Foreword

The Ministry of Education (MoE) is pleased to release its 2004 E.C. (2011/12), Education Statistics Annual Abstract. This publication reports on all levels of the education system namely: General Education including Alternative and Basic Education (ABE), Technical and Vocational Education Training (TVET), College of Teachers' Education, Higher Education and Education expenditure in the country. Education is at the center of the government's policies. This places a momentous responsibility on MOE to improve its reporting system, which is proved by the availability of quality and timely education data and information.

The Education Management Information System (EMIS) at MOE in collaboration with the respective EMIS units in the respective sectors of the education system are working to enhance service delivery by emphasizing the value of education statistics for planning, decision-making, policy formulation, and monitoring and evaluation. This publication provides the necessary information on which evidence based decision-making depend. The availability of organized educational data for the past several years facilitates the analysis of trends in the education system over time. The statistics also serve as a measure of the success of education policies, and as a proof that MoE and the Regional Education Bureaus (REBs), the Regional TVET Agencies and the Higher Education Institutions (HEIs) have been achieving their objectives.

Reports on this publication will help Education planners and decision makers and those entrusted with monitoring and evaluation to get the necessary statistical evidence that will enable them to act in a proper manner in order to achieve key education objectives and to increase efficiency and effectiveness in the system. It also helps to prove the progresses made in the schooling system of the country.

Stakeholders in education, such as researchers, publishers, legislative bodies and development partners are welcome to utilize the information contained in this publication in their endeavors to improve the delivery of education in the country. The education statistics in this publication also form the basis for calculating education indicators reported to UNESCO, which enables Ethiopia to assess its achievement against the requirements of Education For All (EFA) and the Millennium Development Goals (MDGs).

Demeke Mekonnen

**Deputy Prime Minister and
Minister of Education**

1. INTRODUCTION

The Ministry of Education (MoE) collects, processes and integrates education data obtained from Regional Education Bureaus (REBs), administrative cities, Colleges of Teacher Education (CTEs), Government and Non-government Higher Education Institutions (HEIs), and Technical and Vocational Education and Training (TVETs) Agencies/Bureaus. The MoE then analyses these data on learners, educators and institutions and reports on the outcome of the analysis.

In this year an effort has been made to improve the turn-round time of reporting so as to produce timely information on the education system. Considerable effort has also been made to improve the quality of the data being collected by conducting a series of consultative and evaluative workshops with the Educational Management Information System (EMIS) experts of the REBs, CTEs, HEIs and TVETs. These efforts are bearing fruit in that official publication of EMIS data is available earlier than in previous years. But there continues to be problems both with respect to the completeness, accessibility, quality and timeliness of education data.

This publication contains both descriptive and analytical summaries of population, enrolment, teacher profiles, schools and sections, facilities, learning materials, grades 10 and 12 examination results, and budgets. The data is further disaggregated by level of education, sex and region in order to allow the user to see regional, urban/rural and gender disparities.

The achievements of the education system are highlighted and a comparison with the targets set in the Education Sector Development Program (ESDP IV) is also given.

This publication covers, in the main, data for the 2004 E.C. (2011/12) reporting year. Data for previous years is also provided for comparative analysis over time. The sources of the data used for the report are the following:

- General education data i.e. Pre-primary, Primary, Secondary, Alternative Basic Education (ABE), Integrated Functional Adult Literacy (IFAL) and CTEs collected from REBs.
- Higher Education data collected from respective governmental and non-governmental higher education institutions.
- TVET data collected from regional TVET bureaus/agencies/ commissions.
- National Examination and National Learning Assessment results data for grades 10 and 12 collected from National Examination Agency, and Regional Examination results data for grade 8 collected from REBs.
- Population data collected from the Central Statistics Agency (CSA).
- Education Budget and Expenditure data collected from Ministry of Finance and Economic Development (MoFED).

2. OVERVIEW OF THE ETHIOPIAN EDUCATION SYSTEM

Figure 2.1 Structure of the Ethiopian Education System

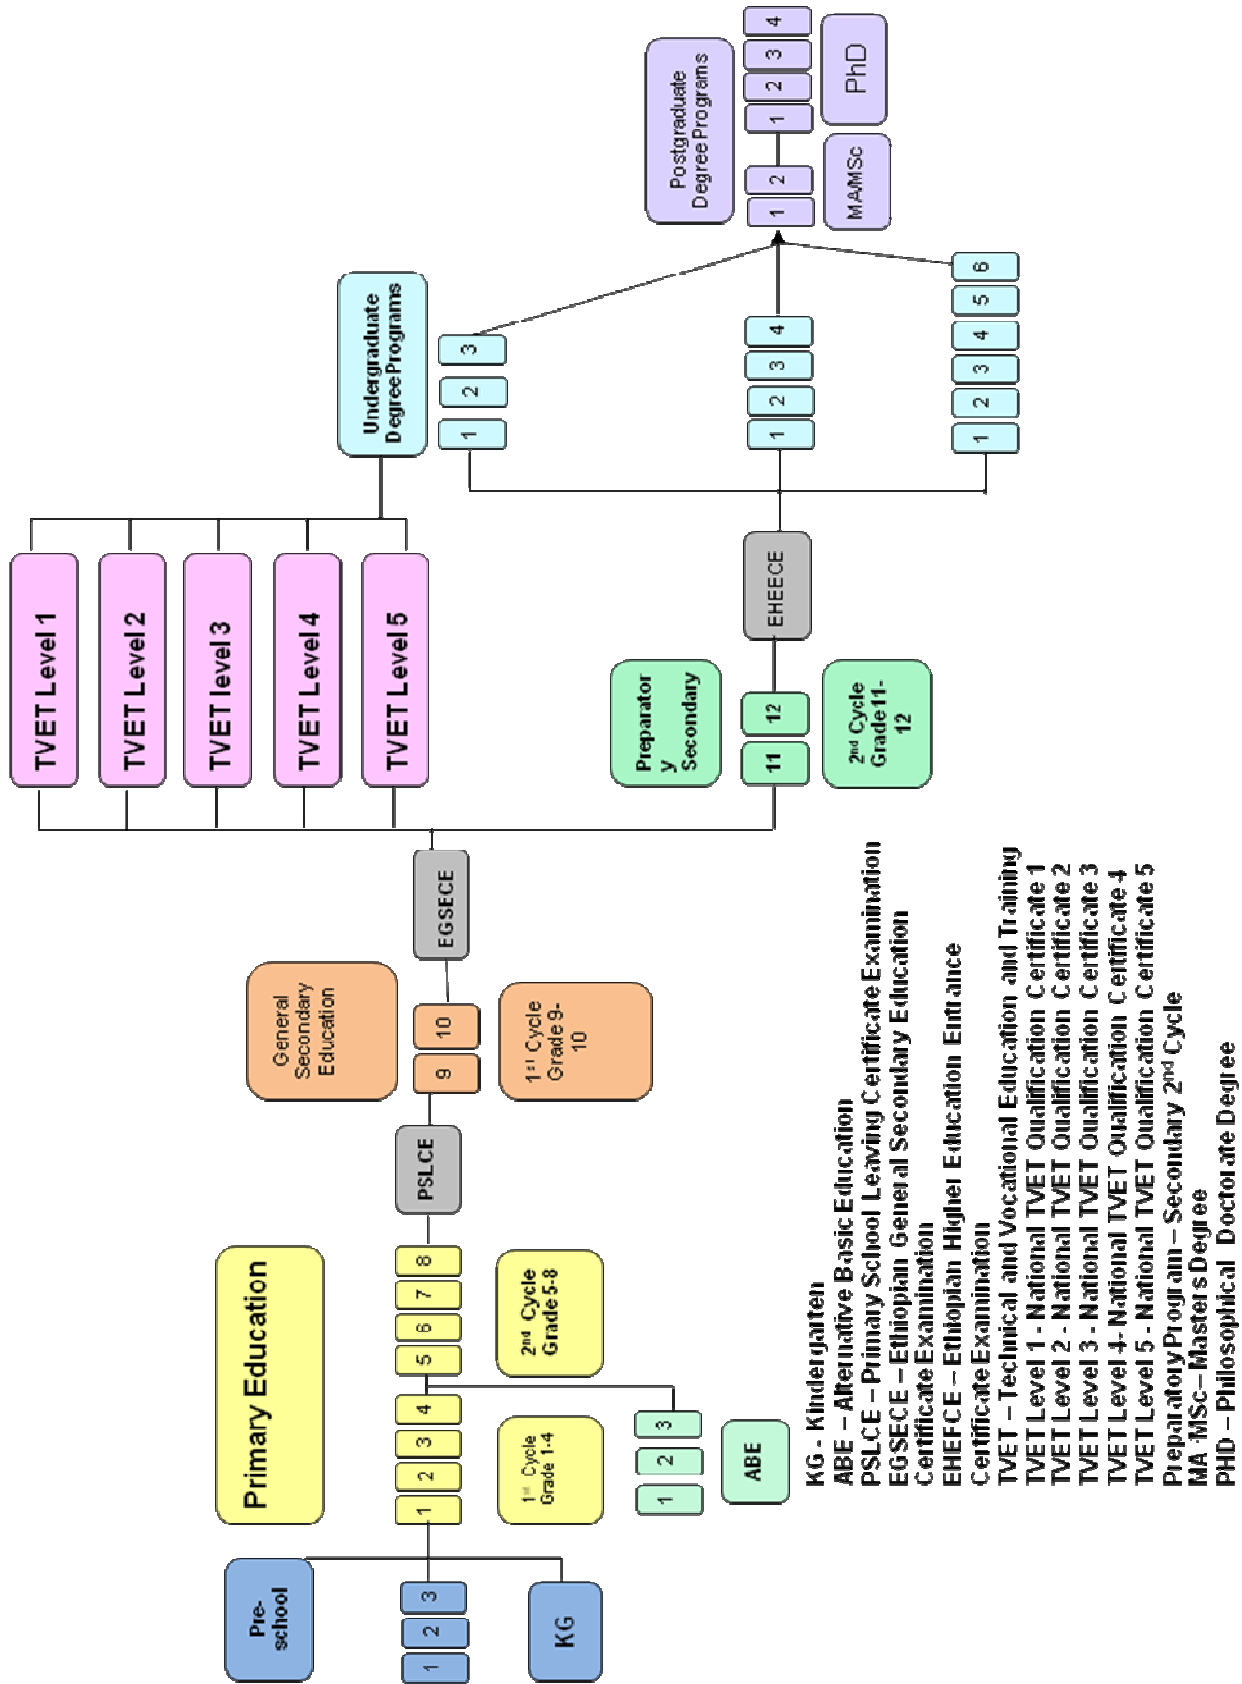

Figure 2.1 indicates the structure of both formal and non-formal education available in Ethiopia, including the examinations that influence education options.

AAGR: Average Annual Growth Rate

Table 2.1 highlights the main characteristics of the Ethiopian education system and shows systematic increase in almost all measures of activity in all sub-sectors over the last five years. In particular, there

have been an 8.7% for TVET, 17.1% for higher education-undergraduate, 36.7% for higher education-postgraduate, 2.6% for primary and 4.1% for secondary education average annual growth rates in enrolment over the past five years.

Table 2.2: The Education Sector Development Program IV (ESDP IV) Key Indicators

No.	Suggested Indicators	Base Year 2002 E.C	Target Set for 2004 E.C (2011/12)	Status of 2004 E.C (2011/12)

4. KEY INDICATORS AND ANALYSIS

A NOTE ON DATA

As in the previous Education Statistics Annual Abstracts, indicators and detailed analysis of indicators that are assumed to be most important for the majority of the stakeholders in education are presented in this publication. The main sources of data for the preparation of these indicators are the statistics from the most recent Annual School Census Questionnaire 2004 E.C (2011/12) and population census of the Central Statistical Agency (CSA).

CSA national and regional population projections with five years age group and a five year interval were disaggregated using the Beers coefficient to estimate the school age population at national and regional level these were used to prepare education statistics annual abstracts before the year 2000E.C (2007/08). The key issue for those populations is that the projections were based on a census conducted some fifteen years ago and hence actual population estimates were likely to have been somewhat inaccurate. However, in the year 1999 E.C (2006/07) CSA released population census data and thus starting from the 2000 E.C (2007/08) the annual abstract is prepared based on this new census. This year's annual abstract is also based on the 1999 E.C (2006/07) CSA five years age group census projected to the year 2004 E.C (2011/12) using the exponential method and were disaggregated using the Sprague multiplier to estimate the school age population at regional and national level and the strongly age smoothing data was used for the preparation of this annual abstract. Because of that, though you can observe a tremendous improvement in education at all levels in absolute sense, you may also observe some deviation from the year 1999 E.C (2006/07) report as a result of the new census.

In the year 2004 E.C (2011/12), General education data from all regions has been collected where as Technical and Vocational Education and Training (TVET) data from Addis Ababa, Amhara and Somali regions were not complete and even from Afar, Benishangul Gumuz, Gambella and Harari regions have not been reported at all. In addition to this, data from 25% of the non-government higher education institutions were not reported at all.

A. Pre-Primary Education

The pre-primary education includes kindergartens, “O” class and child to child programs. This level normally involves children of ages 4-6 enrolled in the pre-primary education. Non-governmental organizations such as communities, private institutions, and faith-based organizations, are the predominant operators of kindergartens. The government of Ethiopia introduced “O” class and child to child programs in the education system in the past few years. The government is also involved in developing curriculum, training teachers, and providing supervisory support. The enrolment of pre-primary education is increasing every year though underreporting remains a persistent issue in the kindergarten program of the pre-primary education. Table 4.1 shows the current status of the pre-primary education system.

Table 4.1 Pre-primary Population, Enrolment, and GER, by Region 2004 E.C (2011/12)

Region	Age 4-6 Population			Pre-School Enrollment			Gross Enrollment		
	Male	Female	Both	Male	Female	Both	Male	Female	Both

Harari	8,172	8,075	16,247	5,094	4,611	9,705	62.3	57.1	59.7
Addis Ababa	67,154	69,516	136,670	64,452	61,769	126,221	96.0	88.9	92.4
Dire Dawa	14,364	13,871	28,235	5,568	4,891	10,459	38.8	35.3	37.0
National	3,819,645	3,689,353	7,508,999	844,901	777,861	1,622,762	22.1	21.1	21.6

In 2004 E.C. (2011/12) out of the estimated 7.51 million children of the appropriate age group (age 4-6) about 1.62 million children have been reported to have access to pre-primary education all over the country. Though the enrolment is small when compared to the appropriate age group, gross enrolment rate is higher than the previous year by about 16.4 percentage point. This increase is due to the improved reporting of “O” class and child to child data in the year 2004 E.C. (2011/12), which was not considered in previous years. Moreover, it is expected that the gross enrolment rate could be higher than the figure indicated because data from several kindergartens may not have been collected. Had it not been with the addition of enrolment from “O” class and child to child, the gross enrolment in 2004 E.C. (2011/12) for pre-primary education could have been 5.3%.

i. Kindergarten program

Kindergarten is part of the pre-primary education in which children aged 4-6 are involved. This program has its own curriculum, trained teachers, administrative staffs, and school compounds. Most of the kindergarten schools are operated by non-governmental organizations such as communities, private institutions, and faith-based organizations. 94 % of the enrolment in 2004 E.C (2011/12) is covered by non-government organizations.

Table 4.2 KG Popn, Enrolment, GER, Teachers, PTR and Schools by Region 2004 E.C (2011/12)

Regions	School Age Population (4-6)			Pupils Enrolment			Gross Enrolment ratio (%)			Teachers						Pupil Teacher Ratio	No. of Kindergartens

ii. “O” Class program

“O” class is also a part of the pre-primary education system which involves children of age 5-6 that do not have access to kindergarten. The children of this program are coached by selected teachers from the respective primary school. Through this process the preschool child gets ready for grade one.

Table 4.3 “O” Class Population, Enrolment, and GER by Region 2004 E.C (2011/12)

iii. Child to child Program

Child to child is also a part of the pre-primary education system by which older brother or sisters (younger facilitators of grade 5/6 students) play with their younger siblings and neighbor children. The playing becomes learning as the benefiting child gets to know how for instance, to count or to differentiate colors and identify letters. Through this process the preschool child gets ready for school.

Table 4.4 Child to child Population, Enrolment, and GER, by Region 2004 E.C (2011/12)

B. PRIMARY EDUCATION

Primary education is critical to a nation's development, providing on average the highest public returns to investment for the state, and the keystone for later education and economic growth. In Ethiopia, primary education, defined as education in grades 1-8, in two cycles 1st cycle (grades 1-4) and 2nd cycle (grades 5-8).

Apparent Intake Rate (AIR) and Net Intake Rate (NIR)

Apparent Intake Rate (AIR)

AIR is the percentage of new entrants (irrespective of age) in grade 1 out of the total number of children of the official primary admission age (age 7 for Ethiopia) in a given year. It is also, called the Gross Intake Rate. AIR tends to reflect those students who may have not been enrolled in school at the appropriate age, and often reflect the "backlog" of students who could not enroll before.

Table 4.5 Apparent Intake Rate (AIR) Trend

Year	Boys in (%)	Girls in (%)	Total in (%)
2000E.C (2007/08)	165.8	150.8	158.4
2001 E.C (2008/09)	169.4	155.4	162.5
2002 E.C (2009/10)	150.4	135.2	142.9
2003 E.C (2010/11)	171.9	154.5	163.4
2004 E.C (2011/12)	156.0	142.4	149.3

Table 4.5 and chart 4.1 show the trend of the apparent intake rate. The gender gap narrowed by 3.8 percentage points from the previous year. From the chart below it can be observed that the AIR fluctuates every other year which might be a result of inconsistent follow up of new entrants to the system.

CHART 4.1 Apparent Intake Rate (AIR)

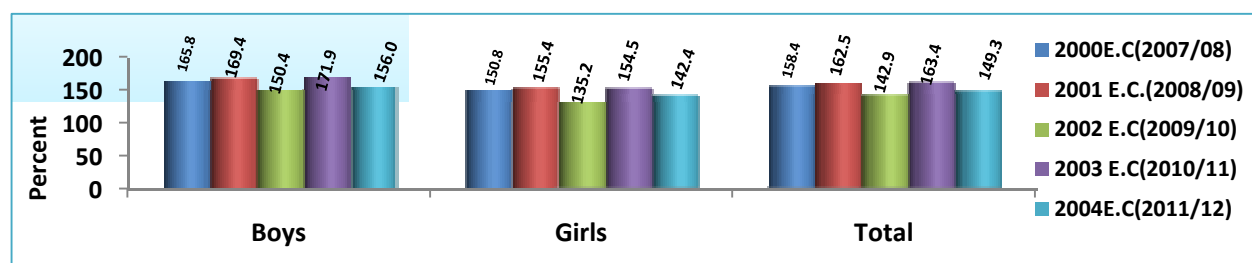

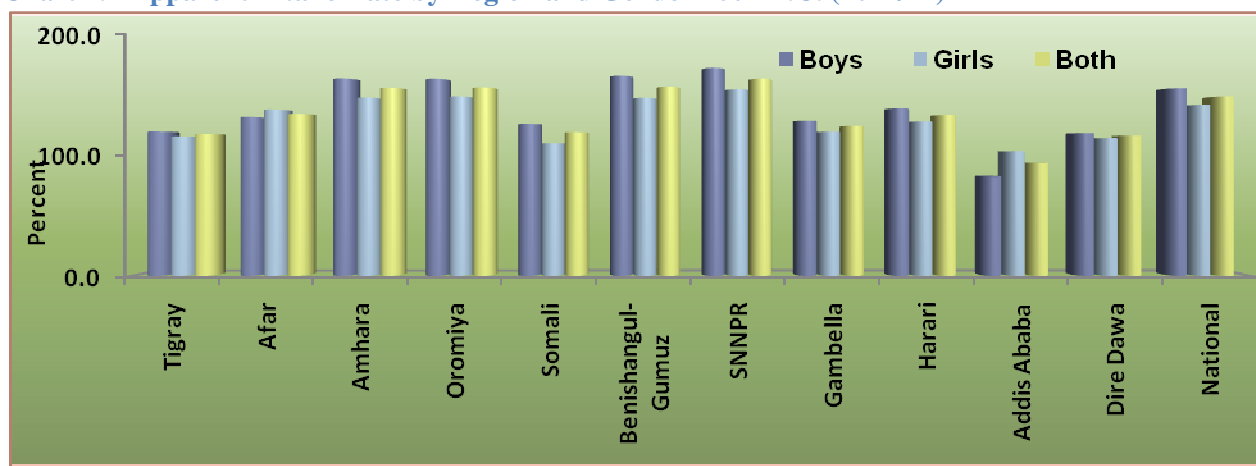

Table 4.6 Apparent Intake Rate (AIR) by Region

Region	Male (%)	Female (%)	Total (%)	GPI
Tigray	120.0	116.0	118.0	0.97
Afar	132.0	138.3	134.8	1.05
Amhara	164.2	148.2	156.4	0.90
Oromiya	163.9	149.3	156.7	0.91
Somali	126.4	110.4	119.5	0.87
Benishangul Gumuz	166.4	148.0	157.3	0.89
National	156.0	142.4	149.3	0.91

From table 4.6 above and chart 4.2 below one can see that the AIR for all is above 100% where as for Addis Ababa it is below 100% and this may be due to under-reporting of new entrants to grade 1.

The table above indicates the Gender Parity Index (GPI) at national level is 0.91. The GPI for Tigray, Afar, Harari, Dire Dawa, and Gambella is above the national average where as for Benishangul Gumuz, Amhara, Somali and SNNP is below the national average. The GPI for Oromiya is equal to the national average, since it has a larger share of population to the country in order to bring the national GPI to standard level, which is 1.0, more effort to be exerted there. The GPI for Addis Ababa is 1.25, which indicates that those male students who are supposed to enter to the system are small in number when compared to female students.

Chart 4.2 Apparent Intake Rate by Region and Gender 2004 E.C. (2011/12)

Net Intake Rate (NIR)

NIR is the percentage of new entrants in grade 1 who are 7 years old, out of the total number of children who are of official admission age (age 7 for Ethiopia) in a given year. The trend for the last five years is shown in the table below.

Table 4.7 Trends in NIR

Year	Boys (%)	Girls (%)	Total (%)
2000E.C (2007/08)	94.3	89.7	92.0
2001 E.C (2008/09)	84.3	80.1	82.2
2002 E.C (2009/10)	78.8	74.5	76.7
2003 E.C (2010/11)	94.2	88.4	91.3
2004 E.C (2011/12)	94.6	89.7	92.2

The trend of NIR shows a slight increment at an annual average growth rate of 0.05% since 2000 E.C (2007/08), while the NIR increased from 91.3 % in 2003 E.C (2010/11) to 92.2 % in 2004 E.C (2011/12), which is about 1 percentage point. Moreover, NIR is higher by 2.8 percentage point compare with GTP plan.

Chart 4.3 The Five Years Trend of NIR at National level

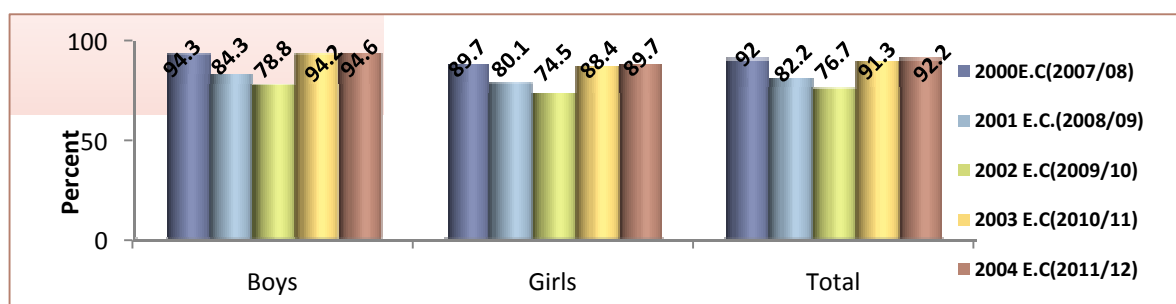

Chart 4.3 shows a decline from 2000 E.C (2007/08) to 2002 E.C (2009/10) but then increases for the last two years.

Table 4.8 NIR by Region for 2004 E.C (2011/12)

Region	Male in (%)	Female in (%)	Total in (%)
Tigray	94.4	96.8	95.6
Afar	48.0	51.7	49.6
Amhara	113.9	109.1	111.5
Oromiya	93.5	87.2	90.4
Somali	29.0	25.8	27.6
Benishangul Gumuz	90.3	79.6	85.0

Region	Male in (%)	Female in (%)	Total in (%)
SNNP	108.2	98.7	103.5
Gambella	42.4	39.4	41.0
Harari	81.6	71.9	76.8
Addis Ababa	33.2	30.9	32.0
Dire Dawa	50.4	48.0	49.2
National	94.6	89.7	92.2

Table 4.8 above shows the NIR by region and gender. This table indicates NIR for Amhara, SNNP, and Tigray is above the national average and below for the rest regions. The NIR is lower in Somali, Addis Ababa, Gambella, Dire Dawa, and Afar. The Lower NIR for Addis Ababa, Dire Dawa, and Harari might be due to high under age enrolments in the higher grades. The NIR for Amhara and SNNP is more than 100 % which is theoretically not possible and this needs further investigation.

Chart 4.4 NIR by Region and Gender 2004 E.C. (2011/12)

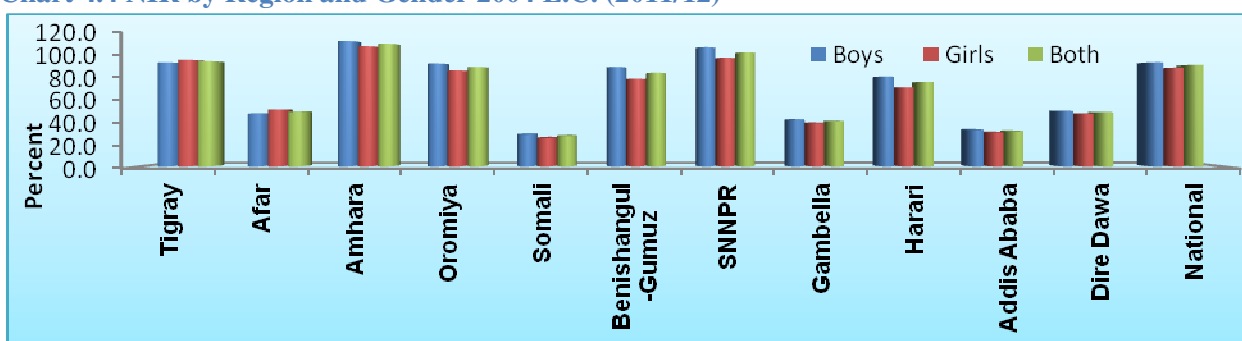

Chart 4.4 above shows NIR by region and gender. This chart indicates that the gender gap is less in Gambella, Dire Dawa, Addis Ababa, and Tigray and higher in Benishangul Gumuz, SNNP, and Harari.

Gross Enrolment Rate (GER) at Primary Level (1-8)

GER is the percentage of total enrolment in primary schools, irrespective of age, out of the corresponding primary school age population, ages 7-14.

GER is a crude measure of school coverage. Usually, since it includes under-aged and over-aged pupils, GER can be higher than 100%. This is; frequently the case in countries attempting to address the backlog of students interested in attending school, but previously unable to attend due to several reasons, such as financial problem, family issues, or lack of schools.

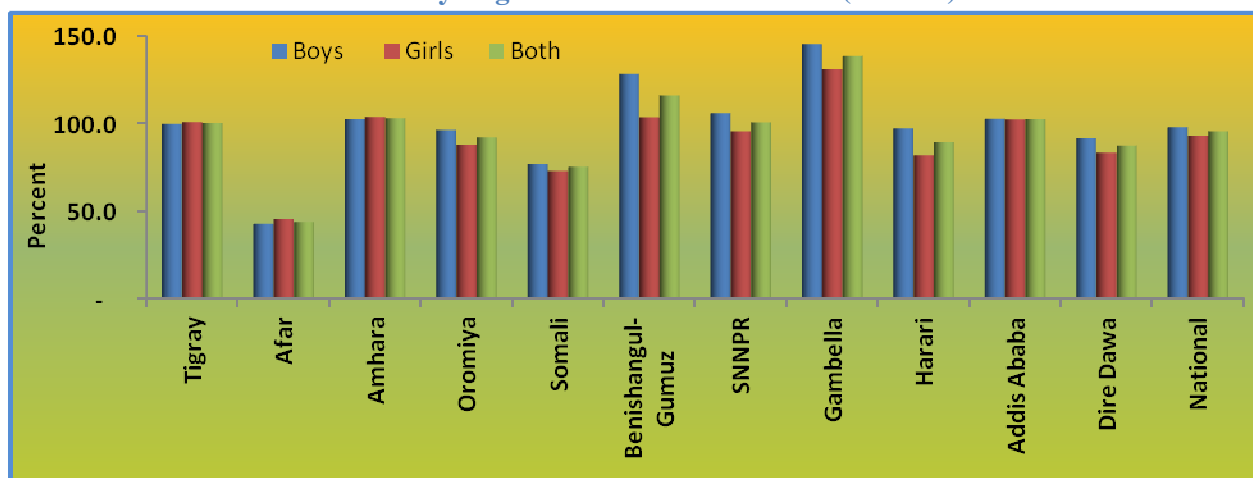

Table 4.9 shows the trend in GER for primary education by gender. For the last five years the GER for 1-8 shows an irregular pattern and is lower than the previous year and GTP plan by 1 and 4.9 percentage point where as the GER for the second cycle 5-8 has shown a consistent increment for the first four year. The gender gap narrowed from 10 percentage points in the year 2000 E.C (2007/08) to 5 percentage points in 2004 E.C (2011/12).

Table 4.9 GER Trends at Primary Level

Year	Primary 1 st Cycle (1-4) (%)			Primary 2 nd Cycle (5-8) (%)			Primary (1-8) (%)		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
2000 E.C(2007/08)	133.0	122.5	127.8	64.8	55.5	60.2	100.5	90.5	95.6
2001E.C(2008/09)	126.7	118.4	122.6	65.6	60.5	63.1	97.6	90.7	94.4
2002 E.C(2009/10)	123.2	114.3	118.8	67.4	63.5	65.5	96.6	90.1	93.4
2003 E.C(2010/11)	128.8	119.1	124.0	67.4	64.8	66.1	99.5	93.2	96.4
2004 E.C(2011/12)	127.0	118.1	122.6	65.9	65.3	65.6	97.9	92.9	95.4

Chart 4.5 given below shows the GER for primary grades 1-8 by region and gender. This chart indicates graphically the higher overall GER for Gambella and Benishangul-Gumuz. It also indicates that the gender disparity remains less for Tigray, Afar, Amhara, and Addis Ababa and it is higher in Benishangul-Gumuz, Harari, Gambella, SNNP, and Oromiya 30, 16, and 14,13, and 11 percentage points respectively.

Chart 4.5 Gross Enrolment Rate by Region and Gender 2004 E.C. (2011/12)

Net Enrolment Rate (NER) at Primary Level (1-8)

NER is the best way of measuring organized on-time school participation. It is a more refined indicator of school and enrolment coverage and explains the proportion of students enrolled in terms of official age group. NER is calculated by dividing the number of properly aged primary students (for Ethiopia ages 7-14) by the number of children of school age (7-14). NER is usually lower than the GER since it excludes over-aged and under-aged pupils.

Chart 4.6 Five Years Trend of Net Enrolment Rate for Primary Grades 1-8

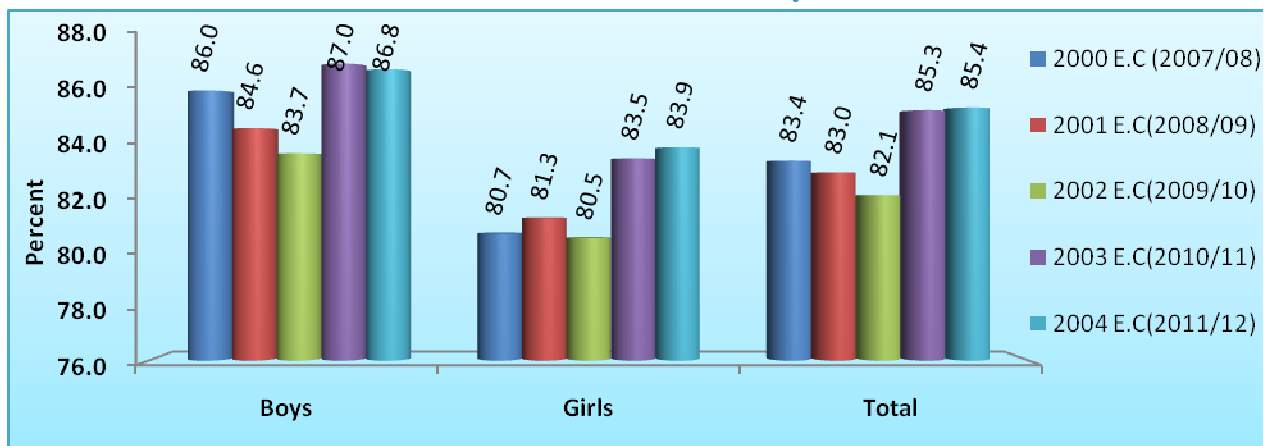

Chart 4.6 shows the trend of NER for the last five years. As noted, in the year 2004 E.C. (2011/12) NER almost remained the same as of the year 2003 E.C (2010/11), it also indicates that the gender gap in NER has narrowed the last five years.

Table 4.10 Net Enrolment Rate (NER) at Primary (1-8) Level by Region

Region	Male in (%)	Female in (%)	Total in (%)	Region	Male in (%)	Female in (%)	Total in (%)
Tigray	90.3	93.9	92.1	SNNP	94.9	86.9	91.0
Afar	33.9	37.5	35.4	Gambella	108.1	96.4	102.6
Amhara	91.0	94.5	92.7	Harari	83.5	70.9	77.1
Oromiya	86.4	80.6	83.6	Addis Ababa	79.1	74.7	76.6
Somali	65.3	61.6	63.7	Dire Dawa	74.6	68.6	71.6
Benishangul Gumuz	100.3	86.4	93.4	Total	86.8	83.9	85.4

Table 4.10 and chart 4.6 highlight the relative contribution of each region to the national NER. It indicates that Amhara, Tigray, Benishangul Gumuz, Gambella, and SNNP rank above the National average and the others rank below the national average. Afar and Somali still have lower achievement compared to the other regions. This suggests that the education system should put more effort into these regions to enhance the on-time participation of students in primary education. The NER for males in Gambella and Benishangul Gumuz is above 100%, which is theoretically not possible and this may require further investigations.

Chart 4.7 Grade 1-8 NER by Region and Gender, 2004 E.C. (2011/12)

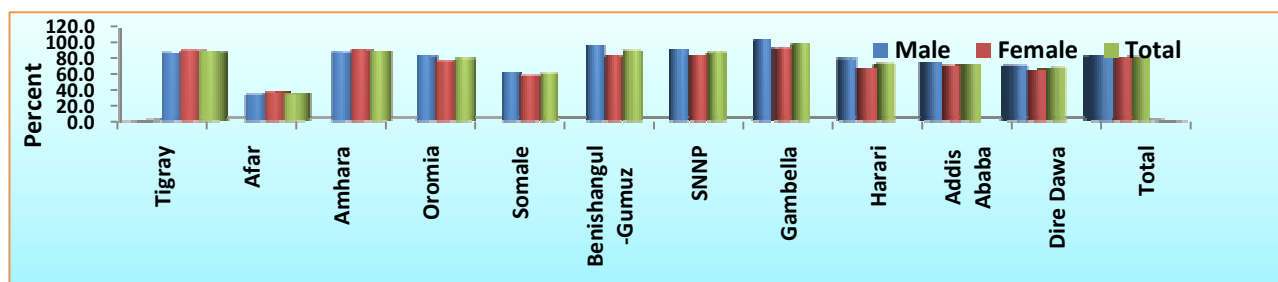

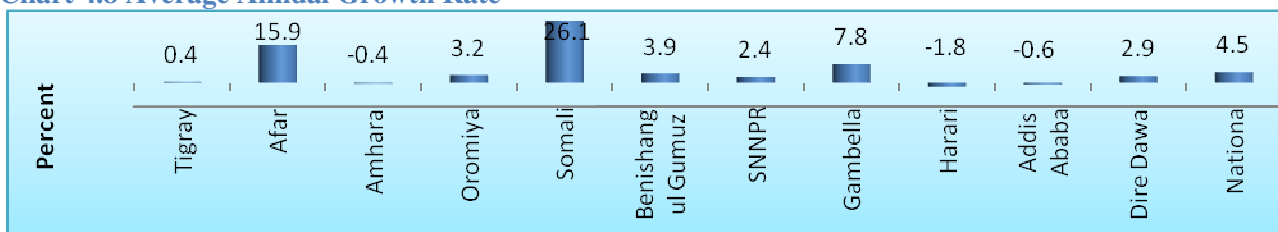

Chart 4.7 indicates that, the NER for girls exceeds that of boys in three regions, Amhara, Tigray, and Afar. **Interestingly, Amhara and Tigray are also comparatively high performing regions, in terms of high NERs** and accompanied by high gender parity in net enrolment. It is observed that the gender gap is high in the four regions; Benishangul Gumuz, Harari, Gambella, and SNNP.

Primary Enrolment – Average Annual Growth Rate

The average annual growth rate of enrolment shows how coverage is progressing every year in each region and nationally. Chart 4.8 below shows that enrolment nationally increased by 4.5%. The higher annual growth rate is registered in Somali, Afar and Gambella, which is 26.1%, 15.9%, and 7.8% respectively. For Amhara, Harari, and Addis Ababa the annual growth rate has decreased.

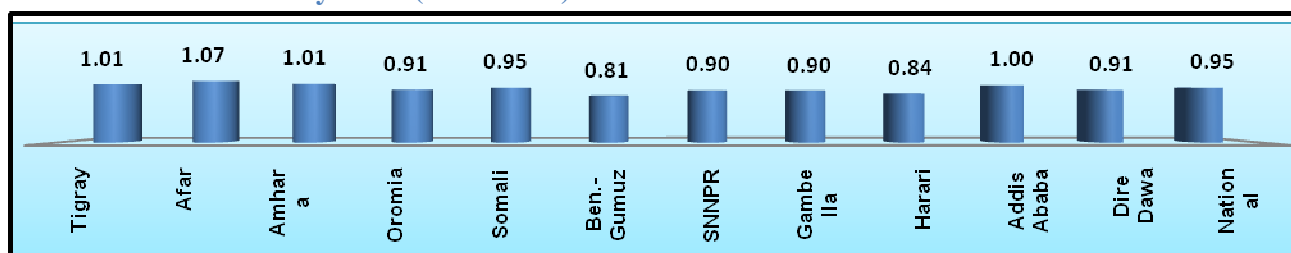

Chart 4.8 Average Annual Growth Rate

Gender Parity Index (GPI) at Primary Level (1-8)

In relation to access measures, GPI is an important indicator of balanced programs to boost enrolment and participation in education. No nation has been able to achieve comprehensive basic education without programs that assist girls. The GPI is the ratio of female to male GER for all level. In a situation of equality between boys and girls enrolment rates, GPI is 1, while 0 indicates the highest disparity.

Chart 4.9 GPI at Primary Level (Grades 1-8)

As noted in Chart 4.9, gender parity is higher in Addis Ababa, Amhara, and Tigray and lower in Benishangul-Gumuz and Harari.

Urban-Rural Enrolment

Urban-Rural comparisons are important in education since any type of universal primary education must involve rural areas. A comparison of rural and urban enrolment indicates that 80.1% of primary enrolment (regular, evening and Alternative Basic Education) was accounted for by rural areas and 19.9% by urban. However, for secondary (9-10), the situation is the reverse, in which urban enrolment is 85.5%, while rural enrolment is 14.5%.

The table below highlights, as is the case in most countries that the proportion of girls in all levels of schooling tends to be higher in urban areas than rural. Importantly, as noted in the GPI, the gender gap there appears to be continuing to close in urban primary schools.

Table 4.11 Urban/Rural Enrolment by Level

Level	Urban Enrolment					Rural Enrolment				
	Male	Female	% Male	% Female	% Urban	Male	Female	% Male	% Female	% Rural
Primary (1-8)	1,682,430	1,696,953	49.8	50.2	19.9	7,183,061	6,427,340	52.8	47.2	80.1
Secondary (9-10)	659,650	573,347	53.5	46.5	85.5	115,790	93,439	55.3	44.7	14.5
Secondary (11-12)	176,358	132,264	66.6	33.4	95.3	8,555	6,608	56.4	43.6	4.7

Pupil-Teacher Ratio (PTR)

PTR is one of the common education indicators for efficiency and quality. There are two views on PTR;

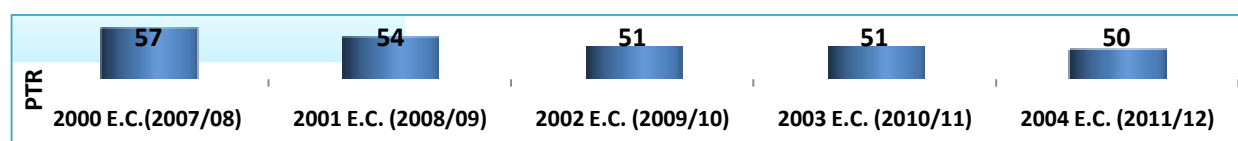

- The lower the PTR the better the opportunity for contact between the teacher and pupils and for the teacher to provide support to students individually, thereby improving the quality of education;
- On the other hand, very low PTR may indicate inefficient use or under utilization of teachers resulting in low efficiency.

Therefore, low or high PTR alone does not explain the quality of education because quality of education depends on other factors such as mode of delivery, commitment, qualification of teachers, the supply of educational materials, and other issues.

This indicator is useful for setting minimum standards throughout the country and ensuring a certain level of equality around the country. In Ethiopia, the standard set for PTR is 50 at primary (1-8) and 40 at secondary level.

Chart 4.10 below shows the relative change in primary PTR for the last five years. As indicated, despite substantial growth in enrolment, Ethiopia has managed to reduce PTR in all years. This chart also indicates that for the current 2004 E.C (2011/12) PTR has achieved the national standard of 50.

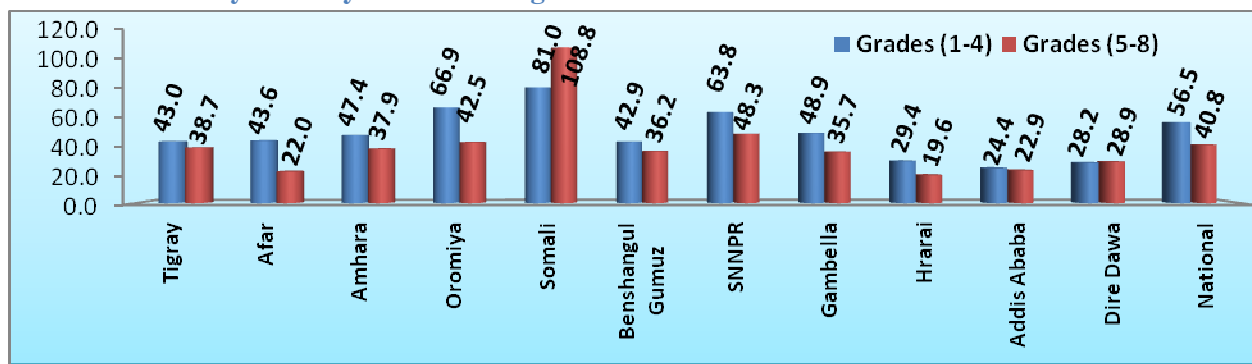

Chart 4.10 Primary Pupil Teacher Ratios (Grades 1-8)

Though the national PTR reflect the general direction, there is a remarkable variation among regions in both lower and upper primary education.

Chart 4.11 below shows both the PTR variation by region, and by upper and lower level primary. As noted, generally the lower level (grades 1-4) shows higher PTR than the upper level (grades 5-8)

Chart 4.11 PTR by Primary Level and Region

As shown in chart 4.11 PTR at the national level is 56.5 for the first cycle primary and 40.8 for the second cycle primary for the year 2004 E.C (2011/12). All regions are below the national average for both cycles except Somali, SNNP, and Oromiya which are above the national average for the first cycle primary and Somali, SNNP, and Gambella for the second cycle.

Certified Primary School Teachers

In addition to sufficient teachers, certified/trained teachers are also important to the education system. According to national standards, the primary education (1-8) requires teachers with minimum qualification from College of Teacher Education (CTE).

The table below shows the proportions of certified primary school teachers at a national level for the two cycles of primary education. It is noted that there has been a rapid growth in certified teachers for the upper primary (5-8) for the last five years, but due to a policy change, which teachers with Training Institution (TTI) certificates are not considered as qualified teachers for the first cycle (1-4) primary from the year 2002 E.C (2009/10) onwards, there is a lower qualified teachers in lower primary (1-4) for the last two years. However comparing the last three years, after the policy change, it is observed that there has been a rapid growth in qualified teacher at lower primary (1-4).

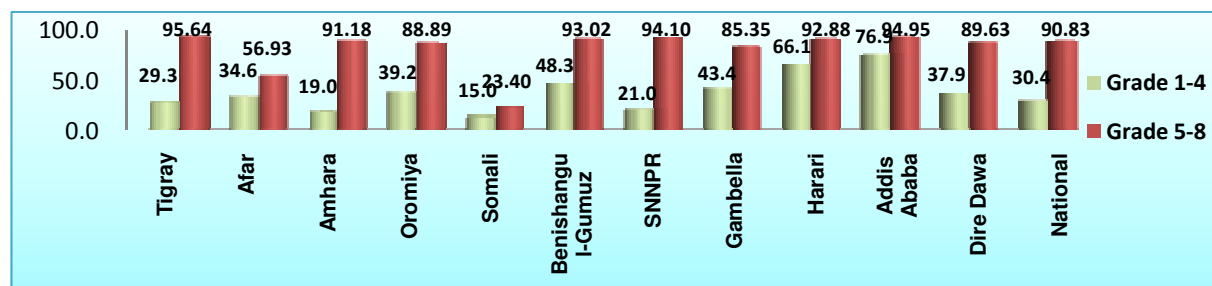

Table 4.12 Certified Primary Teachers

Level \ Year	% Qualified Teachers				
	Diploman and Above				
	2000 E.C (2007/08)	2001 E.C (2008/09)	2002 E.C (2009/10)	2003 E.C (2010/11)	2004 E.C (2011/12)
1st Cycle (1-4)	97.3*	89.4*	15.5	20.9	30.4
Male	97*	90.8*	14.6	19.1	27.3
Female	97.5*	92.3*	16.6	23.3	34.7
2nd Cycle (5-8)	66.3	71.6	77.8	84.5	90.8
Male	64.1	69.6	82.4	84.2	89.3
Female	72.5	76.8	76.8	85.2	93.8

*Teachers with certificates from Teacher Training Institution (TTI) were considered qualified until 2001 E.C. After 2001 E.C (2008/09 a new policy was introduced. A teacher has to get a diploma from Teacher Training Colleges (CTE) to be qualified to teach in the first cycle of primary (1-4).

Chart 4.12 below shows the proportion of qualified primary school teachers at regional level. It can be seen that most of the teaching staffs in the upper level primary education are trained.

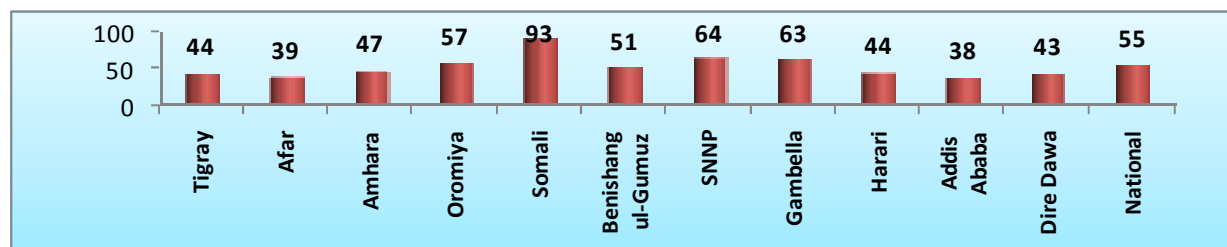

Chart 4.12 Certified Primary Teachers at Primary Level by Region

Pupil-Section Ratio (PSR)

The PSR is generally an efficiency indicator. In Ethiopia’s case, because there are a number of double-shift schools (about 26.8% at the primary level) classrooms are shared, so that the PSR is not equivalent to a Pupil Classroom Ratio (PCR). A lower ratio in comparison to a national standard may mean under utilization of resources, while a higher ratio often indicates overcrowding. The PSR is 55 for the year 2004 E.C (2011/12), which is higher than the target set in ESDP III by 7.4. To bring this ratio to the target set, more schools will need to be built, or more sections should be created.

Chart 4.13 PSR for 2004 E.C (2011/12) by Region

Repetition and Drop-out Rates

These rates help to understand how the education system utilizes efficiently the limited resources and time. These rates are commonly used to measure the efficiency of the education system in producing graduates of a particular education cycle or level. A student has three paths in a particular academic year, i.e. promotion, repetition or drop-out. Repeating a grade means using more resources than allocated to a student; and leaving a school (drop-out) before completing a particular cycle or level of education is also a waste of resources. Lower repetition and lower drop-out rates overall and at each grade level are the indications of proper utilization of limited resources. It is important to note the particular way in which Ethiopia calculates repetition rates, and hence calculates drop-out rates.

Repetition Rate

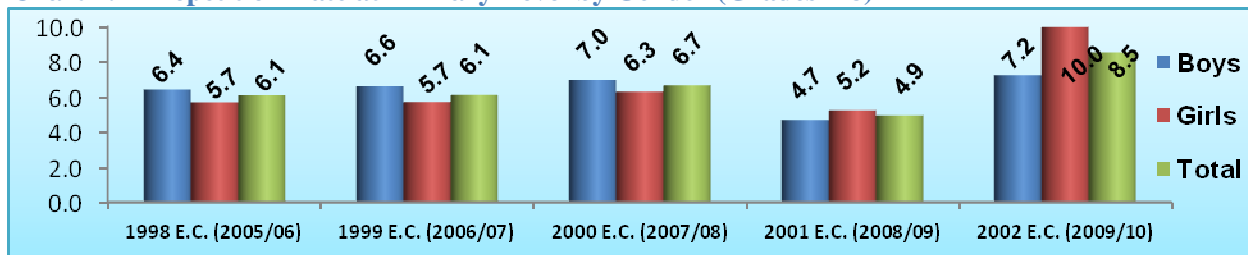

This indicator measures the proportion of students who have remained in the same grade for two or more consecutive years by retaking the grade having either left the grade prematurely or returning for a second or third time. Any repetition reduces the efficiency of the education system, and is also, at times, an indication of too high PTR, unqualified teachers, or lack of learning materials. Current national policy requires that promotion is based on students' continuous assessment results for the first three grades of primary. Repeaters in these grades are still higher than expected. Ethiopia uses the term "readmit" to characterize any student not repeating within one year, to calculate repetition rates.

Table 4.13 shows similar trend in repetition rates for boys and girls over the first two years and the last two years. In the year 2001 E.C (2008/09), there was a great achievement, which saw the repetition rate decreased by 1.8 percentage points from the previous year. However, in the year 2002 E.C the rate is significantly increased by 3.6 percentage points. Though there was an increased repetition rate for boys in the same year, the girls' repetition rate was higher than he boys.

Table 4.13 Primary Repetition Rate by Gender (Grades 1-8)

Year	Boys (%)	Girls (%)	Total (%)
1999 E.C. (2006/07)	6.6	5.7	6.1
2000 E.C. (2007/08)	7.0	6.3	6.7
2001 E.C. (2008/09)	4.7	5.2	4.9
2002 E.C. (2009/10)	7.2	10.0	8.5
2003 E.C. (2010/11)	8.7	8.2	8.5

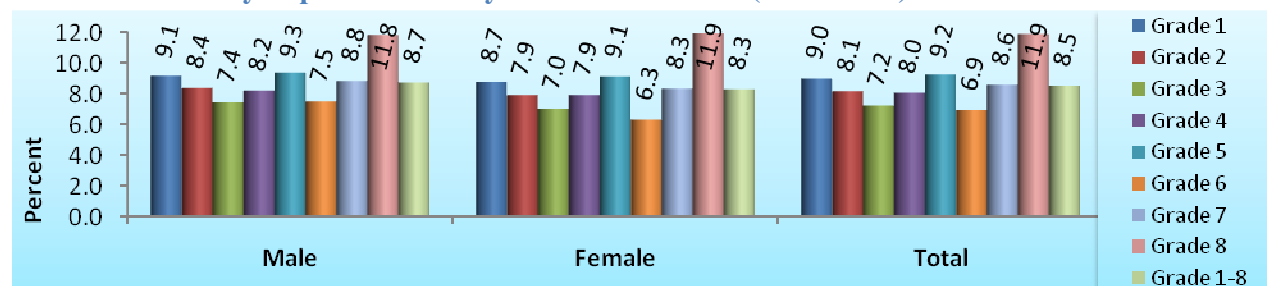

Chart 4.14 Repetition Rate at Primary Level by Gender (Grades 1-8)

Repetition rates by grade- 2003 E.C. (2010/11)

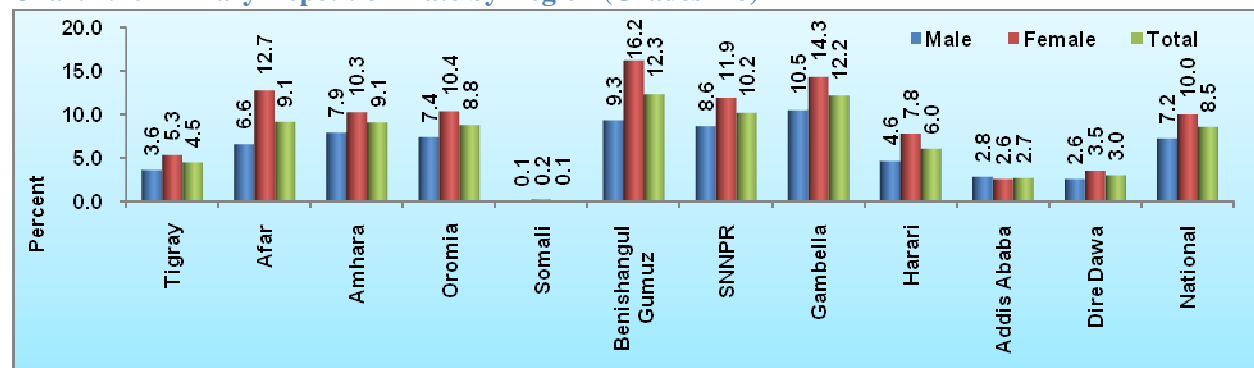

As noted in the chart 4.15 below, the lowest repetition rate was registered in grade 6 and the highest in grade 8. In all grades, girls' repetition rate was higher than that of boys especially in grade 8. The repetition rate for grade 8 is higher, partly because of a national policy that those who do not pass the Primary School Leaving Certificate Examination must repeat grade 8 prior to retaking the examination.

Chart 4.15 Primary Repetition Rate by Grade and Gender (Grades 1-8)

As noted in chart 4.18 below, repetition rates are relatively high across some regions, with several exceptions. Somali, Harari, Dire Dawa, Addis Ababa, Tigray, and Oromiya had repetition rates below the national average of 8.5%. Benishangul Gumuz, Gambella, and Afar had the highest repetition rates. Female repetition rate is highest in Benishangul Gumuz, Gambella, and Afar and lowest in Addis Ababa, Dire Dawa, and Somali.

Chart 4.16 Primary Repetition Rate by Region (Grades 1-8)

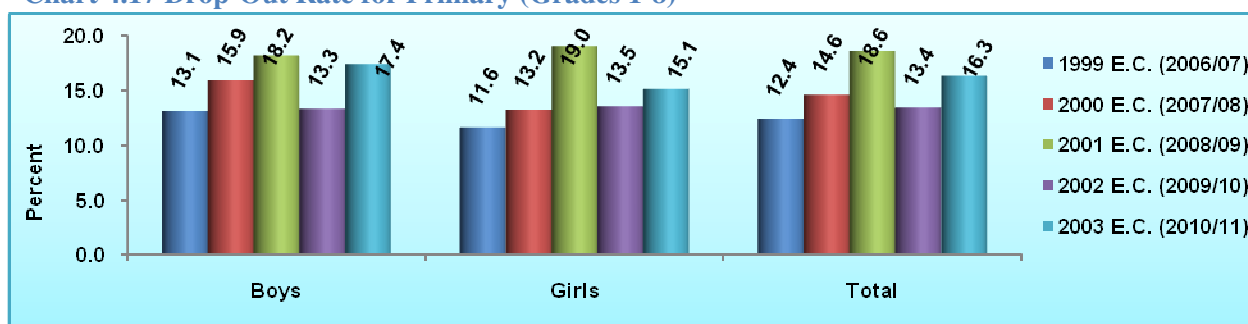

Dropout Rate for Primary

The drop-out rate is a measure, typically by grade, of those who leave formal schooling. In most cases it is calculated as the remainder after subtracting from enrolment, of those who repeat and those who are promoted to the next grade. As noted earlier, Ethiopia's use of the concept of "readmit", artificially lowers repetition, but raises dropout rates. Nonetheless, a national trend downward for this measure is important. As many countries have discovered, often students do not completely drop-out, they may join education several years later, or seek out alternative education. As noted in table 4.14 and chart 4.17 the trend in drop-out rates nationally has an irregular pattern with the highest dropout rate in the year 2001 E.C. (2008/09) and least in 1999 E.C (2006/07).

Table 4.14 Drop-out Rate for Primary (Grades 1-8) by Gender

Year	Dropout Rate		
	Boys	Girls	Total
1999 E.C. (2006/07)	13.1	11.6	12.4
2000 E.C. (2007/08)	15.9	13.2	14.6
2001 E.C. (2008/09)	18.2	19.0	18.6
2002 E.C. (2009/10)	13.3	13.5	13.1
2003 E.C. (2010/11)	17.4	15.1	16.3

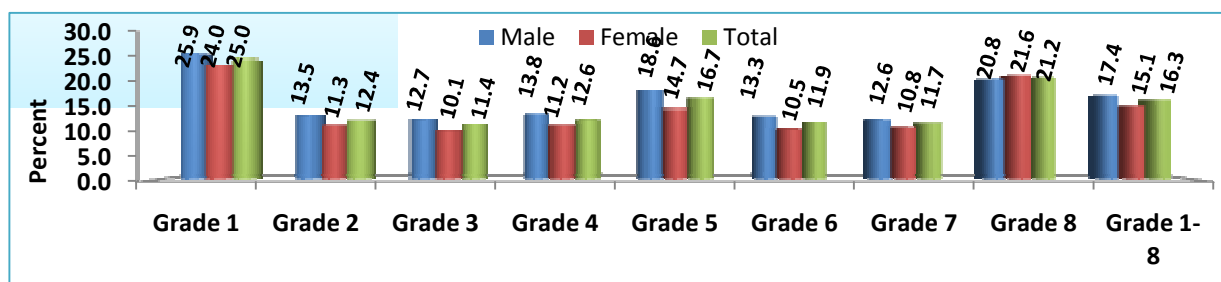

Chart 4.17 Drop-Out Rate for Primary (Grades 1-8)

Drop-out rates by grade

The proportion of pupils who leave school varies from grade to grade. The dropout rate is higher for grade 1, grade 5, and grade 8. At national level, 25.0% of pupils enrolled in grade 1, in 2003 E.C (2010/11), have left school before reaching grade two in 2004 E.C (2011/12). This shows that to decrease drop-out at primary school (grades 1 to 8) the Ethiopian education system has to focus on decreasing grade 1 drop-out rates because, if grade 1 students are kept in the system the probability of dropping out in future grades is much less.

Chart 4.18 Drop-Out Rates in Primary (1-8) by Grade - 2003 E.C. (2010/11)

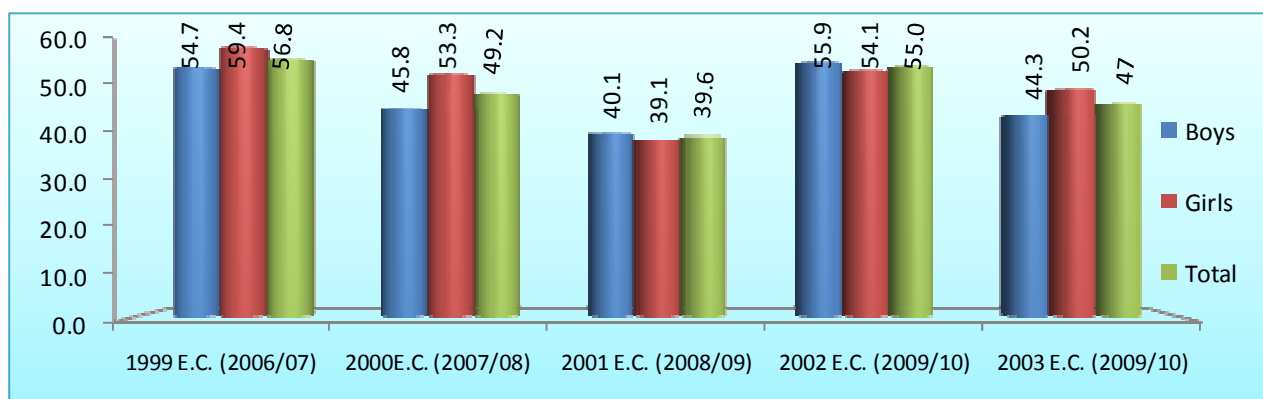

As noted in chart 4.20, for all grades except for grade 2 and grade 8, the rate of drop-out is slightly lower for boys than for girls.

Survival Rate to Grade 5

The survival rate to grade 5 is used to estimate the percentage of students who will complete the first cycle of primary education. The completion of at least 4 years of schooling is considered as a prerequisite for a sustainable level of literacy. Survival rates approaching 100% indicate a high level of retention and low incidence of dropouts. The reliability of this indicator depends on the consistency of data on enrolment and repeaters both in terms of coverage over time and across grades as it is calculated based on these figures. A “synthetic cohort method” is applied to calculate this rate by assuming a group of pupils, typically 1,000, who are enrolled together and proceed to the 5th grade, sometimes with repetition up to two times, and sometimes without.

Chart 4.21 below shows a five years survival rate to grade 5. Survival rates will always be one year behind the current year data since it requires measurement of enrolment and repetition from the next year. Generally the survival rate to grade 5 decreased for the first four years but significantly increased in the year 2002 E.C (2009/10) by about 15 percentage points. In addition, the gender gap for boys and girls is almost the same.

Chart 4.19 Survival Rate to Grade 5

This chart also shows that 35 percent of pupils did not continue into the second cycle of primary over the last five years.

Primary Completion Rate (PCR) (proxy method)

Internationally the PCR is an established measure of the outcomes of an education system. It has been specified as one of the two major education indicators for the Millennium Development Goals (MDGs). It is calculated in the following way:

$$\frac{\text{New Pupils in last Grade}}{\text{Population official age in last grade}}$$

Where “New Pupils in last Grade”= total pupils in last Grade – repeaters in last Grade.

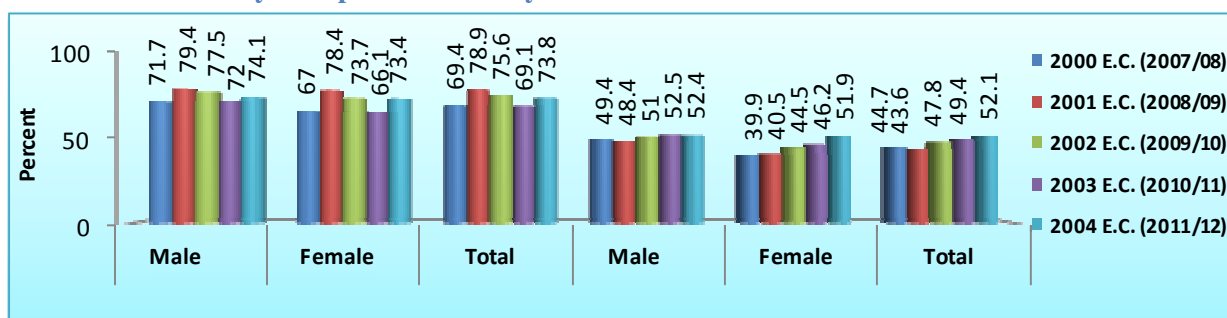

The PCR is highly dependent on the accuracy of the single age population for both points of measurement (for grade 5, age 11, and for grade 8, age 14) and the accurate measurement of repeaters in each grade. Again, with adjustments for Ethiopian approaches for calculation of both values i.e. single age ranges and repeaters, a steady upward trend in completion rates is important.

Table 4.15 and chart 4.20 show the consistent increase in completion rates for grade 5 except for the year 2002 E.C (2009/10) where there is a decrease in grade 5 completion rates. When compared to grade 8 the gender gap for completion rate is narrow in grade 5. The completion rate of female students for grade 8 has gradually increased for the last five years.

Table 4.15 Primary Completion Rate by Gender

Year	Grade 5			Grade 8		
	Male %	Female %	Total %	Male %	Female %	Total %
2000 E.C. (2007/08)	71.7	67.0	69.4	49.4	39.9	44.7
2001 E.C. (2008/09)	79.4	78.4	78.9	48.4	40.5	43.6
2002 E.C. (2009/10)	77.5	73.7	75.6	51.0	44.5	47.8
2003 E.C. (2010/11)	72.0	66.1	69.1	52.5	46.2	49.4
2004 E.C. (2011/12)	74.1	73.4	73.8	52.4	51.9	52.1

Chart 4.20 Primary Completion Rates by Gender

Generally, survival rates to grade 5 and completion rates should move in a similar pattern, and match each other for gender disparity. But the data in this case, did not represent this reality.

Enrolment of Children with Special Educational Needs

According to the data collected the total number of students with special education needs in 2004 E.C (2011/12) in primary (grades 1-8) is around 43,132 but the numbers who are currently attending schools is expected to exceed this figure.

Table 4.16 Enrolment of Children with Special Educational Needs Primary (1-8)

Disability	Primary (1-8)		
	Male	Female	Total
Visually Impaired	3688	2659	6347
Physically Impaired	7148	5084	12232
Hearing Impaired	5404	4320	9724
Mentally Retarded	6580	4734	11314
Other	2005	1510	3515
Total	24825	18307	43132

School Facilities at Primary (1-8)

School facilities have an impact on access, quality, efficiency and equity. The school facilities are tools to attract students in general and girls in particular. The availability of water, latrines, clinics, libraries, laboratories and pedagogical centers in schools in 2004 E.C (2011/12) are presented in table 4.17 below.

Table 4.17 School Facilities-Primary (1- 8)

Region	Number of Schools	Water			Latrine			Clinic	Library	Pedagogical Center
		Access to Water	Tap	Well	Boys Pits	Girls Pits	Boys Girls Pits			
Tigray	1995	746	346	95	4187	4237	1163	482	862	901
Afar	476	192	82	75	556	523	81	84	75	53
Amhara	7327	2386	878	528	7942	8141	2940	1453	3536	3434
Oromiya	11729	4153	1480	1358	21570	19727	6354	1512	5127	7549
Somali	928	250	19	23	1024	1154	913	157	20	12
Benishangul-Gumuz	448	195	22	33	789	750	184	45	148	211
SNNP	5404	2032	874	727	14881	13793	1237	993	2344	2704
Gambella	229	72	29	5	221	230	53	28	19	18

Addis Ababa	770	713	561	40	2971	2810	707	635	635	557
Dire Dawa	107	98	32	2	293	306	81	71	52	50
Total	29,482	10,880	4,365	2,887	54,607	51,831	13,735	5,504	12,855	15,516

Note: This table acknowledges that not all primary schools include the second cycle (grades 5-8).

In 2004 E.C (2011/12);

- **Water:** 36.9% (10,880) of primary schools have reported that they have water facilities. Some schools have two sources of water.
- **Latrines:** More than 90% of all schools reported that they have latrines.
- **Clinics:** Of all schools, 18.7% have reported that they have clinics for students.
- **Pedagogical Center:** 52.6% of the primary schools reported that they have pedagogical centers that teachers use for producing teaching aids.
- **Libraries:** 43.6% of all primary schools have library facilities.

C. ALTERNATIVE BASIC EDUCATION (ABE)

To realize the goal of providing universal access to primary education by 2008 E.C (2015/16), ESDP III envisaged provision of basic education through alternative modes. Accordingly, in the last four to five years, in specific regions centers for ABE were established. Most ABE activities are accomplished in Basic Education Centers, and are designed to enroll the same age group as regular primary education. Since 1998 E.C (2005/06), ABE enrolments have been included in reporting of regular education and therefore GER and NER reflect the contribution of ABE to primary education in Ethiopia.

Table 4.18 Enrolments Trends in Alternative Basic Education by Gender

Year	2000 E.C. (2007/08)	2001 E.C. (2008/09)	2002 E.C. (2009/10)	2003 E.C. (2010/11)	2004 E.C. (2011/12)	AAGR
Male	349,863	422,512	531,203	459,816	405,104	3.7%
Female	287,380	357,830	424,491	362,172	310,864	2.0%
Total	637,243	780,342	955,694	821,988	715,968	3.0%

As noted from the above table, ABE has made an average contribution to the enrolment of primary education of 782,224 for the past five years and contributes additional 4-5 percent coverage to the GER for primary education. The ABE enrolment is decreased by more than 100,000 compare to the previous year.

Table 4.19 shows the ABE enrolment by region and sex. Nine regions are actively running ABE programs, with the largest enrolment in Somali and Oromiya.

Table 4.19 Enrolments of ABE by Region and Sex – 2004 E.C (2011/12)

Region	Pupils Enrolled			Total Number of Trainers			Trained as facilitators		
	Male	Female	Both	Male	Female	Both	Male	Female	Both
Tigray	8686	8155	16841	111	105	216	7	6	13
Afar	24855	17284	42139	691	47	738			0
Amhara	31479	30848	62327	1387	699	2086			0
Oromiya	71978	58353	130331	3350	1160	4510	491	187	678
Somali	198050	131693	329743	3498	258	3756	444	13	457
Benishangul	13386	10762	24148	472	114	586	107	38	145
SNNP	43475	34837	78312	1155	338	1493	138	49	187
Gambella	5875	4410	10285	106	13	119	17	4	21
Addis Ababa	7320	14522	21842	216	343	559	39	42	81
National	405104	310864	715968	10986	3077	14063	1243	339	1582

Note: Harari and Dire Dawa do not report their ABE programs.

The gross enrolment rate in the ABE program for 1st cycle primary is 4.0% for both sexes, 4.5% for females and 3.6% for males.

D. ADULT AND NON-FORMAL EDUCATION

Adult and Non-Formal Education is designed to address the primary education needs of adults and others who are substantially older than the traditional primary school going ages of 7-14. Data capturing for these programs, as acknowledged by the government, is comparatively new in Ethiopia, and reporting accuracy is very uneven because many such programs are operated by non-government entities, and because many regions are not yet fully sensitized to the role of this type of education.

Table 4.20 outlines the enrolments of Adult and non-formal education as of 2004 E.C (2011/12). According to the data below, Adult and Non-formal Education program run by government and non-governmental organizations are predominantly in Oromiya.

Table 4.20 Enrolments of Adult and Non-Formal Basic Education

Region	Enrolment		
	Male	Female	Total
Tigray	54192	39588	93780
Afar	1460	1742	3202
Amhara	168,219	56432	224,651
Oromiya	814415	526233	1340648
Somali	3191	2341	5532
Benishangul Gumuz	226348	165527	391875
SNNP	2609	2339	4948
Gambella	8510	14780	23290
Addis Ababa	3007	1301	4308
National	1,281,951	810,283	2,092,234

E. SECONDARY EDUCATION

Secondary education has been implemented in Ethiopia for many years providing for post-primary education in the first cycle (grades 9-10) and the second cycle (grades 11-12). The focus of secondary education growth has been predominantly in the first cycle. Eighty six out of every hundred students in secondary education are in the first cycle. National examinations (Ethiopian General Secondary Education Certificate Examination) are given at grade 10 to certify completion of general secondary education and to select students that qualify for the next higher level of education, the preparatory program or TVETs.

While enrolment in all secondary (grades 9-12) has grown by over 3.9 % per year, reaching nearly 1.76 million students in 2004 E.C (2011/12), the highest growth has occurred in the first cycle, now enrolling 1.44 million students, and employing the majority of the 59,349 teachers in secondary education.

Secondary Gross Enrolment Rate (GER)

The secondary GER compares those students, regardless of age, with the population of the appropriate age range. For Ethiopia, the ages for first cycle secondary (General Secondary) would be 15-16, and that for second cycle, 17-18 years of age.

Table 4.21 below shows the secondary enrolment by cycle, gender, and the GER for each. As can be seen from the table, over five years, enrolment for grade 9-12 has grown, but in the first cycle the rates for boys are still greater than that of girls. However, in both cycles, the average annual growth rate is higher for girls than boys.

Table 4.21 Secondary Enrolment by Cycle and Gender, and GER

Cycle Year	Secondary 1 st Cycle						Secondary 2 nd Cycle					
	Enrollment			GER %			Enrollment			GER %		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total

Dire Dawa	1,929	990	2,919	1,512	711	2,223	1,365	785	2,150	1,368	973	2,341	1,357	1,028	2,385	-4.9%
Total	130,533	62,911	193,444	146,547	58,713	205,260	156,194	86,886	243,080	169,571	118,645	288,216	184,913	138,872	323,785	13.7%

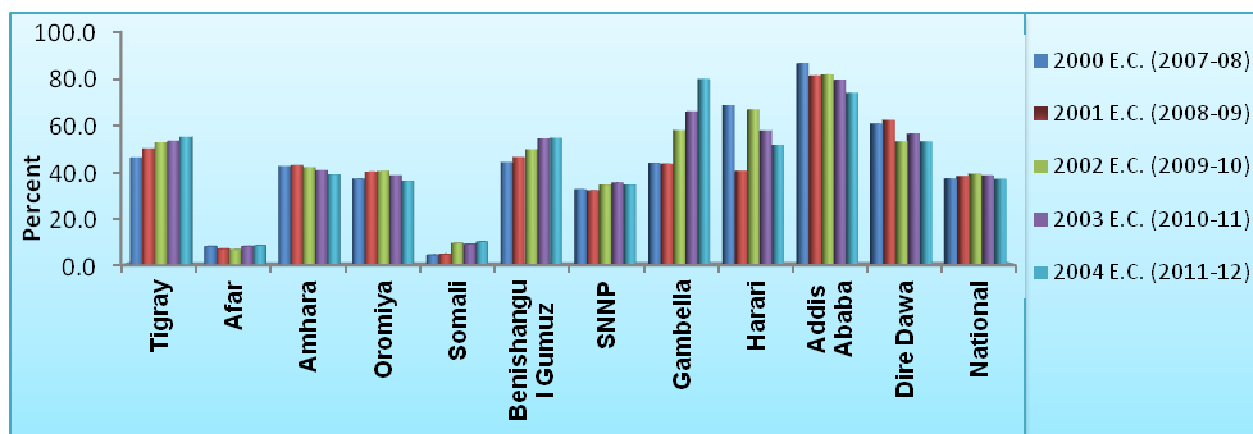

As can be seen in chart 4.21, like in the primary education the gender disparity is high in secondary education.

Chart 4.21 GER by Gender for Secondary First Cycle (9-10)

From the chart below, when GER is reviewed by region it is observed that Addis Ababa, Dire Dawa, Benishangul Gumuz, Gambella, Harari, and Tigray have higher GER compared to the national average. Afar, Somali, as well as SNNP have lower GER.

Chart 4.22 Secondary GER by Region (9-10)

Secondary Net Enrolment Rate (NER)

As with the primary NER, the secondary NER measures the enrolment of children of the appropriate age (for first cycle, 15-16 years old) divided by the population of that age. NER is ideally 100%, but for secondary education this is seldom achieved. Very low NER suggests a large number of over-aged students enrolled.

Table 4.23 shows the current statistics for secondary NER in the first cycle. It is clear that there is a large discrepancy between GER and NER for the first cycle, indicating that secondary education is highly dominated by over-aged students. This may be due to delayed graduation from primary school, or it may

be because of examination barriers, supply barriers, or financial barriers to transferring from grade 8 of primary to grade 9 of secondary education.

Table 4.23 Net Enrolment Rate at Secondary First Cycle (9-10)

Year	NER		
	Boys (%)	Girls (%)	Total (%)
2000 E.C. (2007/08)	15.4	12.2	13.8
2001 E.C. (2008/09)	15.0	11.9	13.5
2002 E.C. (2009/10)	16.8	16.1	16.4
2003 E.C. (2010/11)	16.4	16.2	16.3
2004 E.C. (2011/12)	16.9	17.6	17.3

There has been a 3.5 percentage point increase in NER in the last five years and a 1 percentage point increase since last year. The gender gap increased by 0.5 percentage point in the year 2004 E.C. (2011/12) from the previous year.

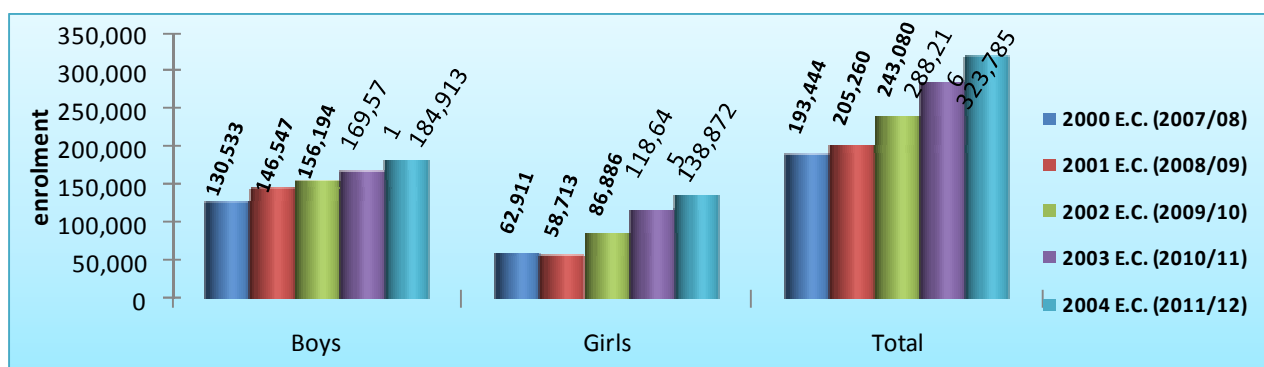

Enrolment in Preparatory Program (11-12)

As noted in table 4.24, the total number of students enrolled in grades 11 and 12 (preparatory grades) in 2004 E.C. (2011/12) is 323,785 out of which 43 % are girls, which is an increase of 6 percentage points compared to the previous year. The annual growth rate for both genders in the last five years is 13.7%, with AAGR for girls being 21.9%. The gap between boys and girls enrolment has been narrowed since 2003 E.C. (2010/11), and this gain should be maintained in the coming years.

Table 4.24 Enrolment in Preparatory Program (11-12)

Year	Enrolment		
	Boys	Girls	Total
2000 E.C.(2007/08)	130,533	62,911	193,444
2001 E.C.(2008/09)	146,547	58,713	205,260
2002 E.C.(2009/10)	156,194	86,886	243,080
2003 E.C.(2010/11)	169,571	118,645	288,216
2004 E.C.(2011/12)	184,913	138,872	323,785
AAGR	9.1%	21.9%	13.7%

Chart 4.23 Enrolments in Preparatory Program (11-12) by Gender

As chart 4.23 above indicates, the girls’ enrolment shows a consistent increase over the last four years and the both sex and that boys enrolment has grown evenly for the last five years. The gap between boys’ enrolment and girls’ enrolment has reduced in 2004 E.C (2011/12). This indicates that the number of girls joining preparatory grades is increasing. As with the first cycle of secondary, patterns in second cycle secondary will obviously affect the gender gap in tertiary education.

Secondary Gender Parity Index (GPI)

A calculation for first cycle secondary education (grades 9-10) shows that the GPI for 2004 E.C (2011/12) is 0.88 and for the second cycle (grades 11-12) is 0.76.

Pupil-Teacher Ratio (PTR) Secondary (9-12)

It was only in 1998 E.C (2005/06) that teachers in the preparatory program (secondary second cycle) were separately tracked. Table 4.25 shows the effect of a 15.2% average annual growth in secondary teachers over the past five years, resulting in the present 59,349 teachers.

Table 4.25 Pupil-Teacher Ratio Secondary (Grades 9-12) by Region

Region	2000 E.C. (2007/08)	2001 E.C. (2008/09)	2002 E.C. (2009/10)	2003 E.C. (2010/11)	2004 E.C. (2011/12)
Tigray	40	39	41	33	34
Afar	23	24	32	0	26
Amhara	47	41	36	29	27
Oromiya	45	45	39	33	31
Somali	92	92	34	21	34
Benishangul Gumuz	33	31	31	26	29
SNNP	53	48	42	35	34
Gambella	29	46	24	23	30
Harari	28	13	26	24	23
Addis Ababa	26	28	22	26	20
Dire Dawa	27	26	24	22	21
National	43	41	36	31	29

As noted, there is little variation among regions on PTR but the trend in the past five years shows a progress.

Certified Secondary Teachers

In contrast with primary education, the percentage of qualified teachers is higher in secondary education. Nationally, of all the secondary teachers, 90.7% are qualified for their level of teaching. There is considerable variation by region in the percentage of qualified teachers.

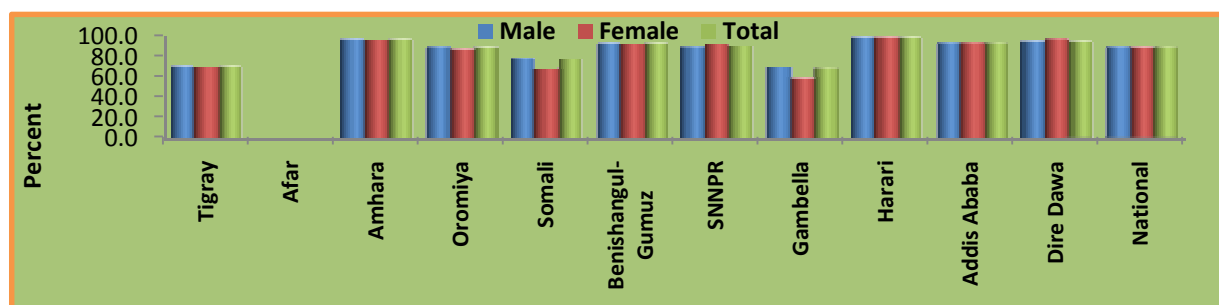

Table 4.26 shows both the variation in certified secondary school teachers by region and the proportions according to gender. Chart 4.24 indicates the same information in a graphical format.

Table 4.26 Certified Secondary School Teachers (9-12) by Region and Gender

Region	Total Secondary School Teachers			Total Degree and above Graduate Teachers			% Qualified Teachers		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Tigray	3,596	855	4,451	2,539	596	3,135	70.6	69.7	70.4
Afar	292	15	307	0	0	0	0.0	0.0	0.0
Amhara	13,079	2,547	15,626	12,818	2,468	15,286	98.0	96.9	97.8
Oromiya	16,838	2,504	19,342	15,244	2,211	17,455	90.5	88.3	90.2
Somali	953	94	1,047	753	64	817	79.0	68.1	78.0
Benishangul-Gumuz	751	63	814	706	59	765	94.0	93.7	94.0
SNNPR	8,195	1,377	9,572	7,425	1,284	8,709	90.6	93.2	91.0
Gambella	456	46	502	320	27	347	70.2	58.7	69.1
Harari	198	33	231	198	33	231	100.0	100.0	100.0
Addis Ababa	5,715	1,234	6,949	5,403	1,167	6,570	94.5	94.6	94.5
Dire Dawa	452	56	508	433	55	488	95.8	98.2	96.1
National	50,525	8,824	59,349	45,839	7,964	53,803	90.7	90.3	90.7

Table 4.26 and Chart 4.24 show the percentage of qualified teachers by gender. Nationally out of the total female teachers about 90.3% are qualified where as for males it is about 90.7%. Harari, Dire Dawa, Amhara, Benishangul Gumuz, SNNP, and Oromiya have the highest percentage of qualified teachers.

Chart 4.24 Certified Secondary School Teachers (9-12)

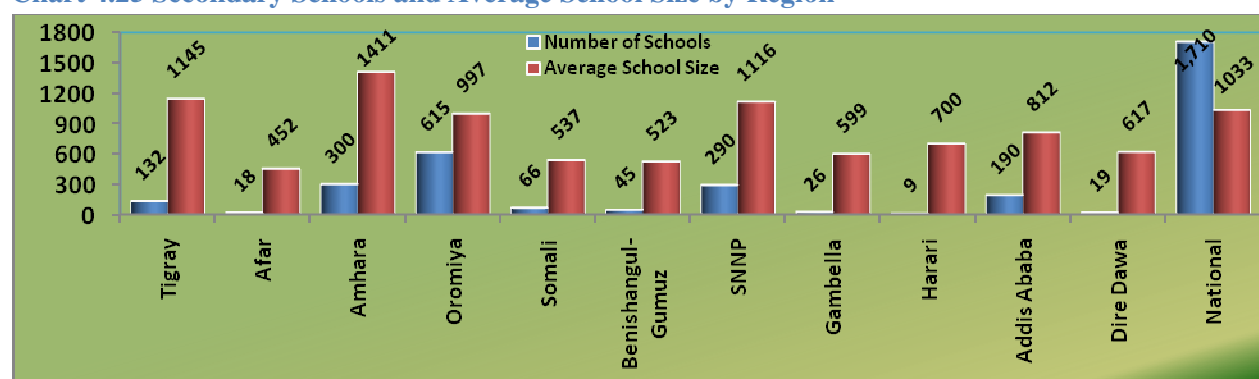

Note: In 2004 E.C (2011/12) Afar did not report the number of qualified teachers for this level.

Secondary Schools and Average School Size

As noted in table 3.4 in section 3 above, nationally new secondary schools have been opened at an average annual growth rate of 12.0 % in the last five years, almost matching that of enrolment. However, not all regions have been able to open new schools so rapidly. A calculation of the average school size (enrolment divided by number of schools) shows that nationally, for Ethiopia, the average secondary school size was about 1,033 pupils per school. This is a large average school size by international standards. In certain Ethiopian cities there are schools that are substantially larger making for a more compressed learning environment, and potentially a lower quality education.

Chart 4.25 below shows the number of schools by region for 2004 E.C (2011/12) and the average school size based on the regions' secondary school enrolment. As can be seen, Amhara, SNNP, and Tigray appear to have large average school sizes.

Chart 4.25 Secondary Schools and Average School Size by Region

Enrolment of Children with Special Educational Needs

According to the data collected the total number of students with special education needs in 2004 E.C (2011/12) in secondary lower level (Grades 9-10) is around 4,039 and secondary upper level (Grades 11-12) is around 777. But, the number of children with special educational needs who are currently attending schools is expected to exceed this figure as there might be misunderstanding of the concept among many school members.

Table 4.27 Enrolment of Children with Special Educational Needs

Disability	Grades (9-10)			Grades (11-12)		
	Male	Female	Total	Male	Female	Total
Visually Impaired	594	285	879	195	74	269

Other	185	154	339	20	21	41
National	2410	1629	4039	527	250	777

School Facilities - Secondary (9-12)

Table 4.28 shows the current status of the 1,710 secondary schools available in Ethiopia. Of particular note is the number of double shift schools needed to accommodate the rapid growth of enrolment (over 3.9%) per year and the fact that all have latrines and the majority has libraries.

Table 4.28 School Facilities - Secondary (Grades 9-12)

Region	Number of Schools	Water			Latrine			Clinic	Library	Tech Labs	Internet	Electricity	Plasma TV
		Availability	Tap	Well	Boys Pits	Girls Pits	Boys Girls Pits

Dire Dawa	19	17	12	1	105	93	13	16	17	12	3	17	95
Total	1,710	1,240	986	86	8,562	7,617	1,279	570	1,465	2,356	339	1,336	15,601

In 2004 E.C (2011/12);

- **Water:** 72.5% (1085) of secondary schools have reported that they have water facilities.
- **Latrines:** All secondary schools reported that they have latrines.
- **Clinics:** For secondary schools, 33.3% (570) of them have clinics serving students.
- **Libraries:** 85.7% (1465) of secondary schools have library facilities.
- **Laboratories:** The total number of laboratories in 1,710 secondary schools is 2,356. Some schools have two or more laboratories.
- **Internet:** 19.82% of all secondary schools have Internet access. Next to Oromiya, Addis Ababa has the largest percentage of schools (35%) with an internet connection
- **Electricity:** 1,336 schools, or 78.1%, have electricity with the largest percentage, again, in Addis Ababa.
- **Plasma TV:** Surprisingly, 65.3% of all secondary schools had Plasma TVs meaning they could provide video and large scale computer demonstrations if needed.

Examination Results for Primary & Secondary Education

According to the Ethiopian education and training policy a regional examination will be given at grade 8 to certify completion of primary education and the first national examination, the Ethiopian General Secondary Education Certificate Examination (EGSECE), will be given at grade 10 to certify completion of general secondary education and to select students that qualify for the next higher level of education. Similarly, the second national examination, the Ethiopian Higher Education Entrance Certificate Examination (EHEECE) will be given at grade 12 to place students in higher education institutions.

Table 4.29 Grade 8 Examination Summary Results of 2004 EC (2011/12)

Table 4.29 above shows that from the total number of students who sat for the grade 8 examination about 81% of them are promoted to grade 9. The highest promotion to grade 9 has been observed in Somali region (97.3%) while the least is in Afar region (54.1%). The promotion to grade 9 in Somali, Oromiya and Tigray is higher than the average (80.9%).

Table 4.30 Grade 10 Examination Summary Results of 2004 EC (2011/12)

Chart 4.26 Percentage Trends of students who achieved ≥ 2.00 in Grade 10 (EGSECE)

F. COLLEGES OF TEACHERS' EDUCATION (CTEs)

Colleges of Teachers' Education (CTEs) were classified under the higher education subsector until 1997E.C. (2004/05). Thus their data were reported under the higher education statistics.

But from 1998 E.C (2005/06) onwards the education system was changed from 12+2 diploma program to 10+3 diploma program. This change created the data gap for two years, 1998 E.C (2005/06) and 1999 E.C (2006/07). Data collection has been re-organized regarding students, graduates and academic staff of all college of teachers' education in the country. As of 2004 E.C (2011/12), there are 32 colleges of teachers' education in the country at all regions and only 24 of them have submitted their requested data.

CTEs provide the three years and above diploma program in regular, evening and summer programs. Some CTEs provide undergraduate degree and certificate programs which they didn't report these data properly. There are more than 20 different departments or streams in most CTEs that are categorized under two modalities; Linear and Cluster. Some of the departments under the Linear Modality are; Amharic, English, Local language, History, Geography, Civics, Chemistry, Biology, Physics, Mathematics, Educational Planning and Management (EDPM), Adult and Non-Formal Education (ANFE), Music, Art, and Health and Physical Education. The Cluster Modality includes Language, Social Science, Natural Science and Mathematics, and Aesthetics.

Enrolment Trends in CTEs

The total enrolment of the CTEs in all programs i.e., regular, evening and summer programs has increased from 70,649 in 2000 E.C (2007/08) to 173,517 in 2004 E.C (2011/12).

Table 4.33 Enrolment Trends in Colleges of Teachers' Education

Sex	2000 E.C. (2007/08)	2001 E.C. (2008/09)	2002 E.C. (2009/10)	2003 E.C. (2010/11)	2004 E.C. (2011/12)	AAGR
Male	42,817	49,409	85,166	97,086	99,604	23.50
Female	27,832	31,682	57,769	67,415	73,913	27.66
Total	70,649	81,091	142,935	164,501	173,517	25.19

As can be seen from table 4.33 above, in the year 2004 E.C (2011/12), 73,913 of the total enrolment are females, which is about 43% of the total enrolment. This figure indicates that girls are most likely participating in teacher education when compared with the tertiary education level.

Teaching staff Trends in CTEs

The total number of teachers in CTEs in regular program has increased from 774 in 2000 E.C (2007/08) to 2,033 in 2004 E.C (2011/12).

Table 4.34 Teaching staff Trends in Colleges of Teachers Educations

Sex	2001 E.C. (2008/09)	2002 E.C. (2009/10)	2003 E.C. (2010/11)	2004 E.C. (2011/12)
Male	680	1708	1791	1,868
Female	94	157	165	165
Total	774	1865	1956	2033

As can be seen from table 4.34 above, in the year 2004 E.C (2011/12), 165 of the total number of regular teachers are females, which is about 8.1% of the total teachers. This figure indicates that female teachers are less likely participating in teachers' education.

Graduate Trends in CTEs

The total number of graduates of the CTEs in all programs i.e., regular, evening and summer programs has increased from 16,129 in 2000 E.C (2007/08) to 33,232 in 2004 E.C (2011/12).

Table 4.35 Graduate Trends in Colleges of Teachers Education

Sex	2000 E.C. (2007/08)	2001 E.C. (2008/09)	2002 E.C. (2009/10)	2003 E.C. (2010/11)	2004 E.C. (2011/12)
Male	9,863	9,863*	17,642	15,998	19,561
Female	6,266	6,266*	10,119	10,804	13,671
Total	16,129	16,129*	27,761	26,802	33,232

*2000 EC (2007/08) data

As can be seen from table 4.35 above, in the year 2004 E.C (2011/12), 13,671 of the total number of graduates are females, which is about 41.1% of the total graduates.

G. TECHNICAL AND VOCATIONAL EDUCATION AND TRAINING (TVET)

Ethiopia is committed to participating in the competitive global market economy. This requires technical and professional citizens trained in the “ability to learn” and in specific occupations. Hence, Technical Vocational Education and Training (TVET) is often at the center of education aimed at marketable and entrepreneurial skills. Ethiopia is putting in place, in part via TVET, a comprehensive human resource development program. TVET provides training on market oriented programs based on the demand of industry for various target groups such as graduates of grade 10 as well as school leavers, people who are in employment, school drop outs, and marginalized groups in the labor market.

General Secondary Education (Grades 9-10) has expanded at over 8% per year on average for the past five years. Therefore, there has been increased demand for secondary places at the next level. To meet this demand, TVET Institutions have increased in number and the training areas have been diversified. TVET enrolment is expanding at an average of 30.0% annually.

TVET Enrolment

The total enrolment in TVET in the year 1998 E.C (2005/06) was **229,252**. As of this year, 2004 E.C (2011/12), enrolment has increased to 320,225. This figure is quite small when compared to the number of students that has been planned to be enrolled in TVET program. As noted in table 4.36 below, in the year 2004 E.C (2011/12), female enrolment constituted 47.7% of total enrolment, indicating a relatively good gender balance at the national level. It is likely that enrolments and number of TVET institutions could be higher than indicated in this document because there are government and non-government TVETs from Benishangul Gumuz, Gambella, Harari, and Afar regions which did not totally respond to the annual questionnaire but their previous year enrolment has been considered. In addition about 30 % from Oromia, 45% from Amhara and 50% from Addis Ababa did not report at all. Some TVET centers have been opened in various universities and their enrolment and staff have been separately reported as part of the higher education, rather than as part of the TVET system.

Table 4.36 Trends of TVET Enrolment by Gender

Sex	2000 E.C. (2007/08)	2001 E.C. (2008/09)	2002 E.C. (2009/10)	2003 E.C. (2010/11)	2004 E.C. (2011/12)	Average Annual Growth Rate in %
Male	119123	165910	196937	199799	167423	33.8
Female	110129	142591	156483	171548	152832	26.4
Total	229252	308501	353420	371347	320225	30.0
% Female	48.0	46.2	44.3	46.2	47.7	

Chart 4.31 shows the TVET enrolment pattern graphically. The increase has been steady from year 2000 E.C (2007/08) to 2003 E.C (2010/11), when there has been a remarkable increase in enrolment but decreased in the year 2004 E.C (2011/12).

H. HIGHER EDUCATION

Higher Education in Ethiopia includes education programs which are offered as undergraduate degree for three, four or more years and specialization degrees such as Masters and PhD programs. The higher education data has been collected from 35 government higher education institutions (31 owned by MoE plus Ethiopian Civil Service University, Defense University College, Telecommunication & Information Technology College, Kotebe College of Teachers Education) and the accredited non-government higher education institutions.

Although the 2004 E.C (2011/12) higher education data collection process is relatively better than the previous years, education data from few public higher education institutions and from about 25% of the accredited non-government institutions is not complete or not reported at all.

The higher education data as part of this annual abstract contains students enrolled; students graduated and academic staff both Ethiopians and expatriates.

The 2004 E.C (2011/12) higher education data reported here is of the second semester. Accordingly, 5.1% of students' attrition (dismissal, withdrawal, dropout, etc) has been reported in the first semester of the year. This shows that had the enrolment been in the first semester of the year, it would have been increased by about 5.1% of the reported second semester enrolment.

Enrolment in Undergraduate program

Undergraduate programs are offered for three, four or more years after completing secondary education. Completion of this program is certified by awarding a bachelor's degree. The degree of Doctor of Medicine (MD) and the degree of Doctor of Veterinary Medicine (DVM) are also undergraduate programs.

Table 4.40 and Chart 4.28 Enrolment in Undergraduate by Program-2004 E.C (2011/12)

Ownership	Regular		Evening		Summer		Distance		Total		
	Total	Female	Total	Female	Total	Female	Total	Female	Total	Female	%F
Government	250,229	66,203	54,570	16,301	85,319	19,448	28,847	9,305	418,965	111,258	26.6
Non-government	19,633	9,631	19,108	10,069	377	162	36,027	7,984	75,145	27,846	37.1
Total	269,862	75,834	73,678	26,370	85,696	19,610	64,874	17,289	494,110	139,104	28.2
% of Non-government	7.3	12.7	25.9	38.2	0.4	0.8	55.5	46.2	15.2	20.0	

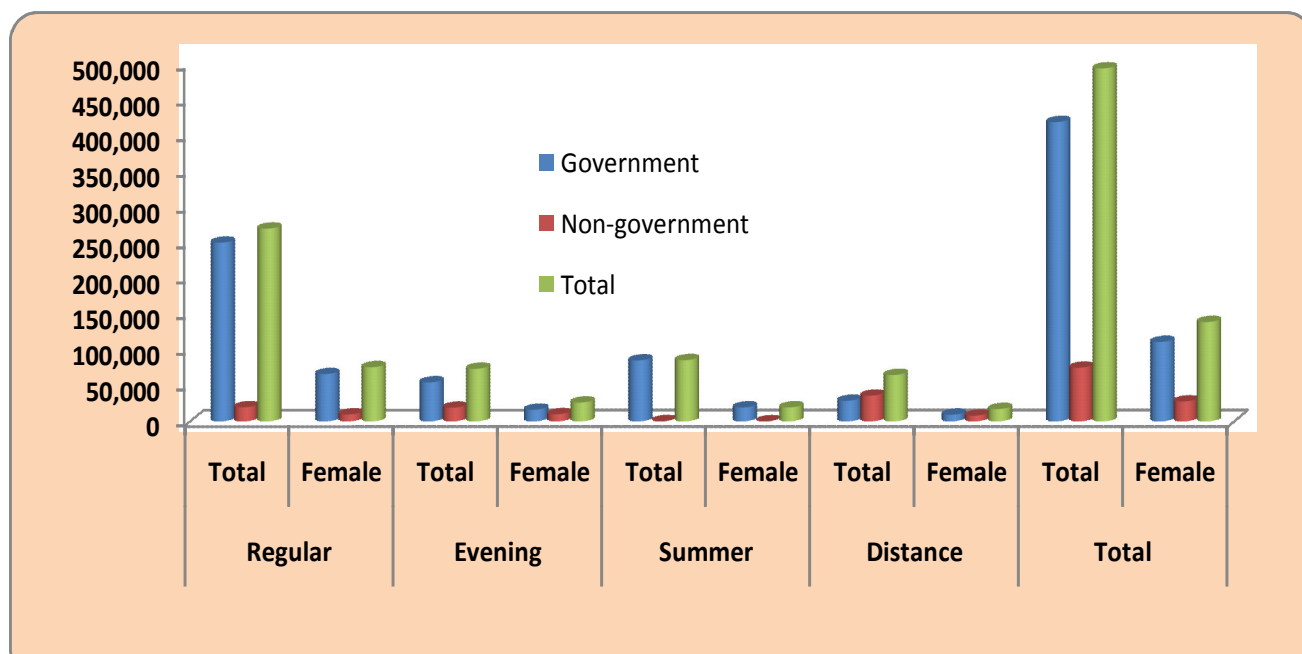

Table 4.40 and chart 4.28 above, show that in the year 2004 E.C. (2011/12) the total undergraduate enrolment (government & non-government) regular, evening, summer and distance programs is 494,110 of which 139,104 are females which accounts for 28.2% of the total enrolment. In addition, 418,965 (84.8%) of the total undergraduate enrolment is in government institutions. It can also be seen from the table and chart that undergraduate enrolment is highest in regular programs and least in distance program. The distance program is the only program in which the non-government undergraduate enrolment is higher than the government enrolment. The share of the regular program from the total undergraduate enrolment is 54.6%.

Table 4.41 and Chart 4.29 Enrolments in Undergraduate by Year-2004 E.C (2011/12)

Ownership	Year I	Year II	Year III	Year IV	Year V	Year VI & above	Total
Government	140,177	123,894	99,954	42,838	10,824	1,278	418,965
Non-government	23,316	15,394	26,560	6,586	3,106	183	75,145
Total	163,493	139,288	126,514	49,424	13,930	1,461	494,110
% of							
Non-government	14.3	11.1	21.0	13.3	22.3	12.5	15.2

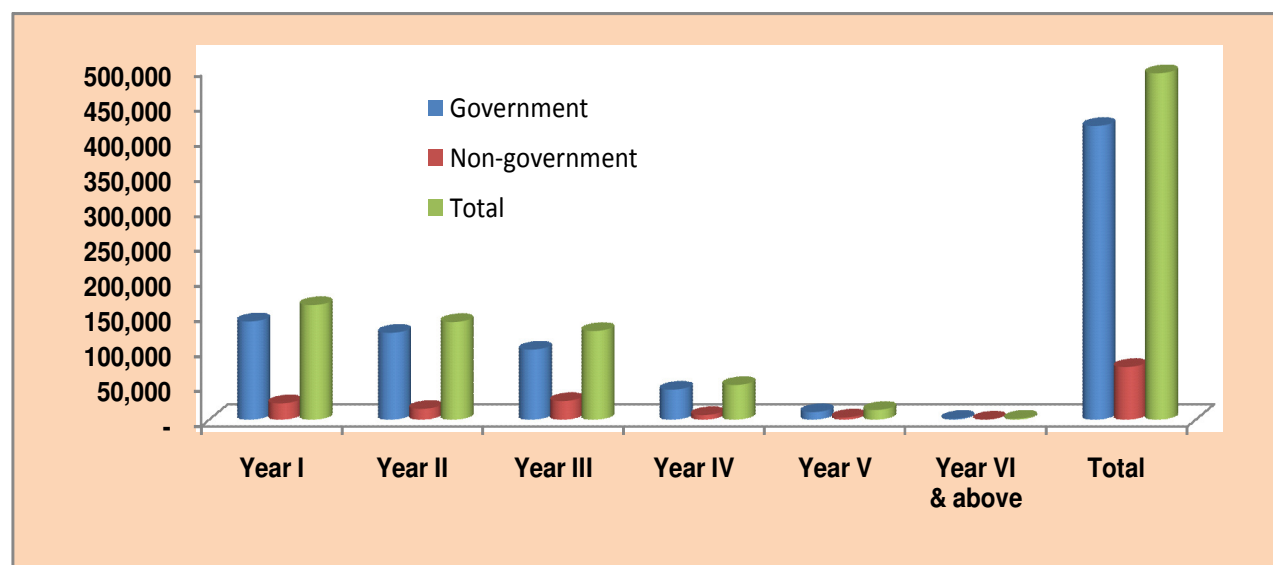

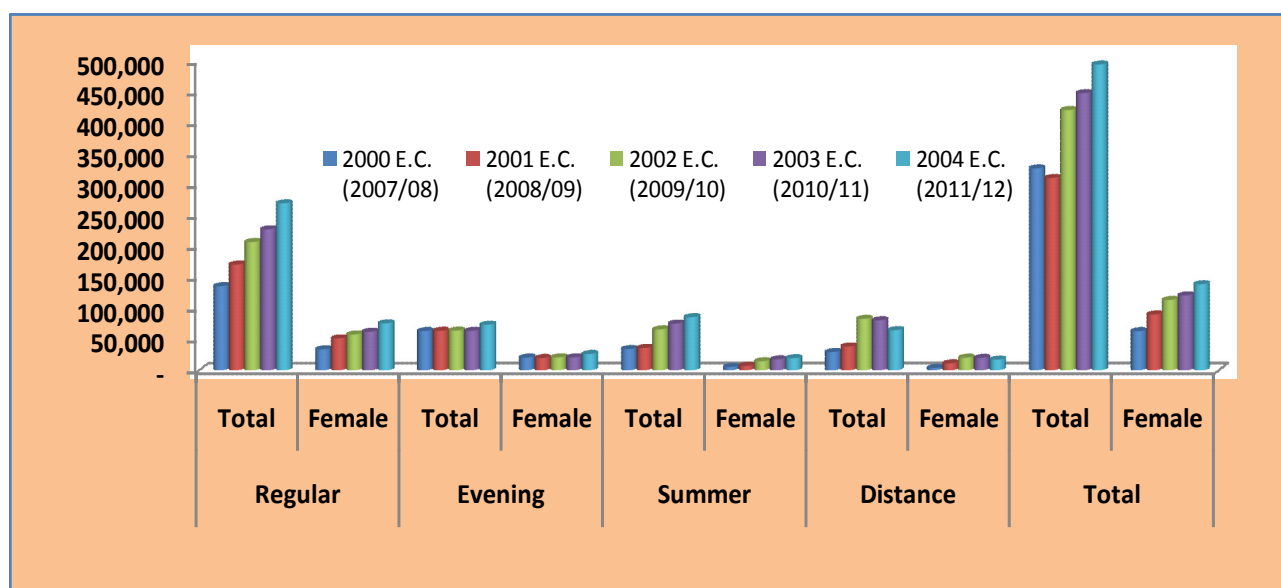

Table 4.41 and chart 4.29 above, show that in the year 2004 E.C. (2011/12) from the total undergraduate enrolment (government & non-government), the total share of years I, II and III is 86.9%; and year I is 33.1%, year II is 28.2% and year III is 25.6%. It can also be seen from the table and chart that year I undergraduate enrolment contains one-third of the total enrolment with the highest in year I and continues decreasing. But the non-government enrolment is highest at year III followed by year I and year II. This might show that new enrolment in non-government institutions is decreasing for the last two years or there might be under-reporting of their data.

Gross Entry Ratio and Gross Enrolment Ratio

The Gross Entry Ratio is the ratio of the total number of new entrants regardless of age to population of theoretical entrance age. Therefore, taking the year I enrolment as new admission (neglecting readmissions of year I), the Gross Entry Ratio is about 9.4%. If we consider the undergraduate higher education enrolment for year I, II and III, the Gross Enrolment Rate (GER) will be about 8.5% while for year I, II, III and IV will be about 7.3%. But if we consider the undergraduate higher education enrolment for year I, II, III, IV, V and VI, the Gross Enrolment Rate (GER) will be about 5.2%.

Table 4.42 and Chart 4.30 Trends in Undergraduate Enrolment-Gov't & Non-gov't

Year	Regular		Evening		Summer		Distance		Total	
	Total	Female	Total	Female	Total	Female	Total	Female	Total	Female
2000 E.C. (2007/08)	135,800	33,826	63,451	20,497	34,334	5,279	29,416	3,715	326,318	63,317
2001 E.C. (2008/09)	170,799	51,496	63,846	19,869	36,040	7,143	38,407	11,284	310,702	90,192
2002 E.C. (2009/10)	207,179	57,871	64,069	20,786	66,025	14,618	83,114	20,354	420,387	113,629
2003 E.C. (2010/11)	227,688	62,317	63,725	20,911	75,436	17,649	80,844	20,047	447,693	120,924
2004 E.C. (2011/12)	269,862	75,834	73,678	26,370	85,696	19,610	64,874	17,289	494,110	139,104

From the table 4.42 and chart 4.30 above, it can be seen that undergraduate enrolment in regular programs has been increasing significantly for the last five years while enrolment in distance program is decreasing slightly for the last three years. The total enrolment in all the programs (regular, evening, summer and distance) has increased substantially for the last five years.

Intake Ratio of Science and Technology to Social and Humanities Sciences

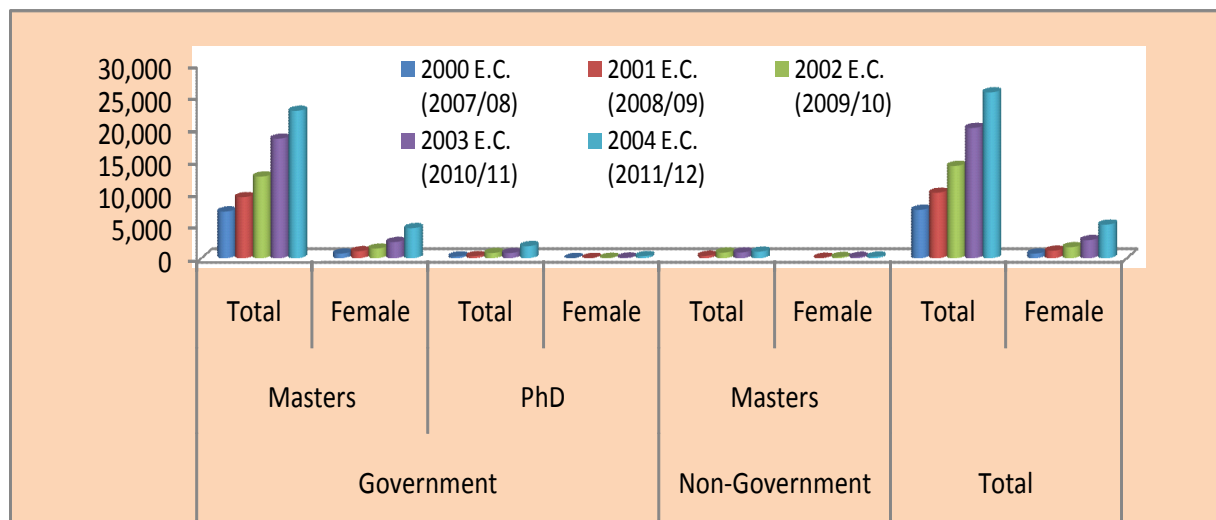

In the year 2004 E.C (2011/12), the government regular program undergraduate intake ratio of Science & Technology to Social & Humanities Sciences (S&T to SHS), taking the year I enrolment as new admission, is 75:25 where as this intake ratio for all programs (regular, evening, summer, distance) is found to be 65:35.

Enrolment in Postgraduate program

The postgraduate program is a specialized program offered under the schools of graduate studies to students who already have their bachelor’s or first degree. Completion of this program is certified by awarding either a Masters degree or equivalent and PhD degree.

Table 4.43 & chart 4.31 Trends in Postgraduate Enrolment-Gov’t & Non-gov’t

Year	Government				Non-Government		Total		
	Masters		PhD		Masters		Total	Female	%F
	Total	Female	Total	Female	Total	Female			
2000 E.C. (2007/08)	7,211	702	258	7			7,469	709	9.5
2001 E.C. (2008/09)	9,436	1,069	325	26	364	51	10,125	1,146	11.3
2002 E.C. (2009/10)	12,621	1,485	791	47	860	171	14,272	1,703	11.9
2003 E.C. (2010/11)	18,486	2,490	789	99	875	193	20,150	2,782	13.8
2004 E.C. (2011/12)	22,804	4,635	1,849	319	1,007	228	25,660	5,182	20.2

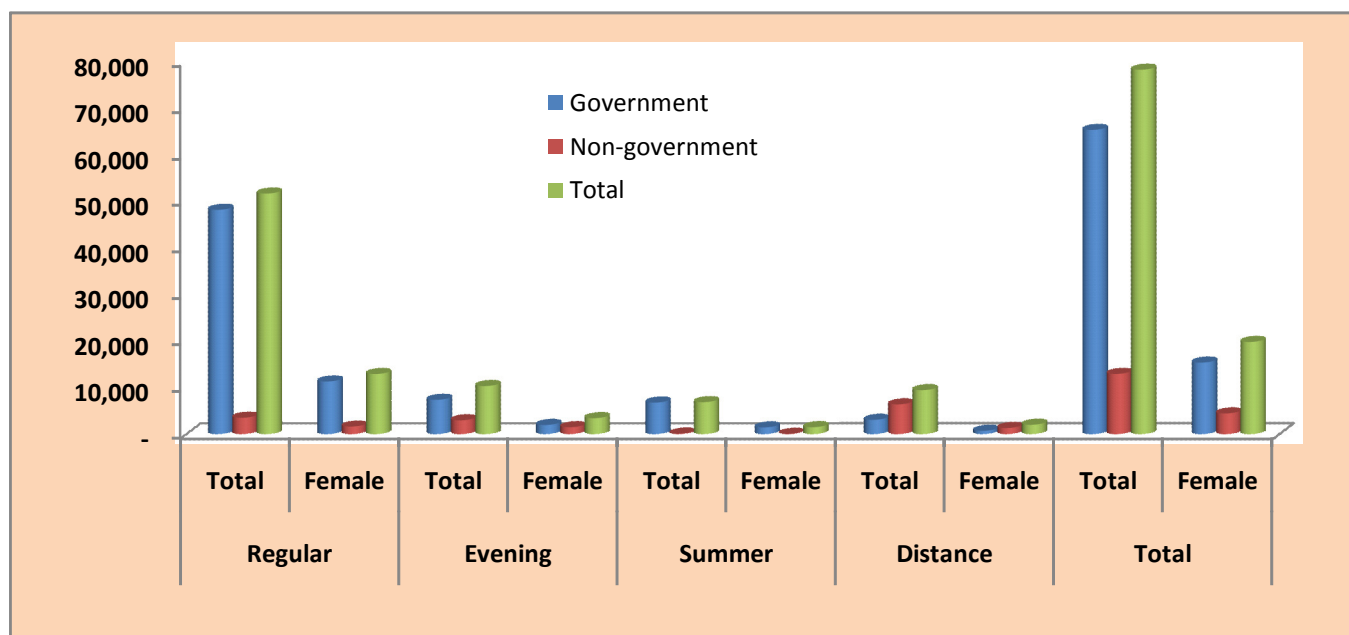

As noted in table 4.43 & chart 4.31 above, there is a significant increase in postgraduate enrolment in the past five years of which on average 96.1% are from government institutions. In 2004 E.C (2011/12), the percentage of female postgraduate students is 20.2% which is higher by 6.4 percentage points when compared to the year 2003 E.C (2010/11).

Graduates from Undergraduate program

Undergraduate graduates are those who completed their study at the higher education institutions, and awarded a bachelor’s or first degree.

Table 4.44 and Chart 4.32 Graduates in Undergraduate Program-2004 E.C. (2011/12)

Ownership	Regular		Evening		Summer		Distance		Total		
	Total	Female	Total	Female	Total	Female	Total	Female	Total	Female	%F
Government	48,093	11,274	7,340	1,951	6,752	1,422	3,054	690	65,239	15,337	23.5
Non-government	3,490	1,612	2,951	1,456	98	48	6,366	1,306	12,905	4,422	34.3
Total	51,583	12,886	10,291	3,407	6,850	1,470	9,420	1,996	78,144	19,759	25.3
Share of Non-government	6.8	12.5	28.7	42.7	1.4	3.3	67.6	65.4	16.5	22.4	

As noted in table 4.44 and chart 4.32 above, there are a total of 78,144 graduates in undergraduate program of which 19,759 are females which account for 25.3%. In addition, it can be observed that 65,239 (83.5%) of the undergraduate graduates are graduated from government institutions.

Table 4.45 & chart 4.33 Trends in Undergraduate Graduates-Gov't & non-government

Year	Regular		Evening		Summer		Distance		Total		
	Total	Female	Total	Female	Total	Female	Total	Female	Total	Female	%F
2000 E.C. (2007/08)	27,789	5,041	10,353	3,487	4,591	716	5,246	687	47,979	9,931	20.7
2001 E.C. (2008/09)	34,499	7,258	11,151	4,117	2,671	558	7,788	4,826	56,109	16,759	29.9
2002 E.C. (2009/10)	41,224	9,448	10,903	3,742	7,592	1,198	7,280	1,311	66,999	15,699	23.4
2003 E.C. (2010/11)	45,042	13,911	14,396	4,589	6,952	973	8,958	1,092	75,348	20,565	27.3
2004 E.C. (2011/12)	51,583	12,886	10,291	3,407	6,850	1,470	9,420	1,996	78,144	19,759	25.3

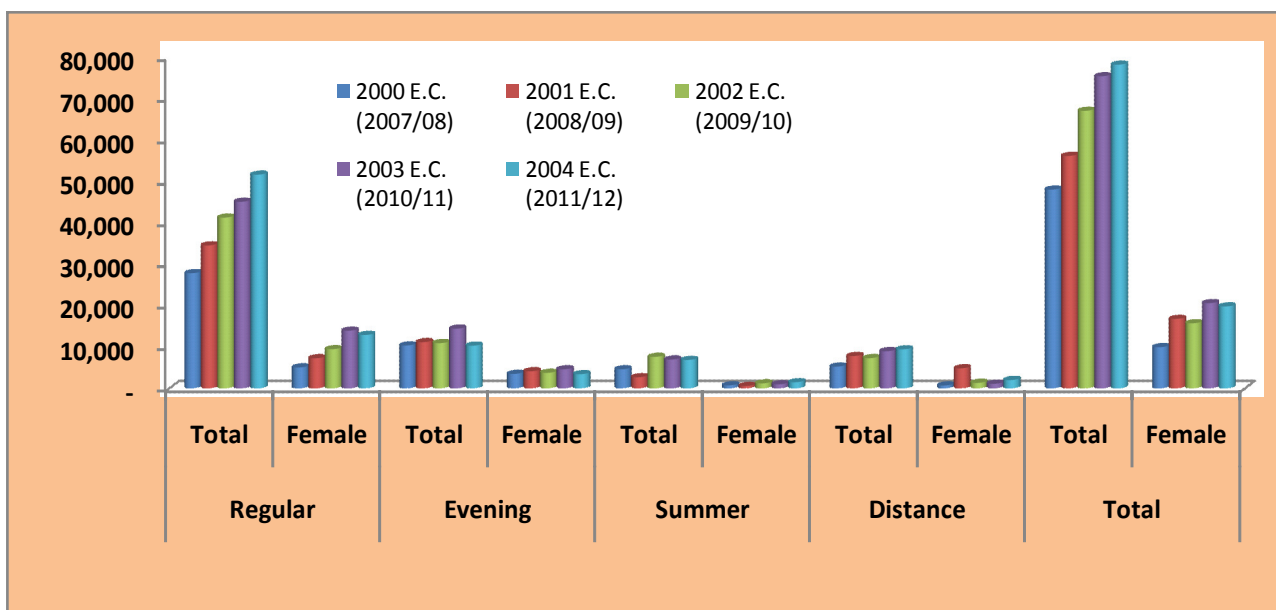

Table 4.45 and chart 4.33 above show the trend in undergraduate graduates by program for the last five years. There is a steady increase of overall undergraduate graduates for the last five years.

Graduates in Postgraduate program

Postgraduate graduates are those who completed their study at the higher education institutions, and awarded a Master’s or second degree and PhD or third degree.

Table 4.46 Graduates in Postgraduate Program-2004 E.C. (2011/12)

Graduates	Government				Non-Government		Total	
	Masters		PhD		Masters		Total	Female
	Total	Female	Total	Female	Total	Female		
	5,817	792	70	7	275	61	6,162	860

Table 4.46 above, shows there are 6,162 postgraduate graduate students of which 5,887 (95.5%) are graduated from the government institutions. In addition, 1.1% of the total postgraduate graduates are PhD program graduates. It can be seen from the table that from the total postgraduate graduates, 14.0% are female graduates.

Table 4.47 & chart 4.34 Trends in Postgraduate Graduates-Gov’t & Non-gov’t

Year	Government				Non-Government		Total		
	Masters		PhD		Masters		Total	Female	%F
	Total	Female	Total	Female	Total	Female			
2000 E.C.(2007/08)	2,645	283	19	1			2,664	284	10.7
2001 E.C.(2008/09)	3,416	399	15	-	158	24	3,589	423	11.8
2002 E.C.(2009/10)	4,500	625	149	18	224	36	4,873	679	13.9
2003 E.C.(2010/11)	5,876	819	21	1	353	79	6,250	899	14.4
2004 E.C.(2011/12)	5,817	792	70	7	275	61	6,162	860	14.0

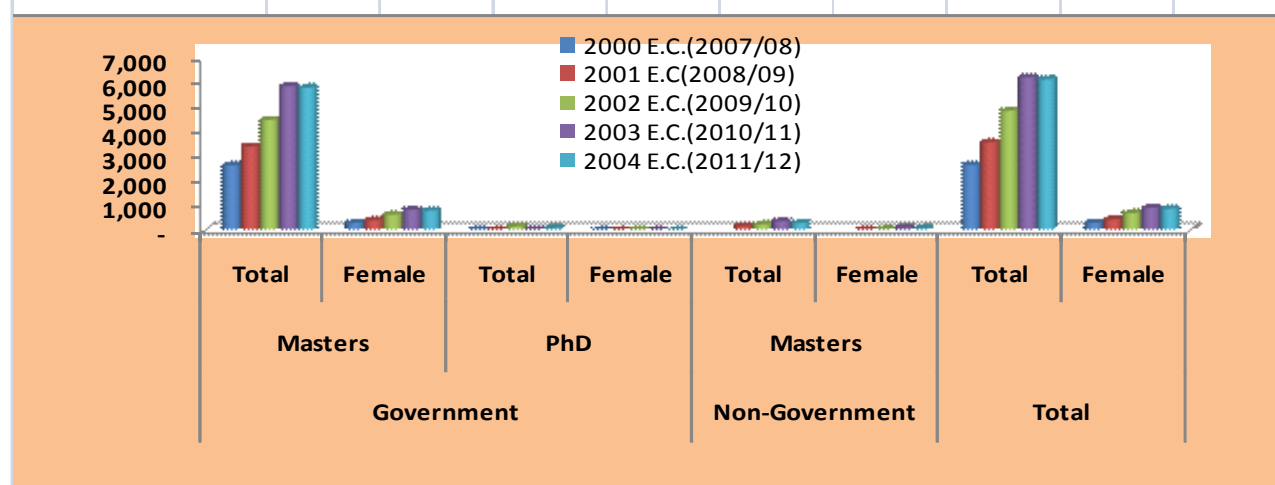

Table 4.47 and chart 4.34 above show the trend in postgraduate graduates for the last five years. It can be seen from the table and chart that there was a continuous increase of postgraduate graduates for the last four years but a slight decline in the year 2004 E.C (2011/12).

Academic Staff in Higher Education Institutions

Table 4.48 Trends of Academic Staff in Higher Education Institutions

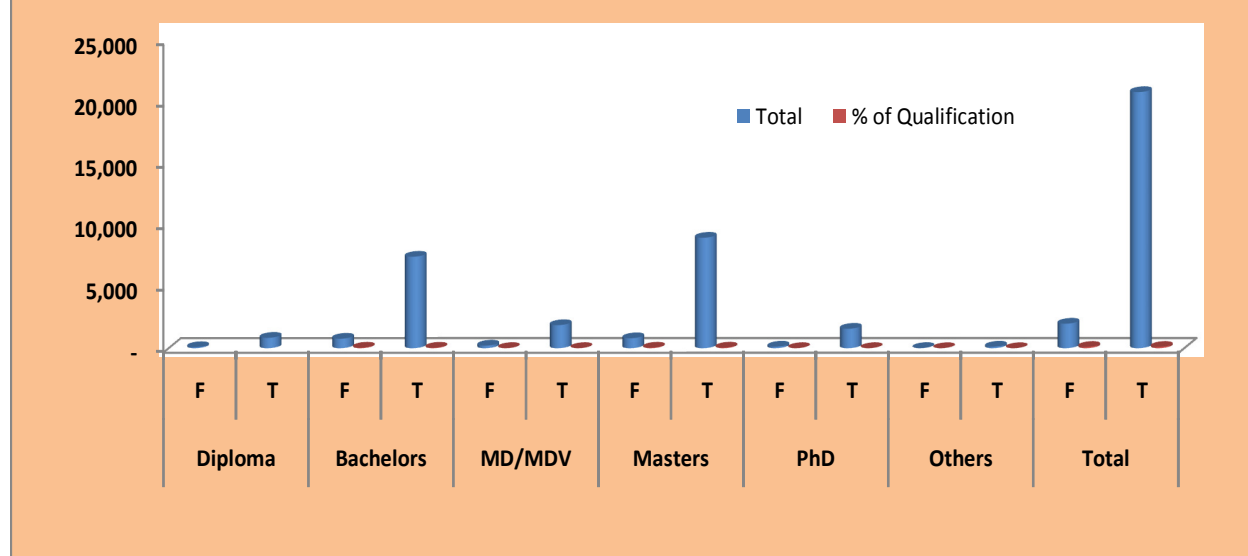

Year	Government				Non-government				Total	
	Ethiopian		Expatriate		Ethiopian		Expatriate		Total	Female
	Total	Female	Total	Female	Total	Female	Total	Female		
2000 E.C.(2007/08)	-	-	-	-	-	-	-	-	-	-

Pupil-Teacher Ratio (PTR) In Higher Education

The Pupil Teacher Ratio (PTR) in higher education is difficult to calculate without the concept of a full-time-equivalent (FTE) student and full-time-equivalent teaching staffs. This occurs because not all students attend full-time-equivalent and so the actual number of students in a class would be lower than the number of students. Secondly, non-government higher education institutions often employ part-time teaching staffs. The available numbers reported show only “full-time” academic staffs, so the contributions to teaching of part-time teaching staffs do not appear.

Despite these problems, a rough comparison of listed students at the undergraduate level and the listed academic staff show the following over the last five years.

Table 4.50 Pupil-Teacher Ratio (PTR): Undergraduate degree programs

Year	2000 E.C (2007/08)	2001 E.C (2008/09)	2002 E.C (2009/10)	2003 E.C (2010/11)	2004 E.C (2011/12)
Undergraduate Enrolment	263,001	310,702	420,387	447,693	494,110
Full Time Teachers	-	11,028	15,707	17,402	20,822
PTR	-	28.2	26.8	25.7	23.7

As noted in table 4.50 above, Pupil-Teacher-Ratio (PTR) for higher education undergraduate program has decreased from 28.2 to 23.7 in the last four years.

5. DETAILED TABLES BY REGION AND YEAR

Annex

Summary Tables

Table 5.1	Total Population, School Age Population, Enrollment and Gross Enrollment Ratios by Region and Sex (Regular Evening and ABE)	70
Table 5.1.1	Primary (Grade 1-4): 2004 E.C (2011/12)	70
Table 5.1.2	Primary (Grade 5-8): 2004 E.C (2011/12)	70

Table 5.44.1 Government Regular													
Accounting							151	229			151	229	380
Administrative Office and Secretarial Services							22	192			22	192	214
Advanced Animal health care							31	26			31	26	57
Advanced Bamboo Derivatives Production			11	-							11	-	11
Advanced Bamboo Processing and Marketing Management	37	33	50	11	57	20	200	111			344	175	519
Agro forestry Development			12	28							12	28	40
Airborne Communication and Navigation System Maintenance					37	13					37	13	50
Airborne Radar Maintenance							18	22			18	22	40
Anesthetic Nursing							106	260			106	260	366
Animal production and Marketing Management							47	59			47	59	106
Artificial Insemination					18	29					18	29	47
Automotive Body Repair					8	21					8	21	29
Automotive Carpentry and Upholstery					22	2					22	2	24
Automotive Electrical / Electronics Servicing			5	6	13	7	7	4			25	17	42
Automotive Engine Servicing					116	31					116	31	147
Automotive Power Train and Underchassis Servicing (HD)							63	16			63	16	79
Automotive Power Train and Underchassis Servicing (LH)							34	12			34	12	46
Automotive Service, Power Train Chassis Driveline Mechanics			30	2	40	55	91	13			161	70	231
Automotive Technology Management									61	43	61	43	104
Bar bending and concreting	13	23	123	76	48	42	18	10			202	151	353
Basic Ambulance Service and Emergency Care							29	28			29	28	57
Basic Animal Health					11	18					11	18	29
Basic Metal Works					16	6	11	5			27	11	38
Basic Telecommunication Works	17	21	55	41	27	73	61	100			160	235	395
Beekeeping					18	28	40	36			58	64	122
Bridge construction and management			4	11							4	11	15
Building Construction Management					25	5	56	58			81	63	144
Building Electrical Installation	30	22	37	34	46	25	187	66			300	147	447
Carpentry and Joinery			10	4	11	14	48	10			69	28	97
CNC Machine Operations			20	10			20	5			40	15	55
Cobble Stone Road Construction			7	2							7	2	9
Community Service Works					-	25	54	54			54	79	133
Concreting and Reinforcement Works	18	22	76	72	53	13	133	99			280	206	486
Construction Management									30	20	30	20	50
Construction Site Operations Management							13	2			13	2	15
Construction Works	39	39	7	13			15	12			61	64	125
Crop Production Extension							85	91			85	91	176
Dental Assisting							14	21			14	21	35
Field Crops production					13	14					13	14	27
Fine Arts					15	5	137	71			152	76	228

3. Number of graduates from the final year

Boys	Girls	Total
190	242	216

C. INDICATORS OF RETENTION BY YEARS SPENT IN THE CYCLE

1. Enrolment by years of study

Year	Boys	Girls	Total
1997	1000	1000	1000
1998	740	760	749
1999	629	663	645
2000	547	593	568
2001	472	527	497
2002	390	454	419
2003	328	400	363
2004	281	354	317
2005	136	168	152
2006	40	48	44

2. Dropouts by years of study

Year	Boys	Girls	Total
1997	260	240	251
1998	111	97	104
1999	82	73	78
2000	61	53	56
2001	47	46	46
2002	50	60	55
2003	28	35	32
2004	13	16	15
Total	653	621	636

**Internal Efficiency in primary grades 1-8
Government and Non Government Primary schools 2004 E.C. (2011/12)**

3. Graduates by years of study

Year	Boys	Girls	Total
2002	96	126	110
2003	67	84	76
2004	27	32	30

D. INDICATORS OF DURATION OF STUDY

1. Average duration of study for graduates

Boys	Girls	Total
8.6	8.6	8.6

2. Average duration of study for dropouts

Boys	Girls	Total
3.1	2.3	2.8

3. Average duration of study for the cohort

Boys	Girls	Total
4.5	4.8	4.6

E. INDICATORS OF WASTAGE IN EDUCATION

1. Input/output ratio

Boys	Girls	Total
3.0	2.6	2.8

Coefficient of Efficiency

Boys	Girls	Total
33.3	39.0	36.3

2. Proportion of total wastage spent on repetition and dropout(%)

	Boys	Girls	Total
Wastage due to dropouts	87.7	87.1	87.3
Wastage due to repetition	12.3	12.9	12.7

3. Proportion of total wastage spent on graduates(%)

	Boys	Girls	Total
Wastage due to graduates repeating grades	6.2	8.0	7.1
Wastage due to dropouts	93.8	92.0	92.9

F. BRIEF SUMMARY

	Boys	Girls	Total
Total Pupil-Years	4562	4966	4755
Output	190	242	216
Pupil-years per graduates	24.0	20.5	22.0
Pupiiil-years wasted	3043	3027	3027
Input-output ratio	3.0	2.6	2.8
Coefficient of Efficiency	33.3	39.0	36.3

GLOSSARY

Apparent Intake Rate (AIR):

Apparent Intake Rate, sometimes called Gross Intake Rate is the percentage of new entrants (irrespective of age) in grade 1 out of the total number of children of the official admission age (age 7, for primary education, in the Ethiopian case) in a given year.

Dropout Rate:

Dropout rate is the percentage of pupils who discontinue their learning from a given grade compared to the previous year's total enrolment in the same grade.

Full Day School:

A Full Day School operates one shift during the entire day-in contrast with a shift school. At Primary level, the school day consists of 7, each 45 minutes period with one 15 minutes break in the morning, and a 1.5 hour lunch break. The school day starts at 8:30am and ends at 3:30pm, with lunch taken between 12:30pm and 2pm. A Full Day School provides 5.25 hours of instruction per day, in contrast with the 4 hours per day in a Shift school. (See Shifts below)

Gender Parity Index (GPI):

Gender Parity Index is the ratio of female to male Gross Enrolment Rate (GER). A gender parity index of 1 indicates perfect equality between males and females, while a GPI closer to zero indicates high disparity between the participation of females compared to males. In a class of 100 students, if 50 are female, then the GPI is 1.

Gross Enrollment Rate (GER):

Gross Enrollment Rate is the percentage of pupils (irrespective of age) at a particular grade level compared to the corresponding school age population. For example, Primary Gross Enrollment Rate for Ethiopia would be the total primary school enrollment (first and second cycle) divided by the population aged 7-14.

Net Enrolment Rate (NER):

Net Enrolment Rate is the percentage of pupils at a particular grade level, who are of the official enrollment age for that level, compared to the corresponding school age population. For example Primary NER for Ethiopia would be the primary school enrollment of children aged 7-14 divided by the population aged 7-14. NER is a good measure of how well the system is supporting "on time" enrollment.

Net Intake Rate (NIR):

Net Intake Rate is the percentage of new entrants in grade 1 who are 7 years old, out of the total number of children of official admission age (age 7 for Primary in Ethiopia) in a given year. It is the "on-time" complementary rate to AIR.

Pupil Section Ratio (PSR):

Pupil Section Ratio is the average number of pupils, at a given educational level, in a given section. It is calculated by dividing the total number of pupils at a given level by the total number of sections available for that level. In a multi-shift school environment (such as Ethiopia has at both the Primary and Secondary levels), since classrooms are shared, the PSR is effectively the Student Classroom Ratio.

Pupil Teacher Ratio (PTR):

Pupil Teacher Ratio is the average number of pupils at a given education level per teacher at the same level. It is calculated by dividing the total number pupils at a given level of education by the total number of teachers available to teach at that level. PTR becomes more complex when teachers are part-time, specialized and teaching only a few classes, such as in 2 Cycle Secondary, TVET or Higher Education.

Readmits:

In Ethiopia, if a child repeats a grade more than one year after they first started the grade, then they are considered “readmits” rather than a repeater. In international terms, this approach “artificially” reduces repetition rates, but also increases perceived Drop Out rates. For purposes of international comparison, “readmits” are combined with repeaters to reflect the more widespread international approach to calculating repetition.

Repetition Rate:

Repetition Rate is the percentage of pupils repeating in a given grade out of the previous year’s total enrolment in the same grade. In Ethiopia, a student is only considered a repeater if he/she reenters the same grade within one year-after that, the student is considered a “readmit.” See Readmits for treatment of repetition rate calculations.

Rural Schools:

Rural schools are all schools located in areas that are not defined as urban by the Central Statistics Authority (CSA).

Section:

Sections are multiple streams of a single grade. For example, if there are 120 Grade One enrollees, and classrooms can only accommodate 60 children, then 2 sections will be formed. In addition, because some schools are on multiple shifts (see Shifts) sections allow the equivalent calculation to Pupil/Classroom ratio in a multi-shift environment.

Shifts:

Shifts are a second or third full school activity, in the same school building, at a different time of the day. Because of limited school buildings, some schools operate a Morning and Afternoon Shift as well as an Evening shift. In a shift school, the day consists of 6, 40 minute periods and one 15 minute break in the shift. For the average Ethiopian Primary shift school, the Morning shift starts at 8 a.m. and ends at 12:15pm. The afternoon shift starts at 12:30pm and ends at 4:45pm. If there is an Evening shift, it operates from 6pm to 8pm. Shift schools provide only 4 hours of instruction per day-in contrast with the 5.25 hours per day in Full Day Schools. The reduced hours are necessary so that, particularly for Primary school children, they are able to attend during daylight hours-including getting to and from school. (See Full Day School)

Urban Schools:

Urban schools are schools that are located in urban areas as defined in the national census by CSA.
