is a remarkable increase within five years.

Source: Ministry of Finance and Economy Development (MoFED)

The above graph shows the trend of expenditure for education in the last five years 1994-1998 E.C. (2001/02-2005/06). The data for 1994 E.C. (2001/02) is actual expenditure while the figures for 1995-98 E.C. (2002/03-2005/06) refer to the pre actual expenditure. The total share of the education and training expenditure out of total government expenditure for the year 1998 E.C. (2004/05) was 17.82% while the target set for the year 1998 E.C (2005/06) was 19.0%.

STATISTICS ON HIGHER EDUCATION

Introduction

This part presents data on higher education in Ethiopia for the 2005/06 (1998 E.C.) academic year.

Definition of General Concepts

Department

The smallest academic administrative unit of an institution or a faculty or a college offering major training programs or well-defined services to other departments. The STATISTICS DEPARTMENT is an example of a service unit, as it exists today like in the faculty of science of Addis Ababa University.

Program

A selection of one or more courses (planned series of learning experiences) or a combination of courses, usually chosen from a syllabus with an expressed or implied aim.

Regular Program

Describes programs offered during the daytime to full-time students of institutions of higher education.

Continuing Education Programs

Describes programs offered in evening (extension) classes, Distance and programs offered during the Ethiopian Summer.

Level of Program

This is a classification of programs representing a step in educational progression.

Undergraduate Degree Program

This is a third-level educational program which is offered for duration of three to four years after completing high school. Completion of this program is certified by awarding a Bachelor's Degree. The degree of Doctor of Medicine (MD) and the Degree of Veterinary Medicine (DVM) are also Undergraduate Degrees, which are given after a training period of 6 years, the last one being a period of internship or externship.

Postgraduate Program

This is a training, or specialization program offered under the schools of graduate studies to students who already have their first degree. Completion of this Program is certified by awarding either a Masters Degree, Certificate in Medicine, and Ph.D. degree in very few institutions.
